

7.1 Produce/Loading/Packaging Product

7.1.1 Manage BOM Inventory

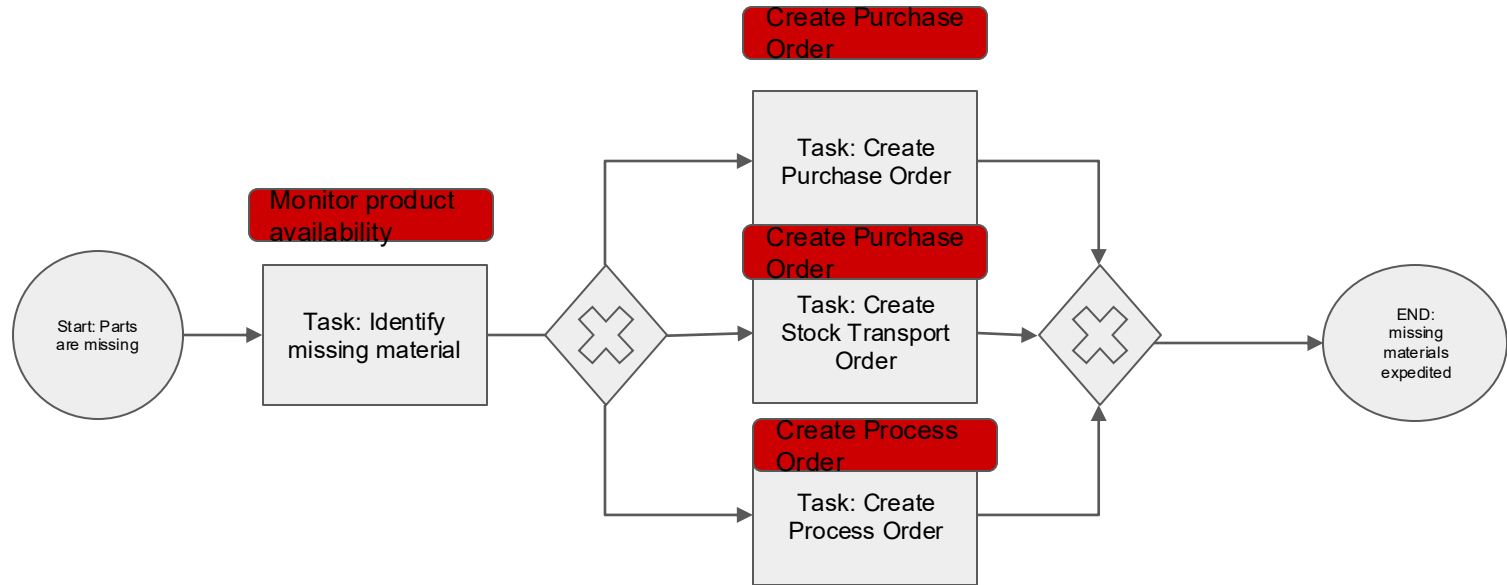

M-090-010: Check for Material Availability

Role = Production Supervisor - Process Manufacturing

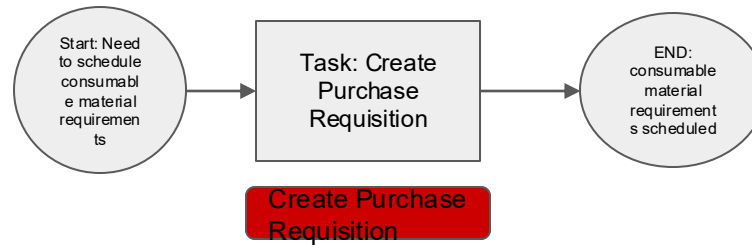

M-090-040: Expedite missing materials

Role = Production Supervisor - Process Manufacturing

M-090-090: Schedule Consumable Material Requirements

Role = Production Supervisor - Process Manufacturing

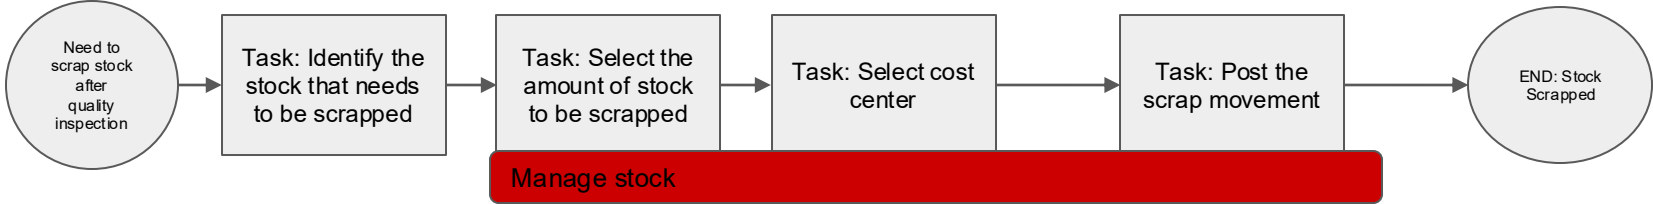

7.1 Produce/Loading/Packaging Product

7.1.10 Waste Management

Scrap management

Role = Quality Planner

Done

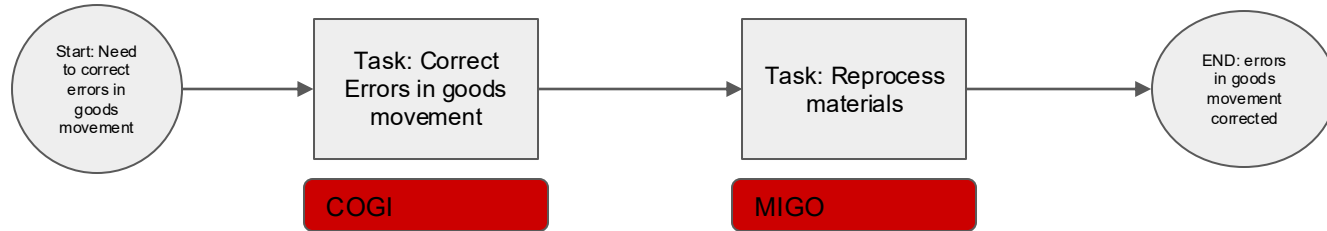

7.1 Produce/Loading/Packaging Product

7.1.11 Material quantities reconciliation (end of month closing)

M-100-060: Correct the errors in goods movement

Role =

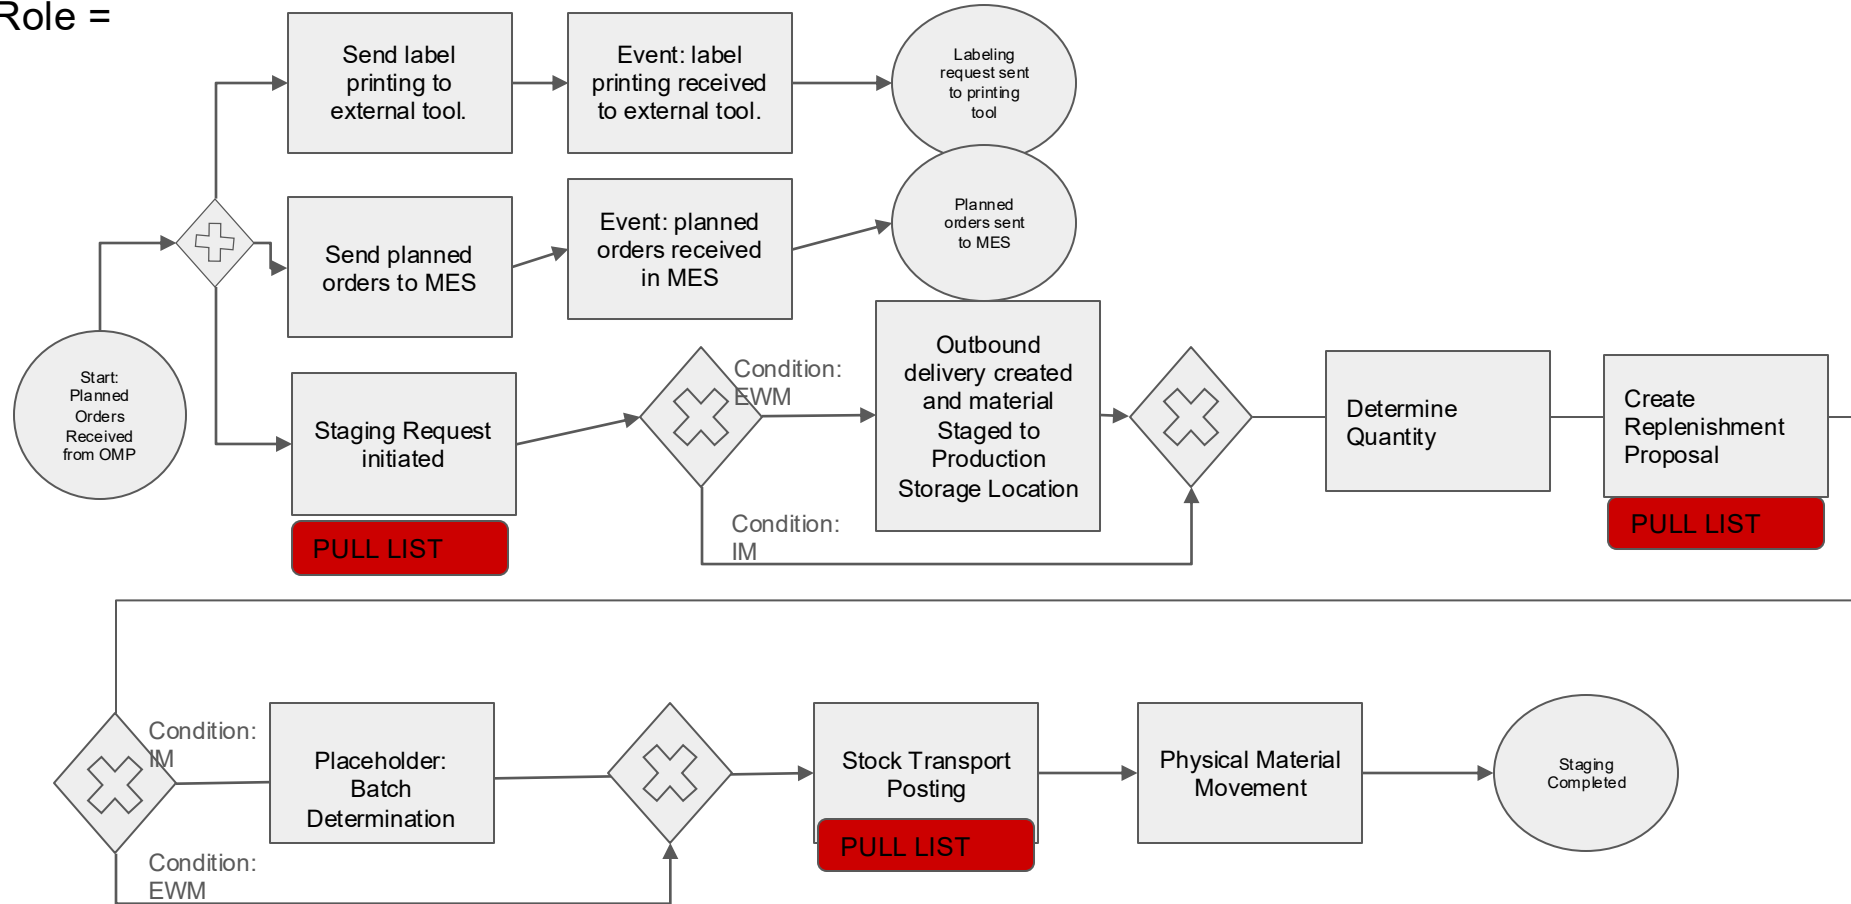

7.1 Produce/Loading/Packaging Product

7.1.12 Repetitive Manufacturing

Done

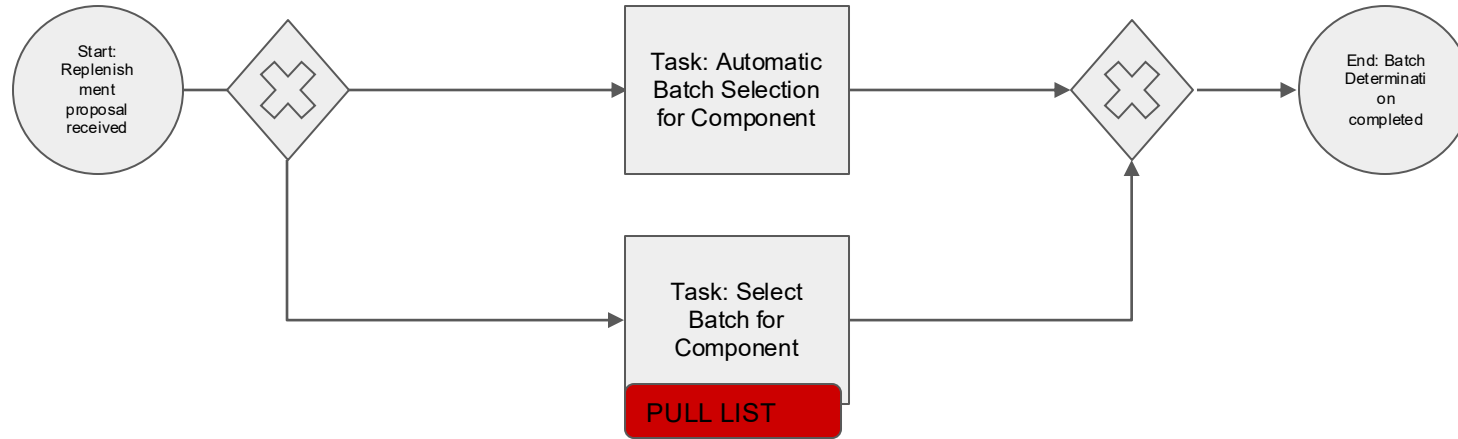

M-XXX-XXX: Staging/ stock transfers

Role =

M-XXX-XXX: Batch determination In Repetitive Manufacturing

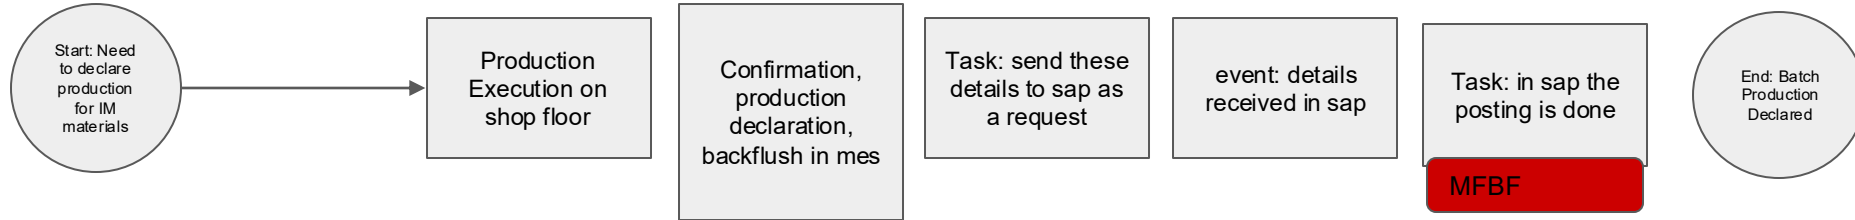

Role =

Done

M-XXX-XXX: Production Declaration

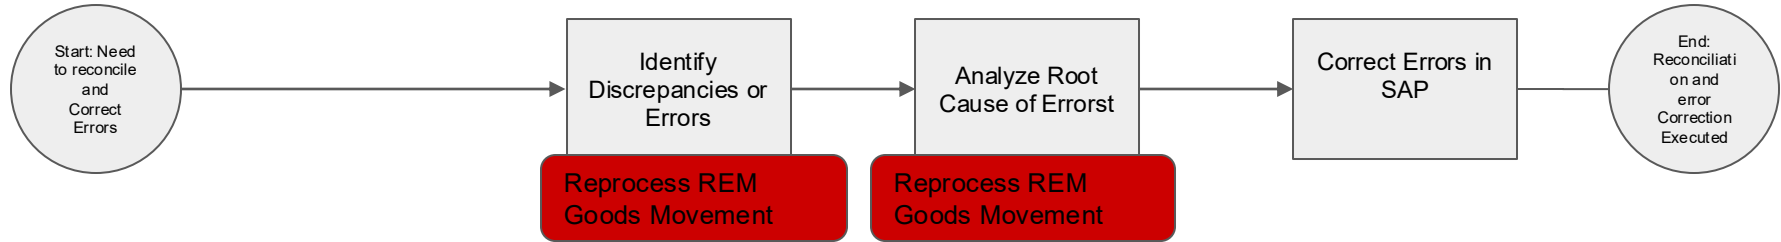

Role =

Note: mes? Which one later defined

M-XXX-XXX: Reconciliation and Error Correction Process Flow (Repetitive Manufacturing in SAP)

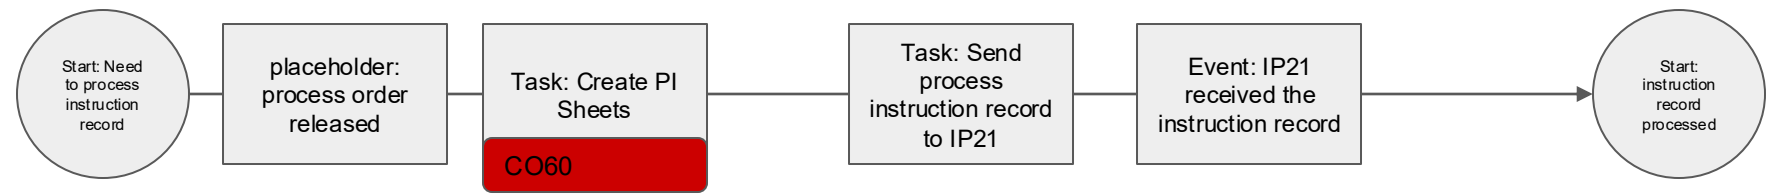

Role =

7.1 Produce/Loading/Packaging Product

7.1.4 Execution of operations plan

Process Instruction Record (EBR)

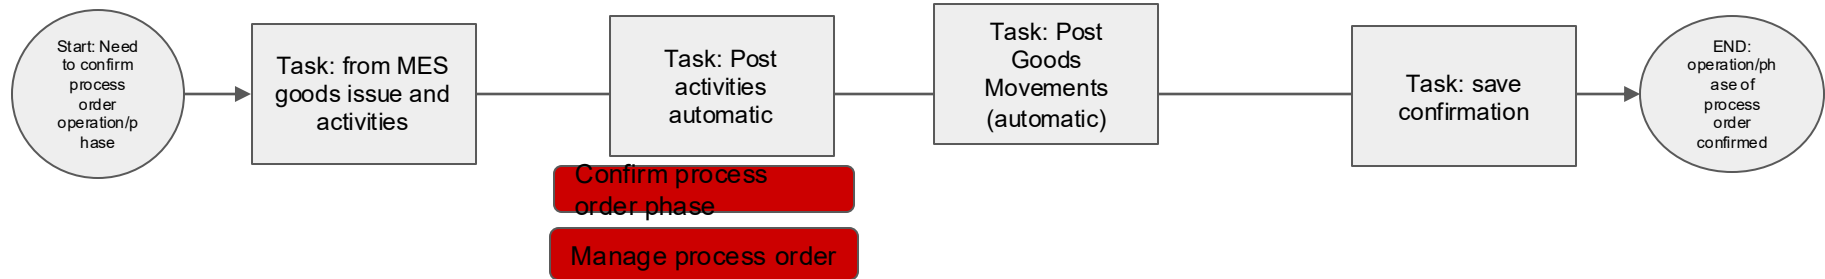

App Name

Note: the interfaces still needs to be decided.

Energy Manufacturing Process

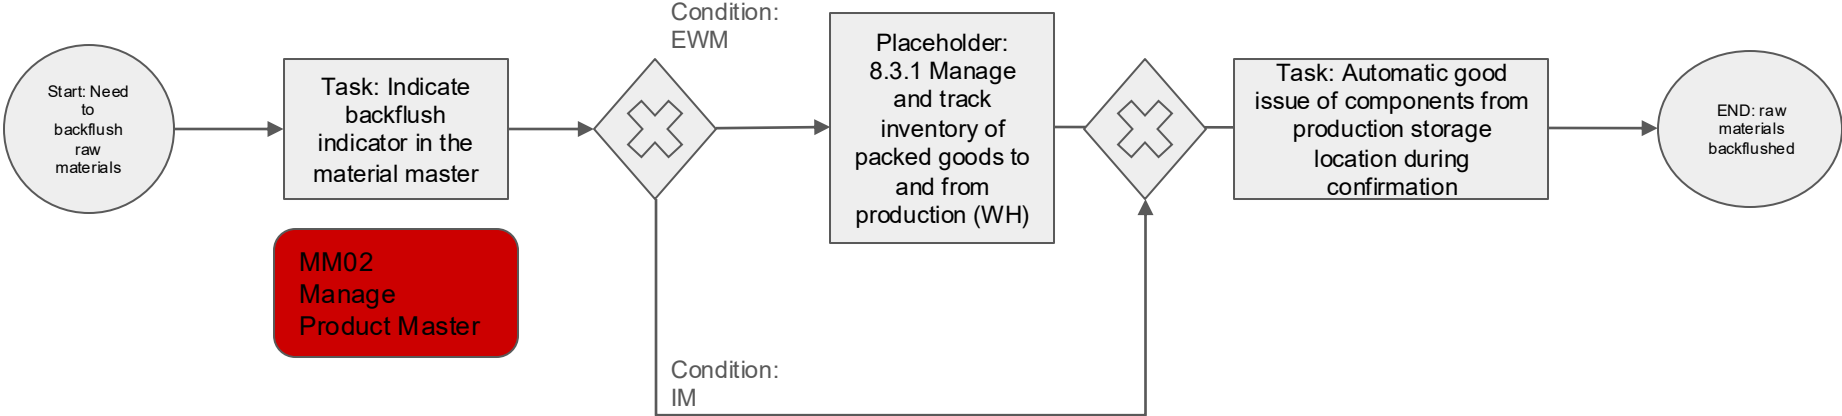

M-100-010: Confirm process order operation/phase

Role = Production Operator - process manufacturing

M-100-020: Backflush Raw Materials

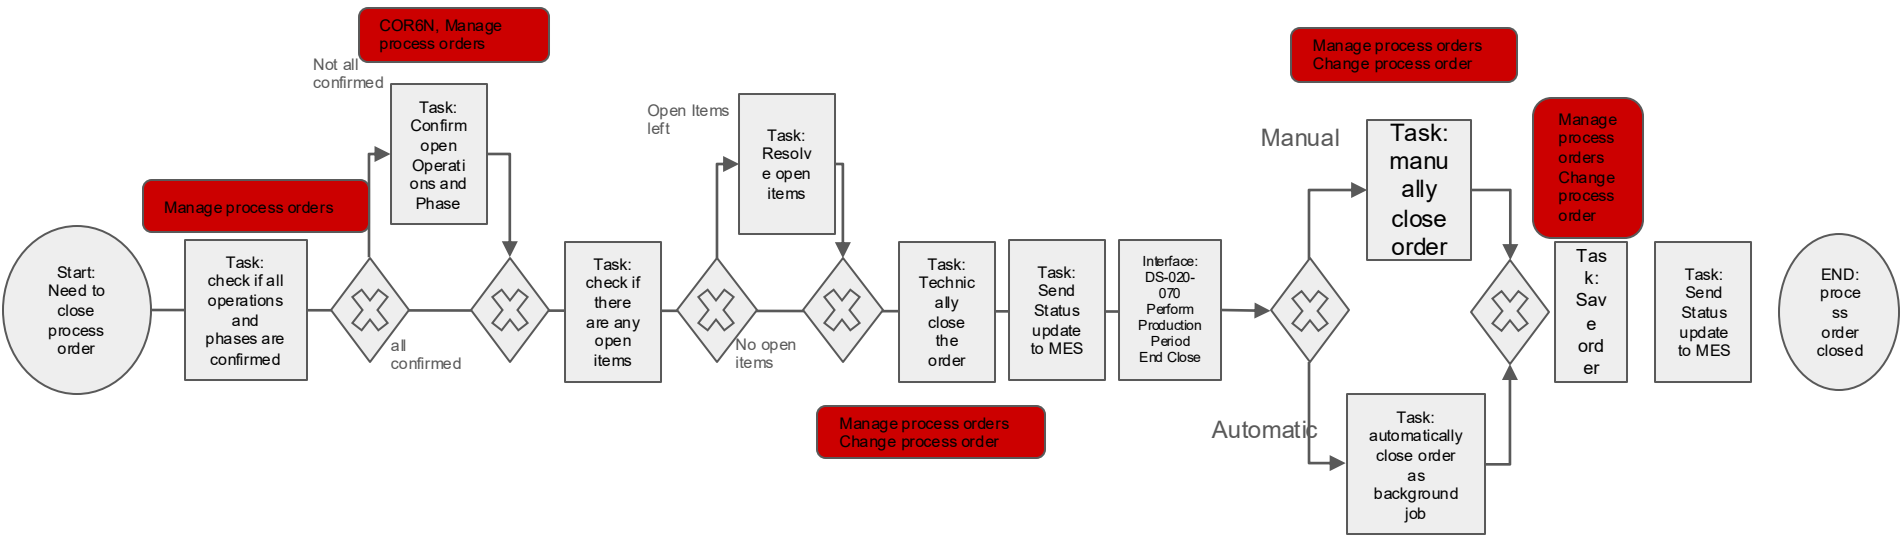

Done

M-100-070: Order Closure

Role = Production Supervisor - Process Manufacturing

Done

App name

M-100-090: Archive Process Record

Role = production supervisor - process manufacturing

Done

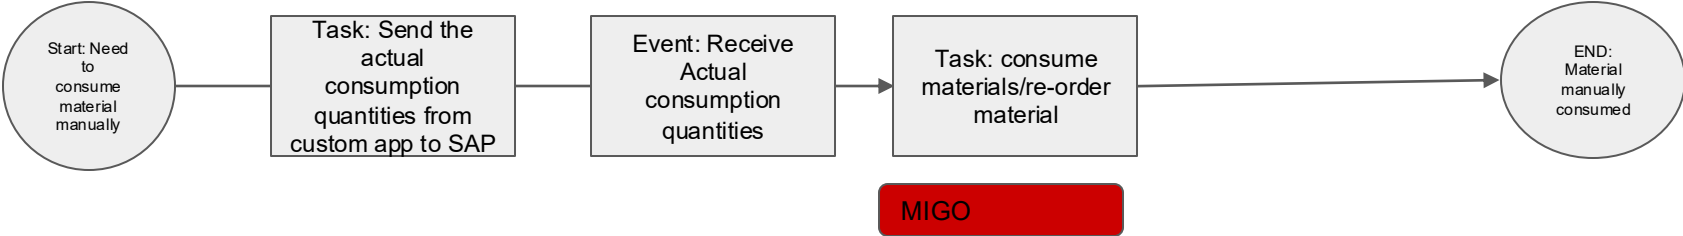

Note: To be deleted

App name

M-100-120: Consume Material/Re-order Material

Role = production supervisor - process manufacturing

Done

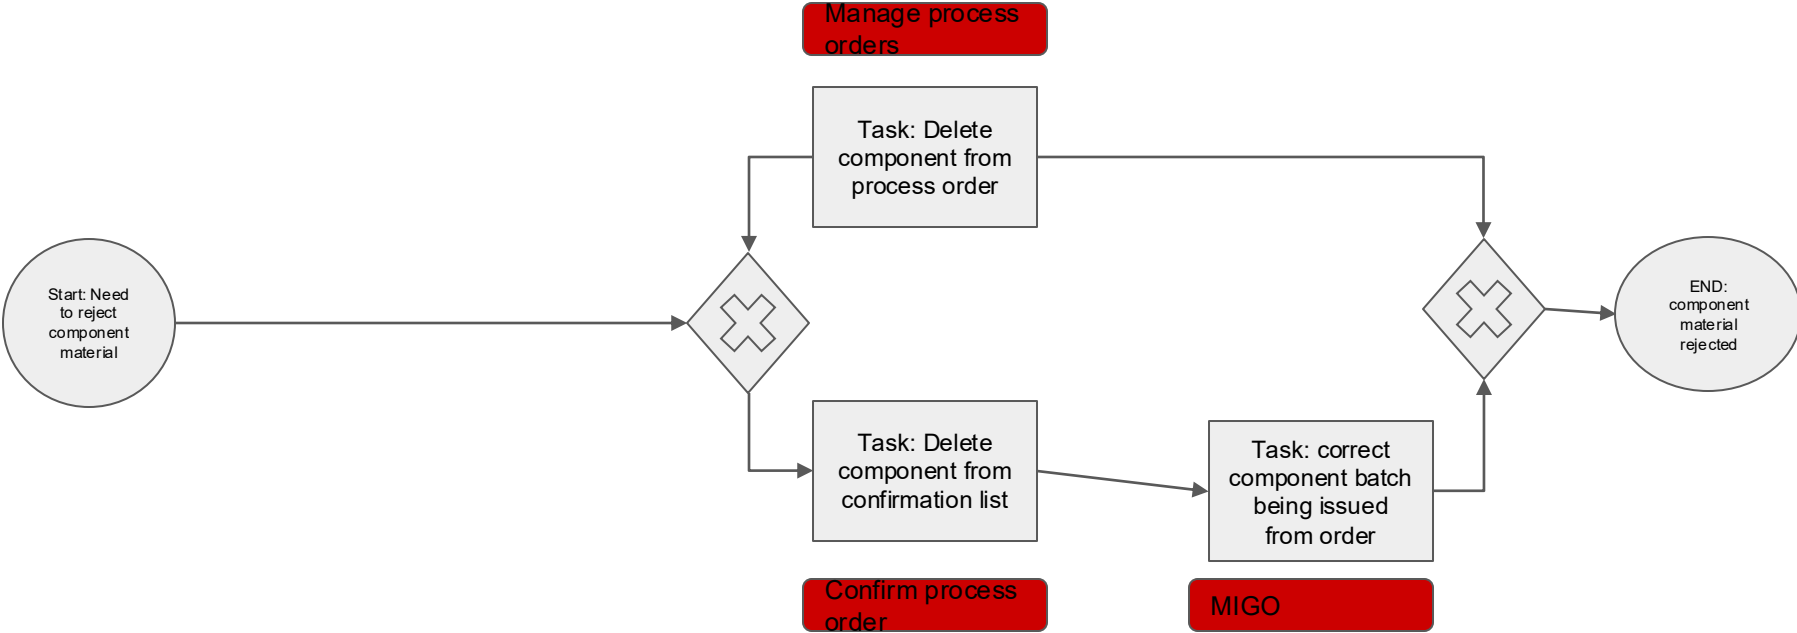

Note: MES to be decided, ask ninad

App name

M-100-240: reject component material

Role = Production Supervisor - Process manufacturing

Done

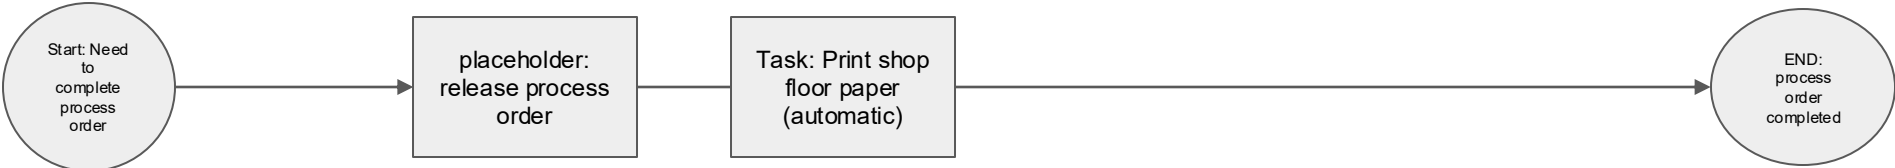

7.1 Produce/Loading/Packaging Product

7.1.5 Process Order creation and release

M-090-020: Complete process order

Role =

Done

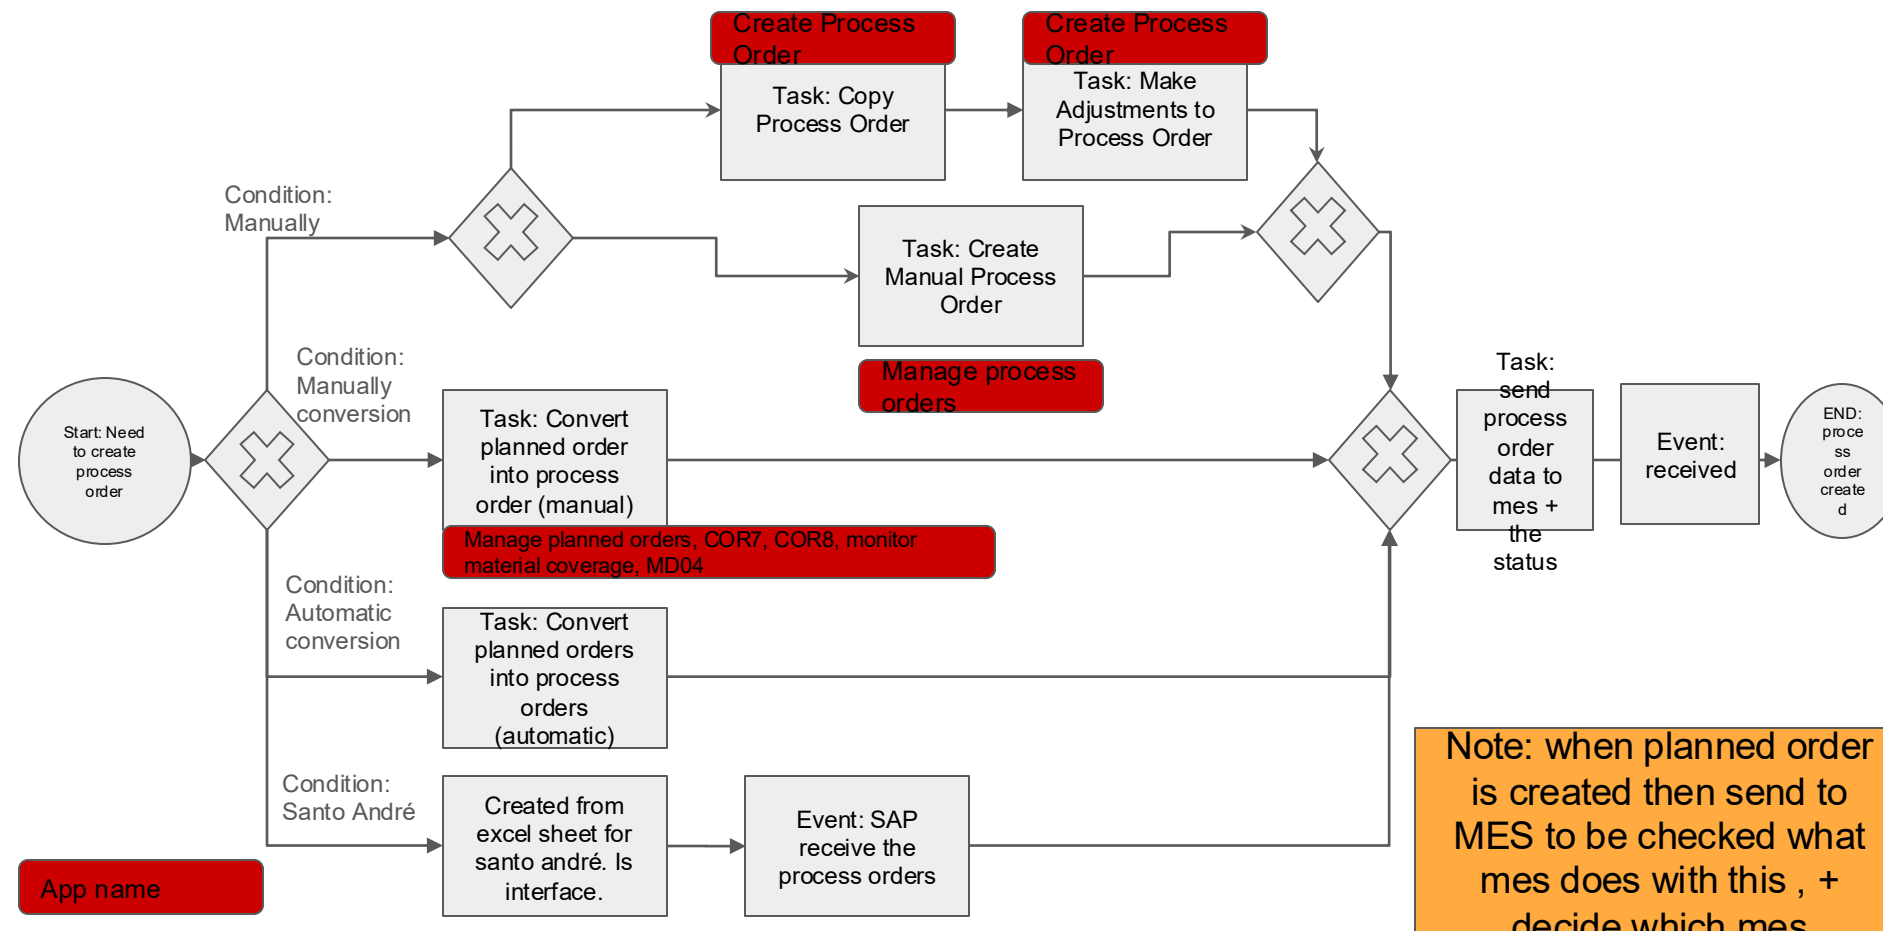

Note: discuss printing of pick list in EWM

M-090-030: Create process order

Role = Production Supervisor - Process Manufacturing

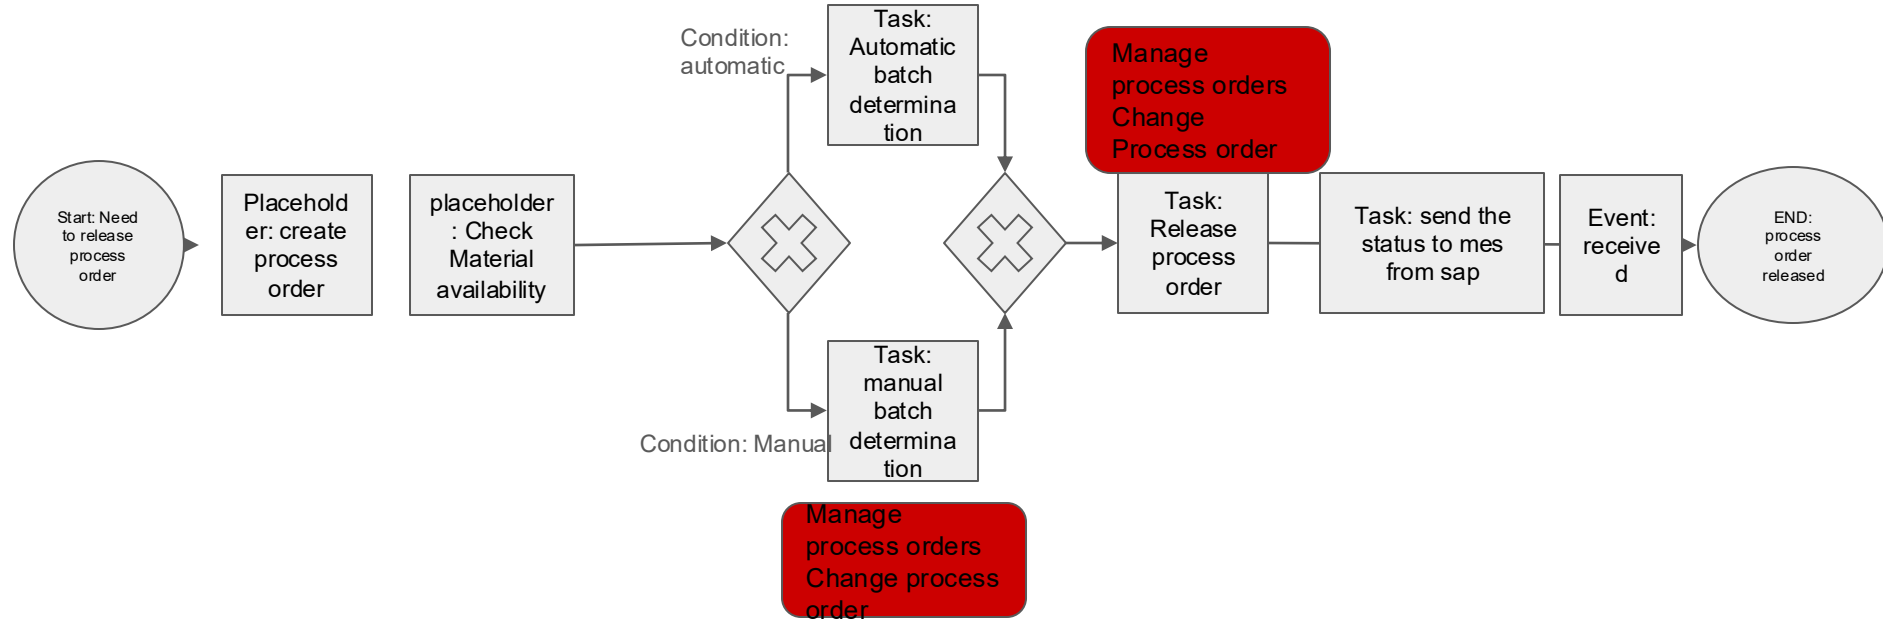

Done

M-100-050: Release Process Order

Done

Role = Production Supervisor - Process Manufacturing

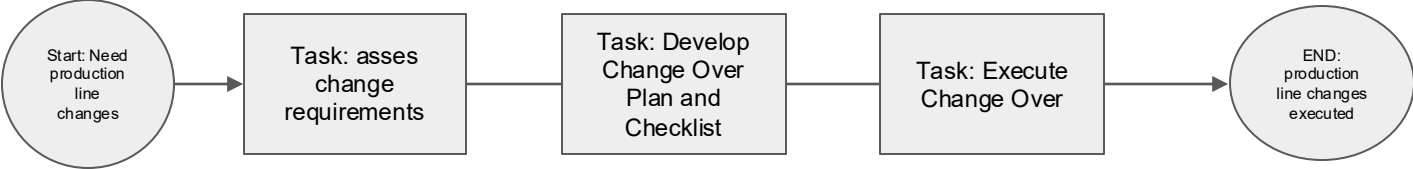

App name

M-100-220: Plan Production line changes

Role =

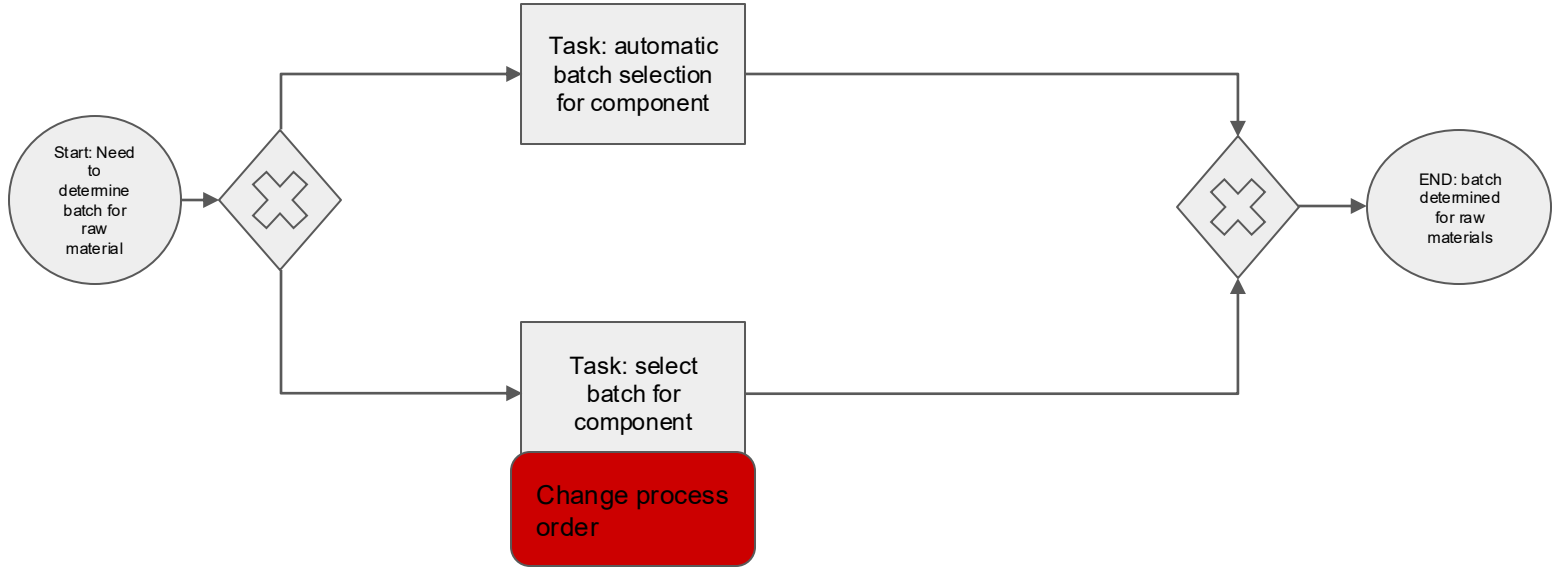

Done

M-100-280: batch determination for the raw materials

Role =

Done

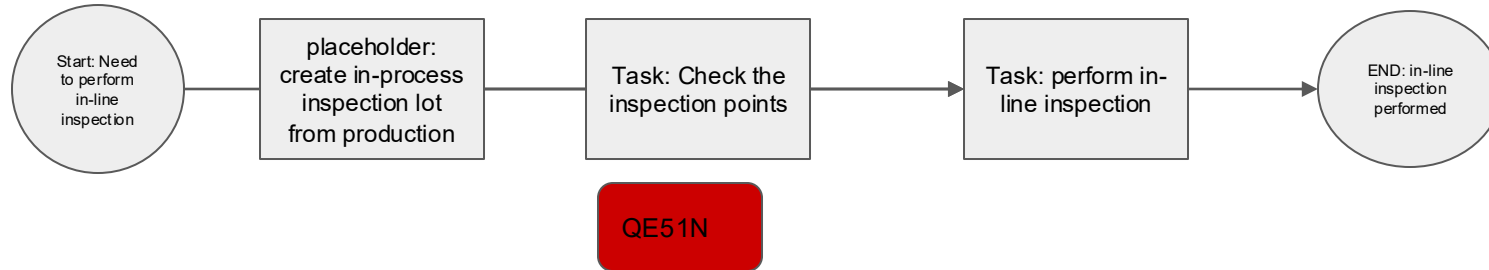

7.1 Produce/Loading/Packaging Product

7.1.6 Production Process control Analysis

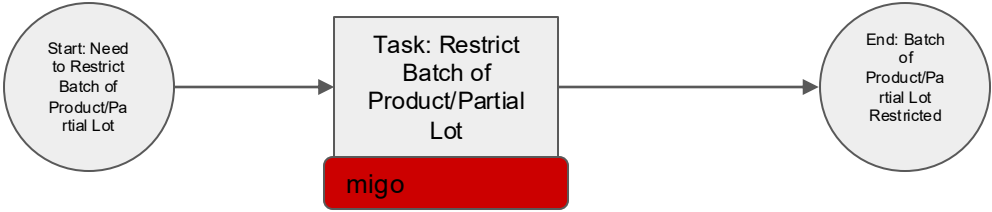

M-100-190: Perform In-Line Inspection

Role = Quality Planner

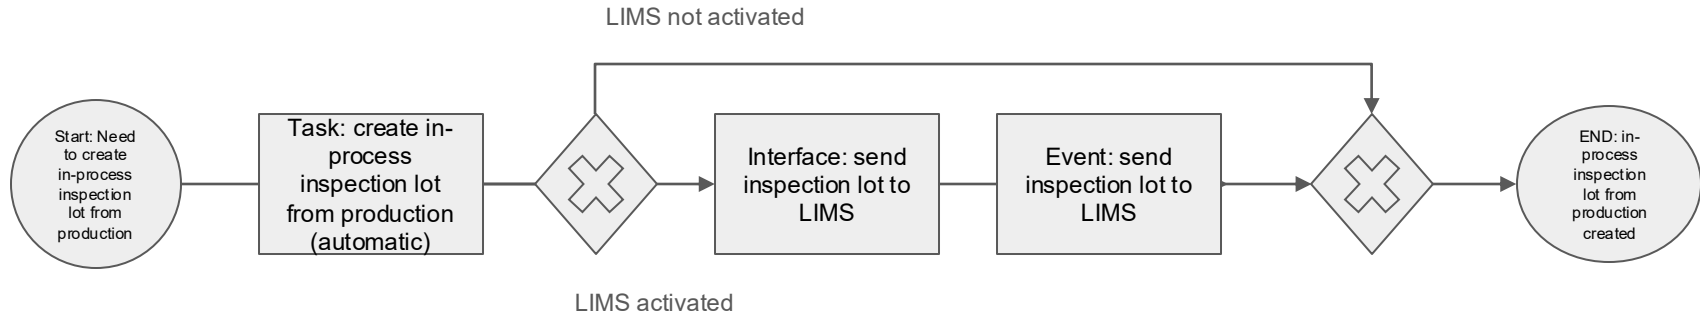

M-100-260: Restrict Batch of Product/Partial Lot

Role = Quality Planner

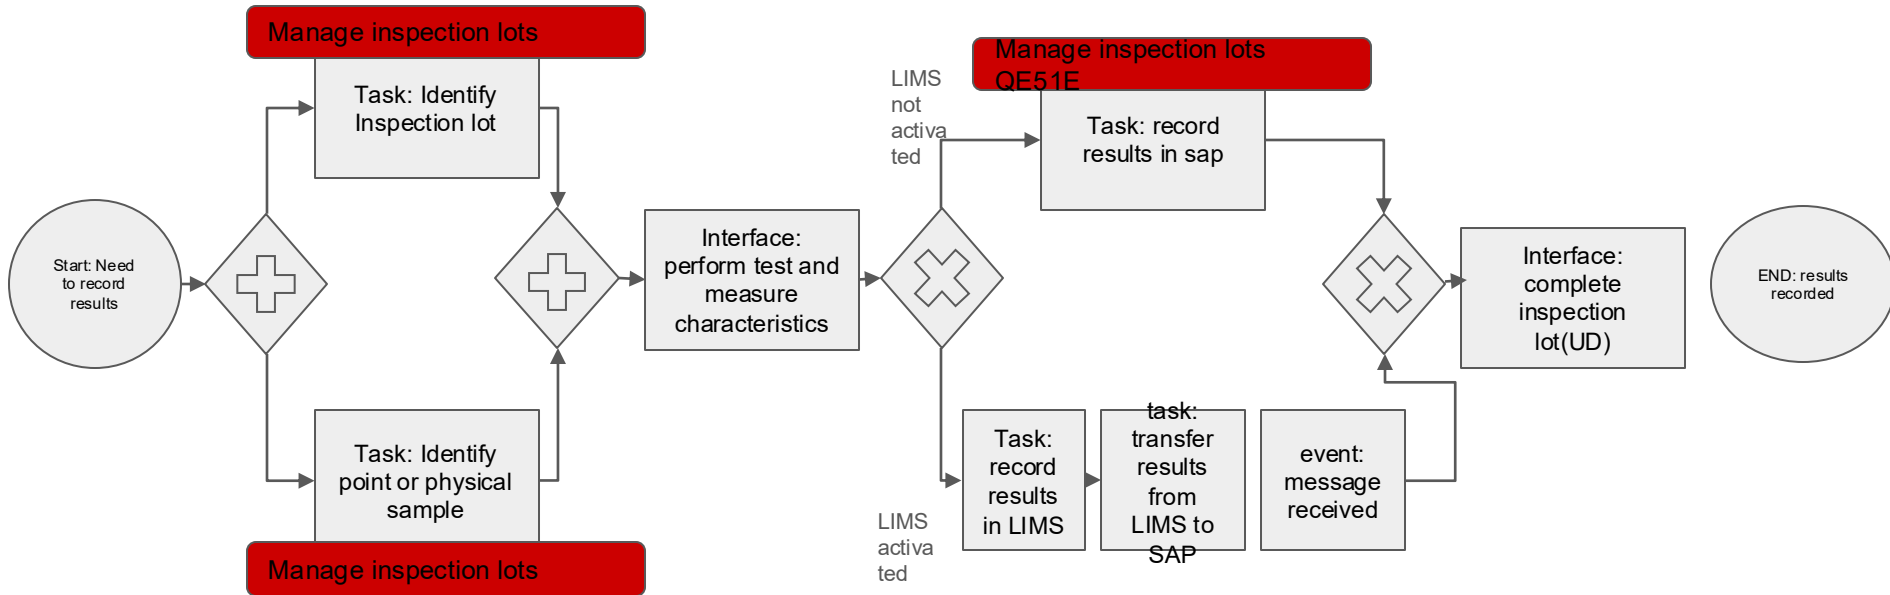

M-130-010: Create In-Process Inspection Lot from Production

Role = Quality Planner

M-130-040: Results Recording In Process

Role = Quality Planner

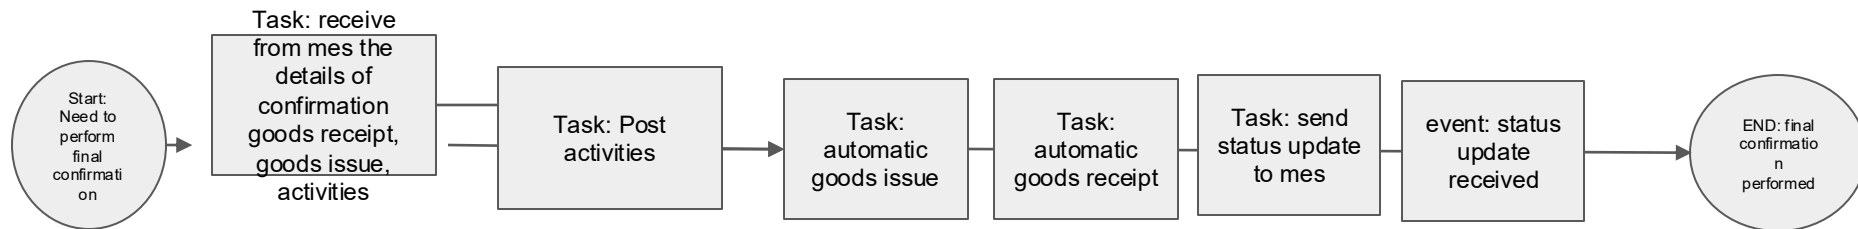

7.1 Produce/Loading/Packaging Product

7.1.7 Production receipt of bulk/Production receipt of packed product

M-100-040: Perform Final Confirmation

Role =

Confirm process order
Manage process orders

App name

Note: libra will send the process order and phase details (actual data)

Note: when EWM, process order confirmation does not generate a GR as the outbound delivery starts

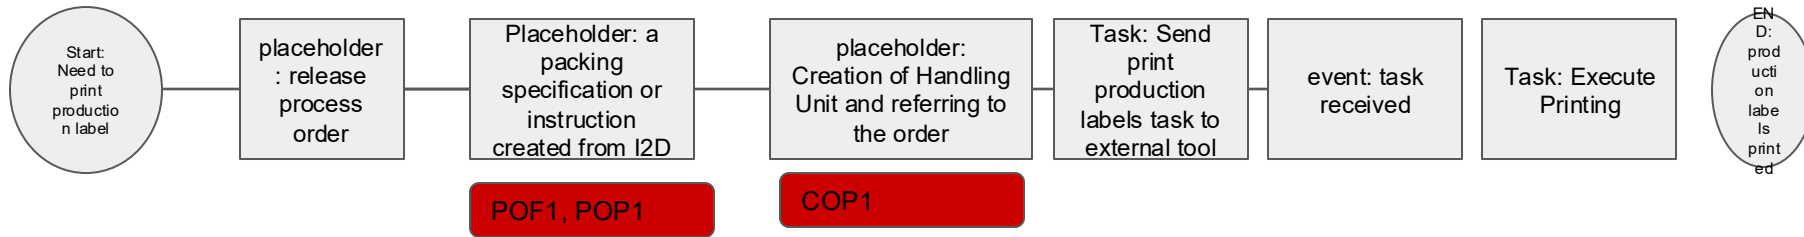

7.1 Produce/Loading/Packaging Product

7.1.8 Production Receipt of packed product

Done

M-100-080: Print Production Label

Role =

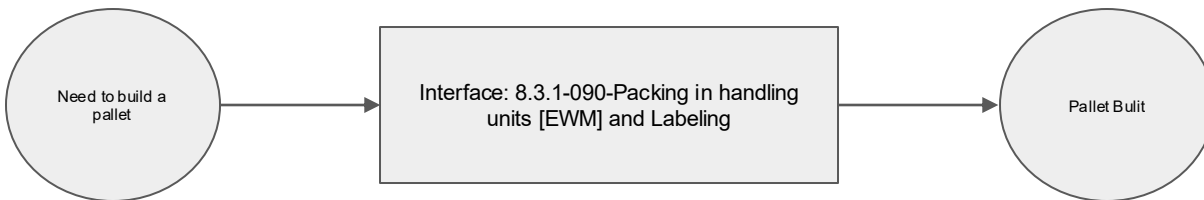

App name

Note: still under discussion
(lots of gaps)

Note: Check for the I2D process flows.

M-100-100: Build Pallet

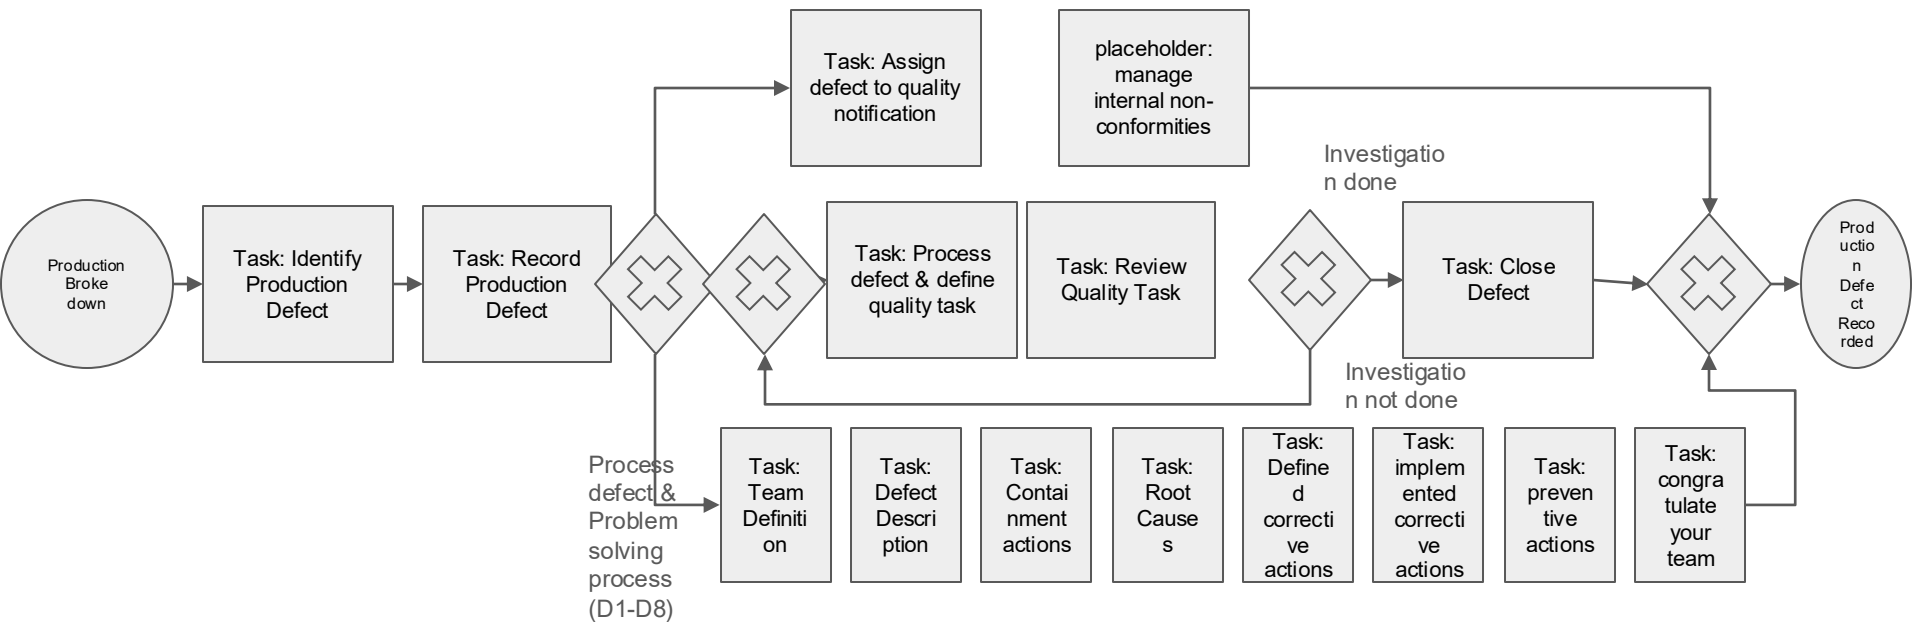

Role =

7.1 Produce/Loading/Packaging Product

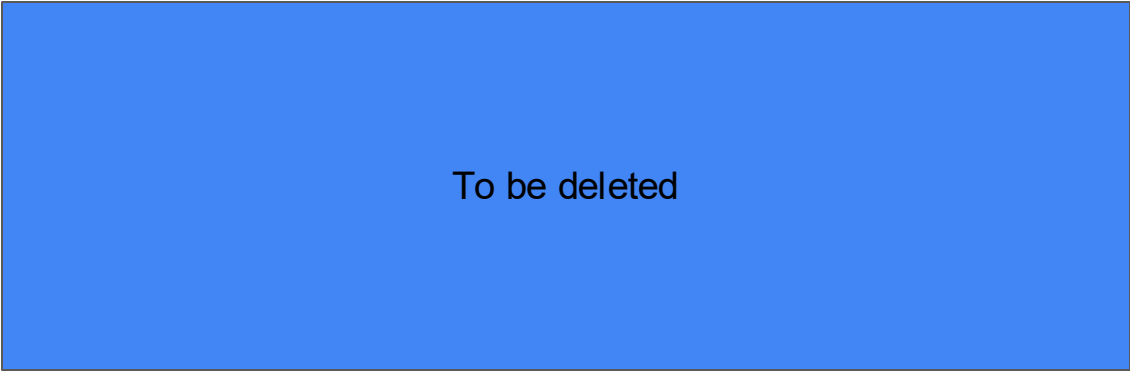

7.1.9 Defective Production Management

M-100-150: Identify and Manage Production Issues

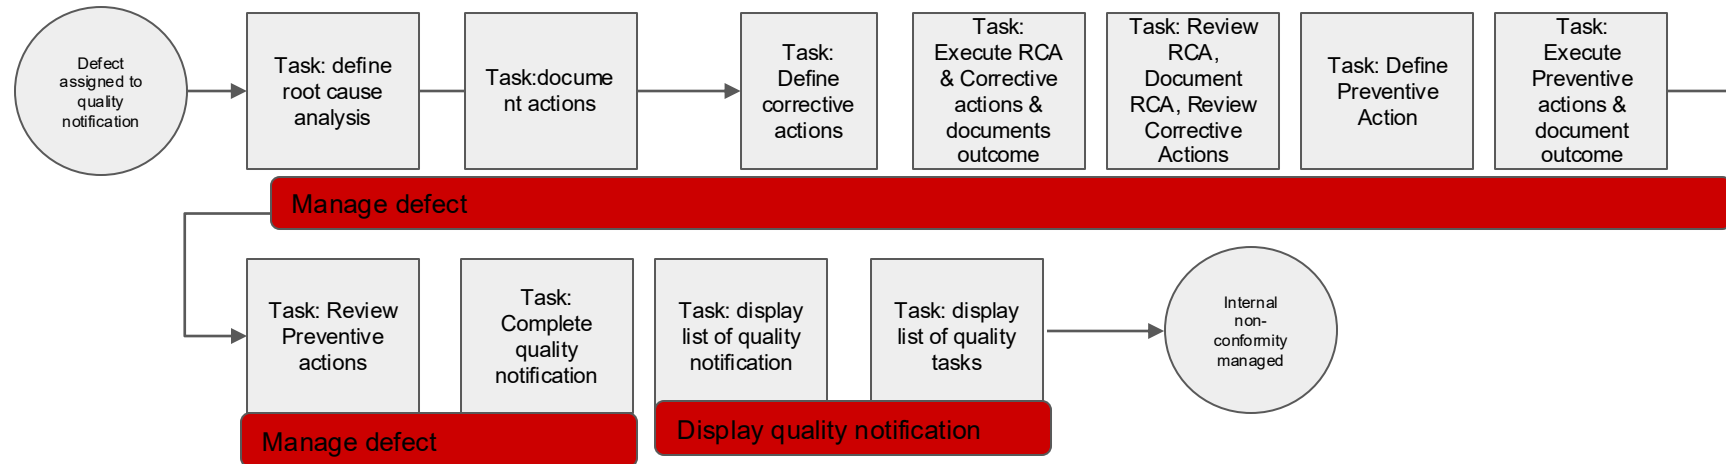

apps?

M-100-160: Identify Process Setting Change Requirements

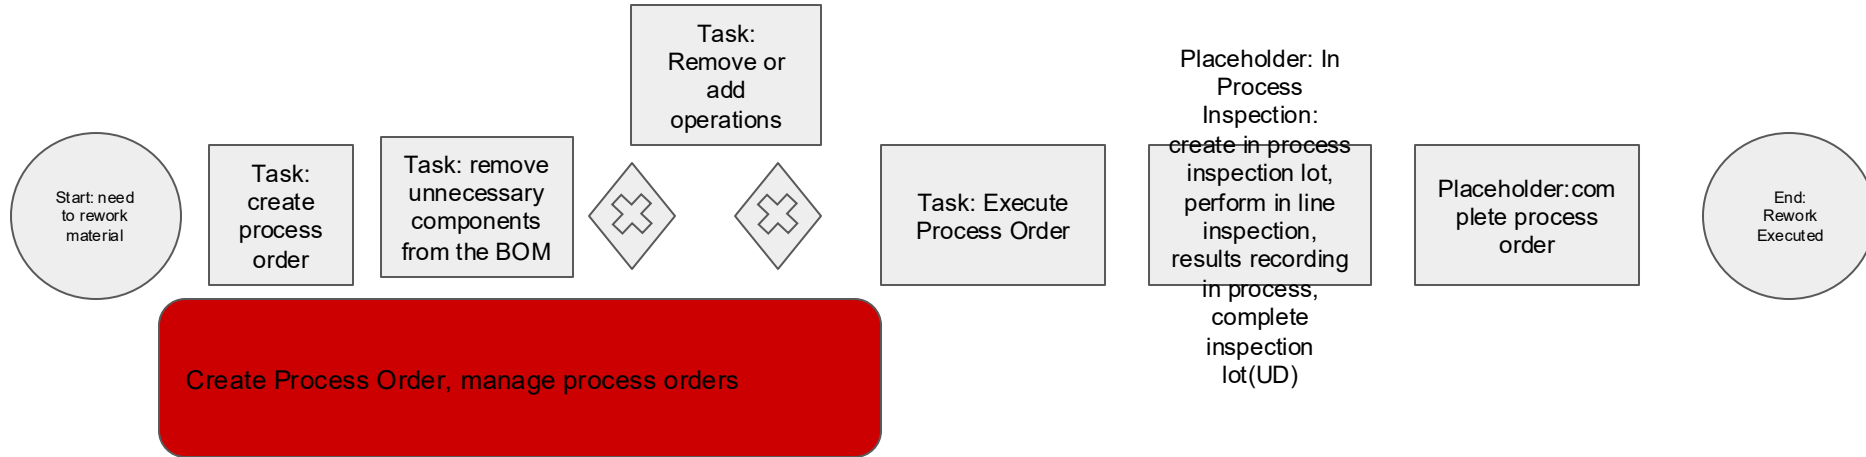

M-100-170: Manage Internal Non-Conformities

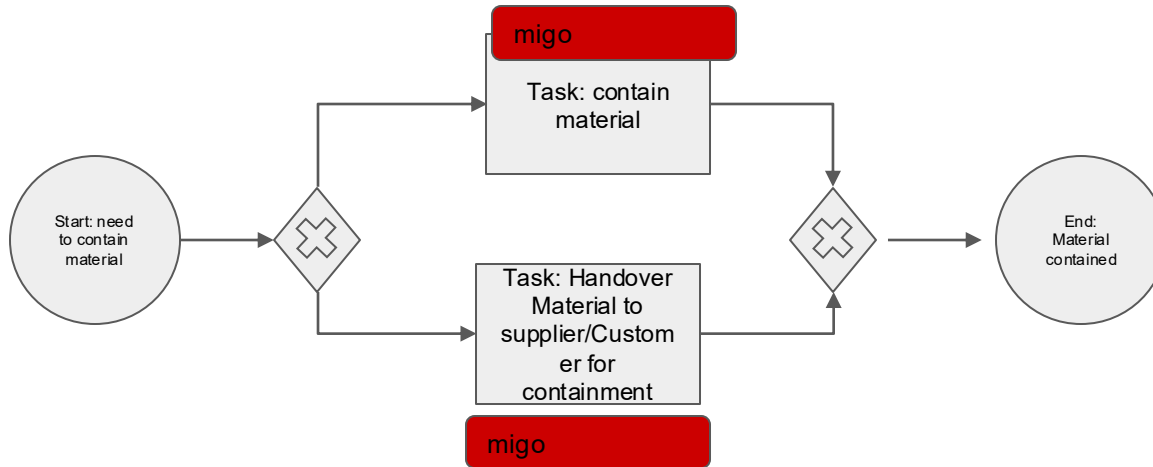

M-140-010: Contain as Off-spec Material for Future Processing

M-140-030: Rework Material

M-140-050: Contain Material

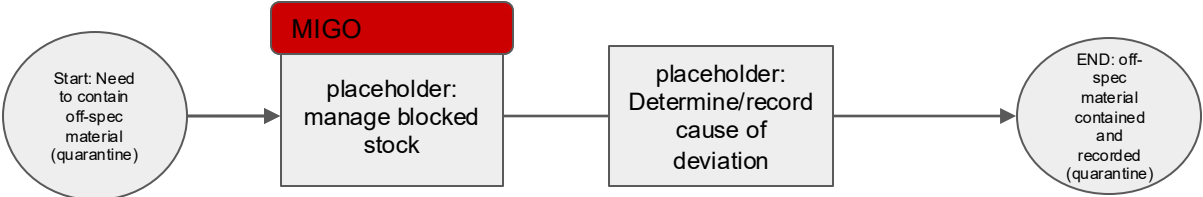

M-140-070: Post Batch to blocked stock

Role = Quality Planner

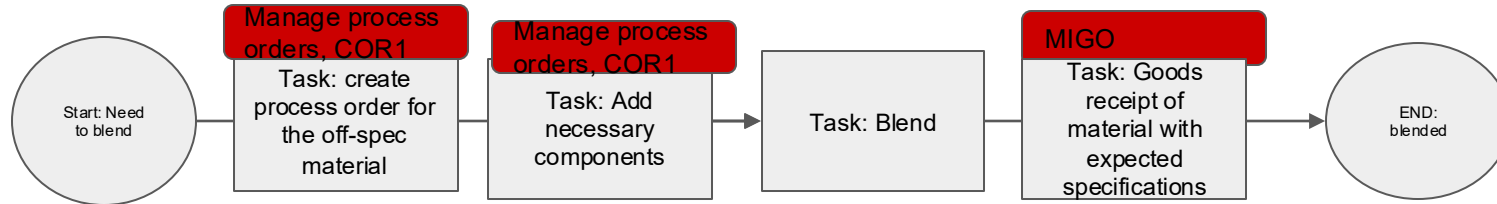

M-140-080: Contain as Off-Spec Material (Quarantine)

Role = Quality Planner

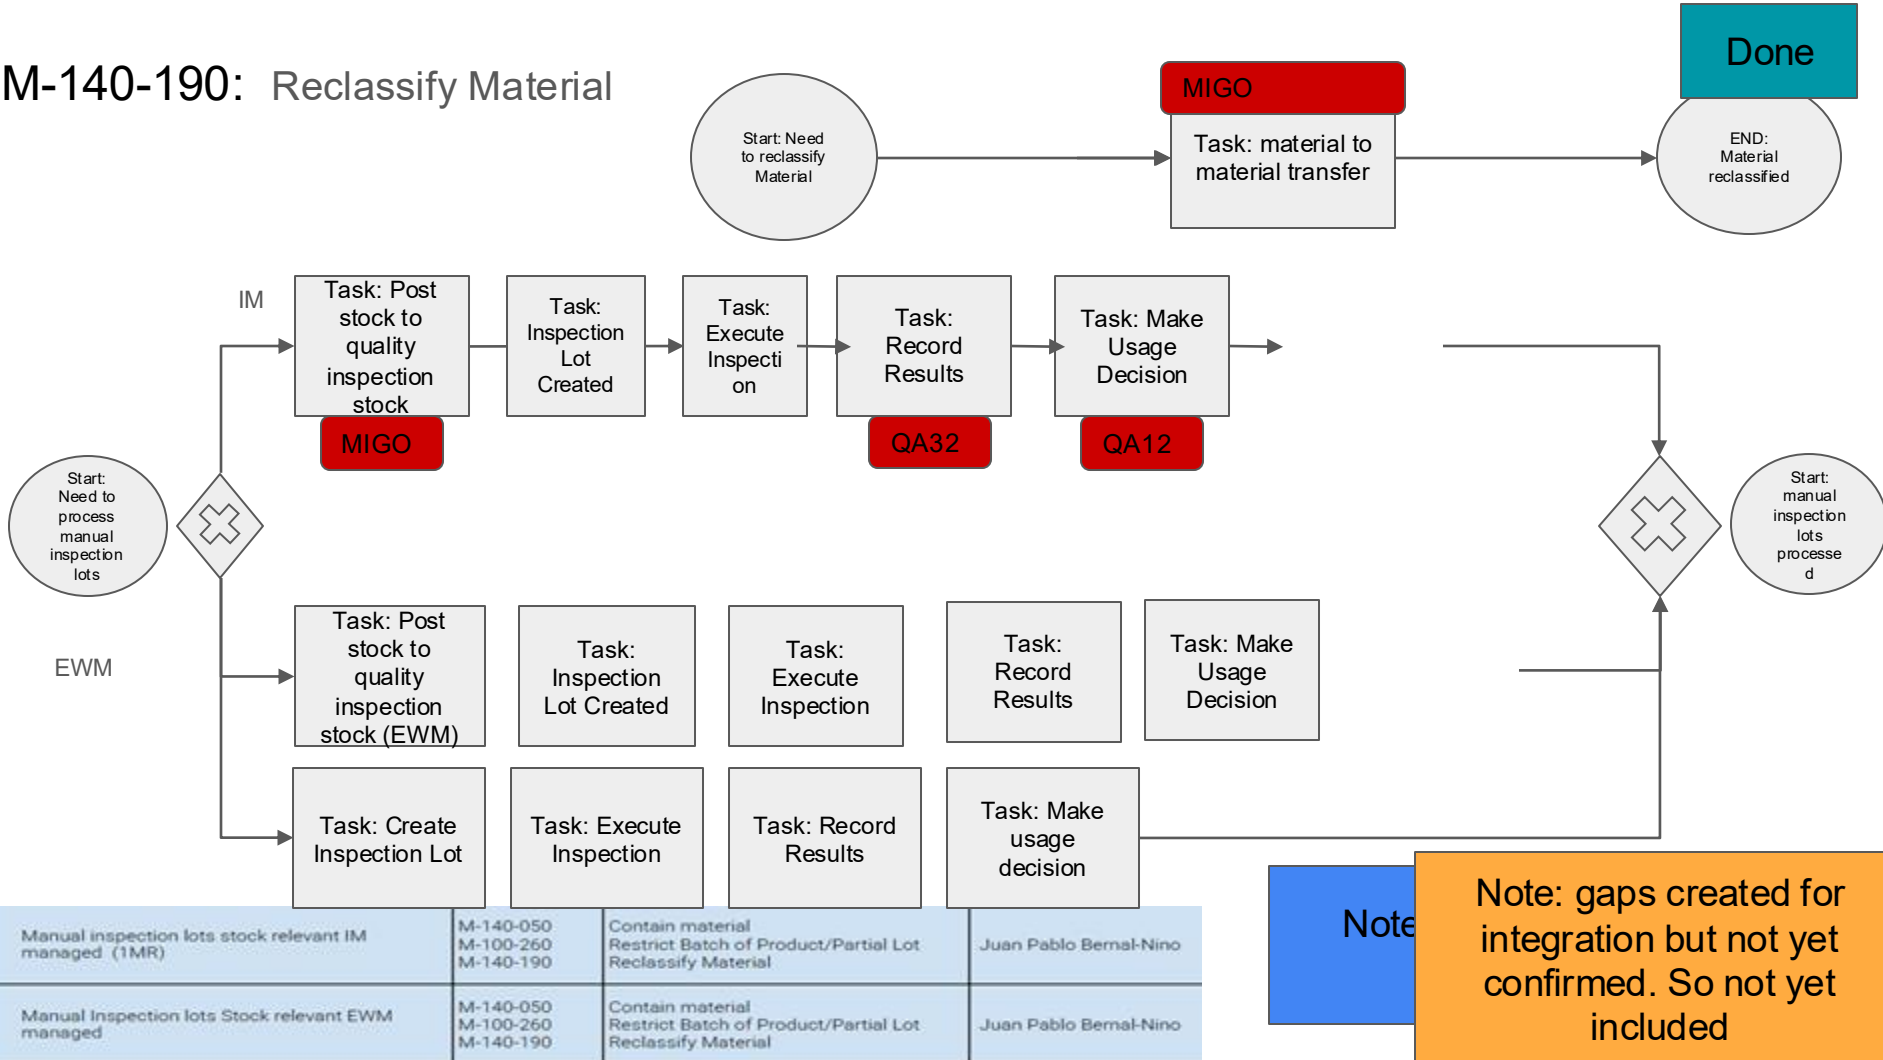

Note:
Raj will confirm for manage blocked stock

M-140-120: Blend

M-140-190: Reclassify Material

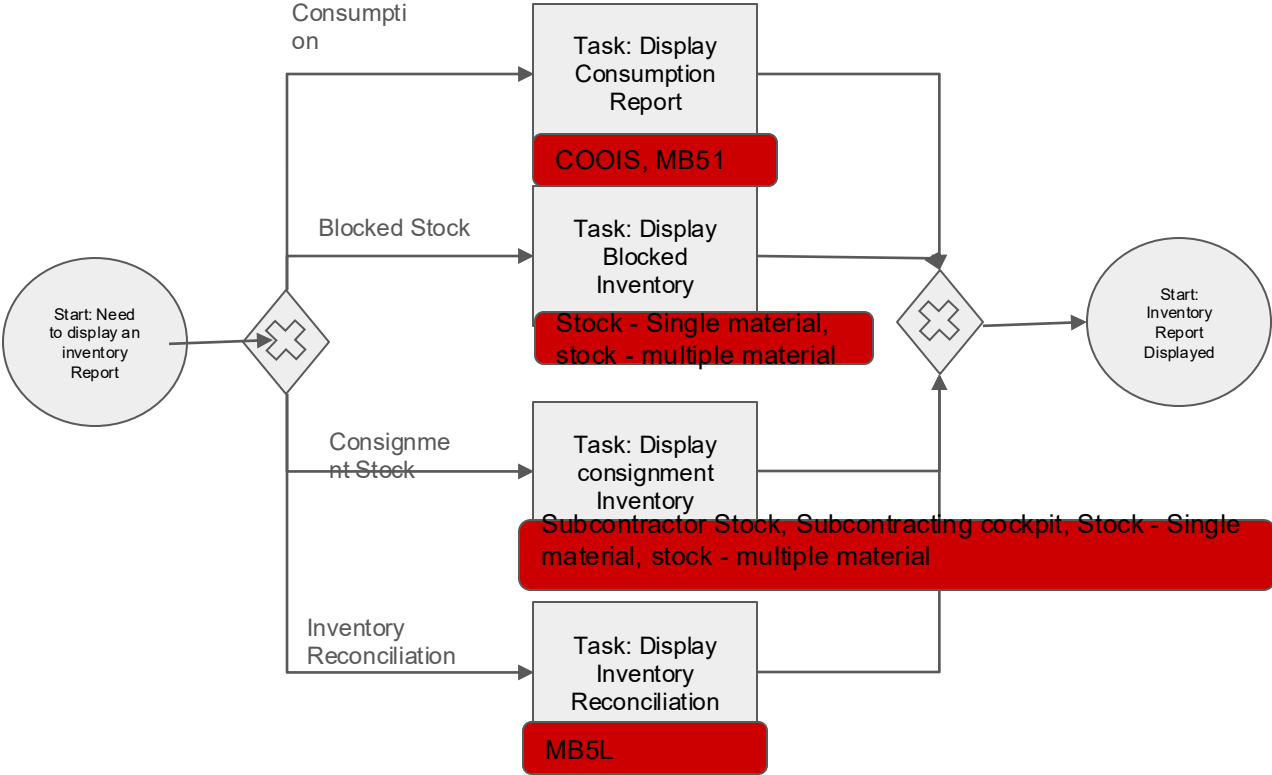

7.2 Assess production Performance

7.2.1 Monitor and optimize production process

M-170-010-Inventory Report

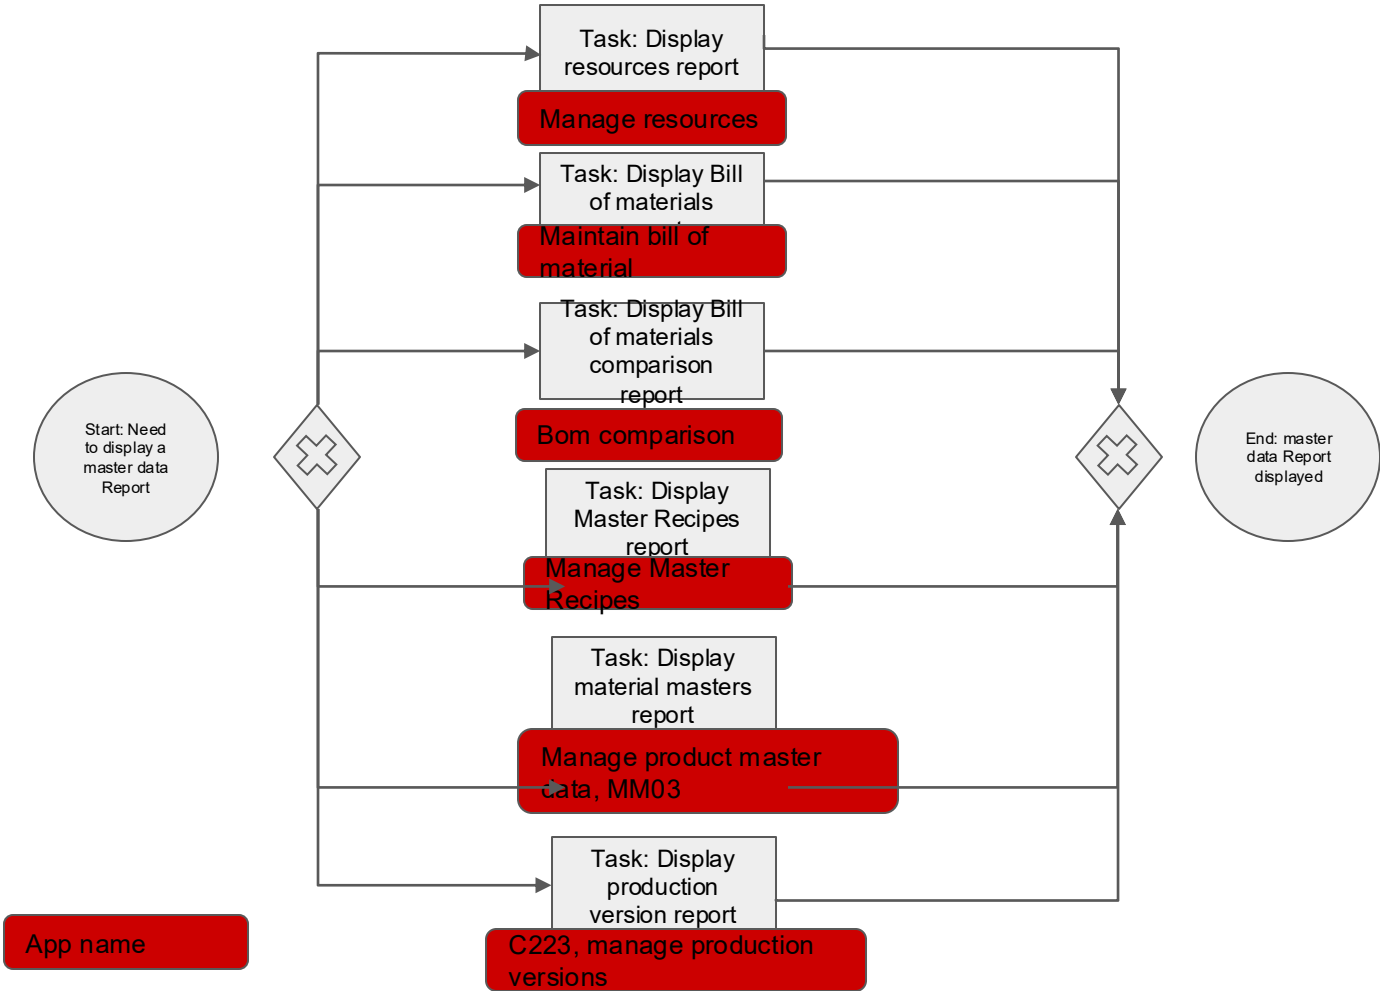

Done

App name

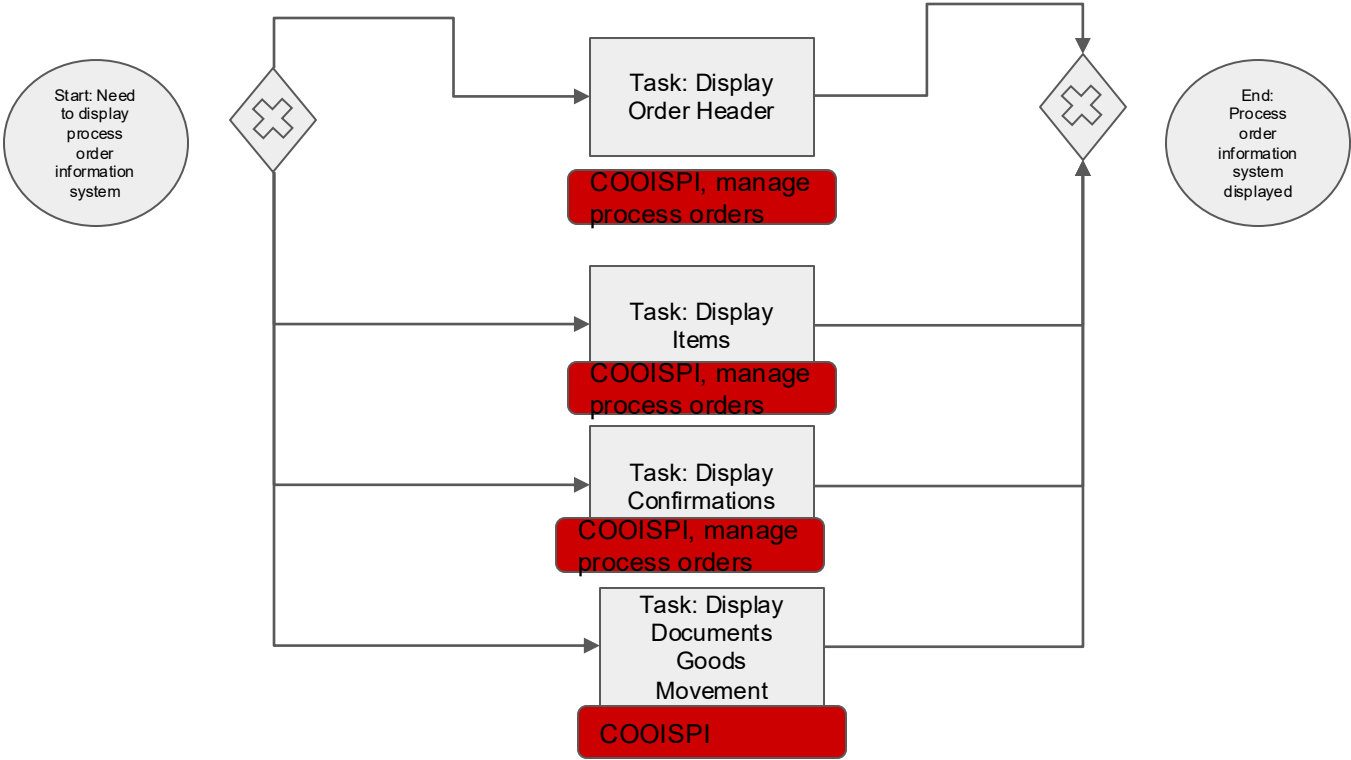

M-170-030-Master data report

Done

M-170-040-Process order information system

Done

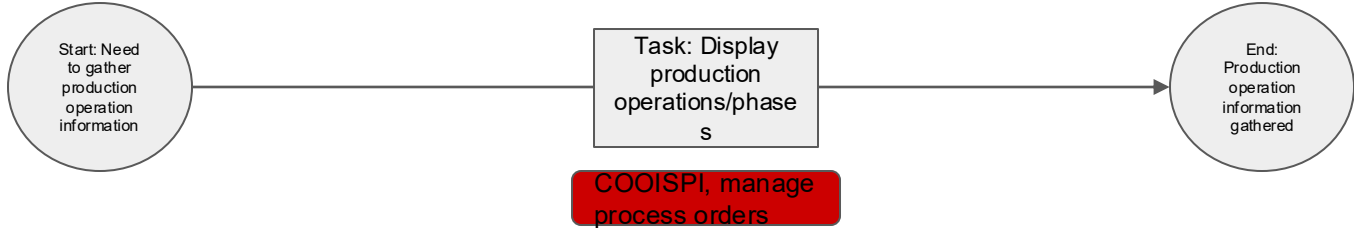

App name

M-170-050-Calculate Adherence to Schedule

Note: To be deleted

M-170-060-Gather Production Operation Information

Done

App name

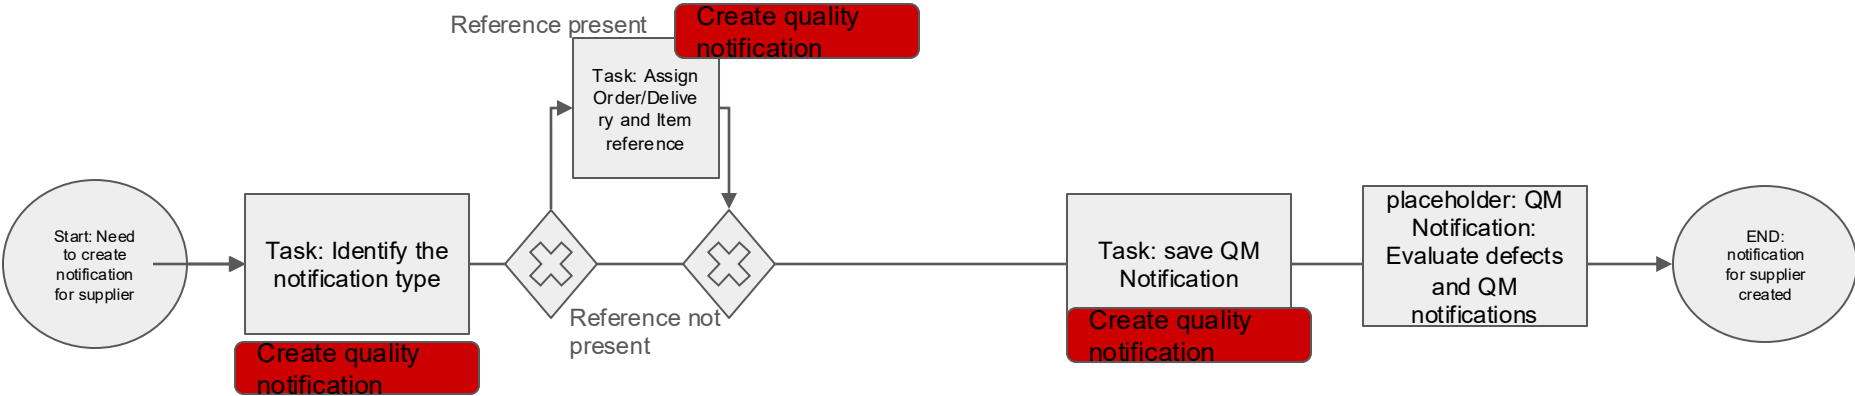

7.3 Develop and maintain the Quality Management System (QMS)

7.3.8 Quality management System review

QM Notification: Create QM Notification to Supplier

Role = Quality Planner

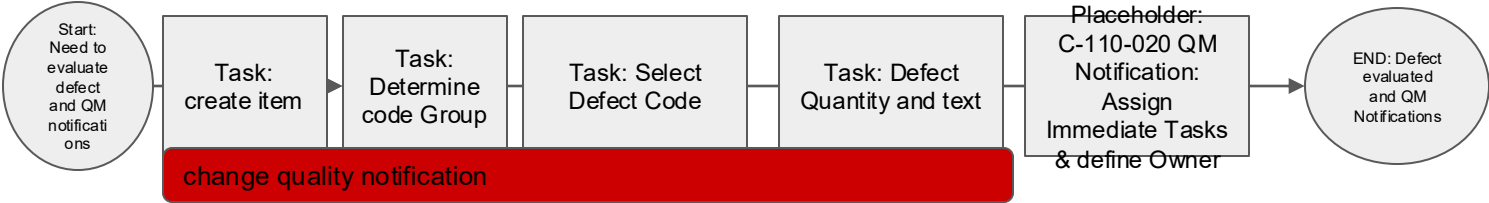

Done

QM Notification: Evaluate defects and QM notifications

Role = Quality Planner

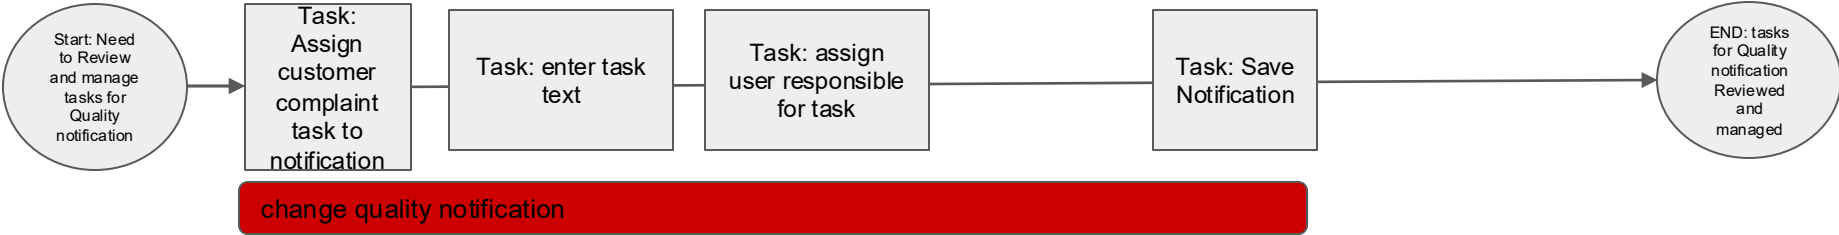

Done

QM Notification: Assign Immediate Tasks & define Owner

Role = Quality Planner

Done

C-110-040 Save Notification

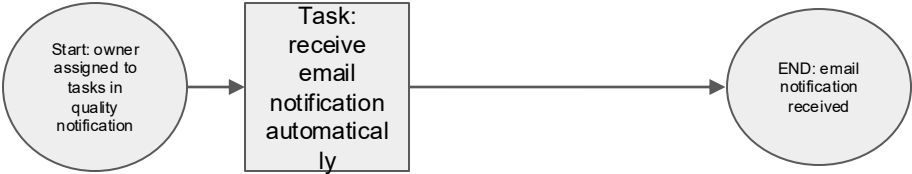

Role = Quality Planner

Deleted

QM Notification: Manage Email/Workflow to the Responsible

Role = Quality Planner

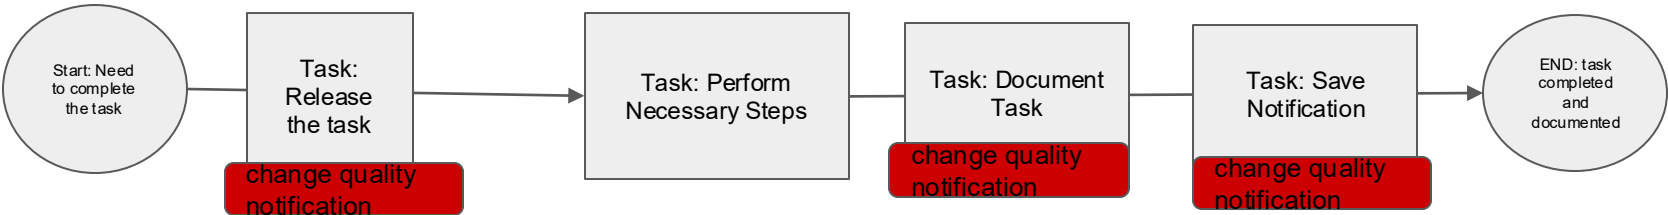

Done

QM Notification: Complete and document Tasks

Role = Quality Planner

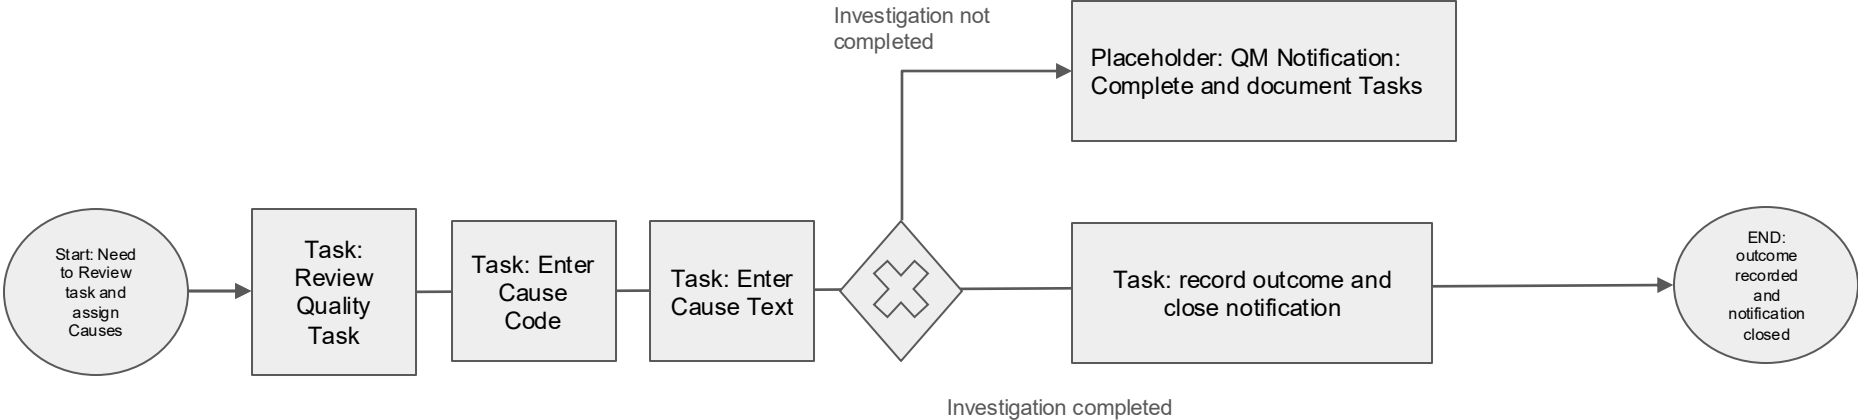

Done

QM Notificaton: Review tasks Completion, Assign the Causes and Close the NC

Done

Role = Quality Planner

C-110-080 Trigger Workflow

Role = Quality Planner

Deleted

M-140-090-Determine/record cause of deviation

Role = Quality Planner

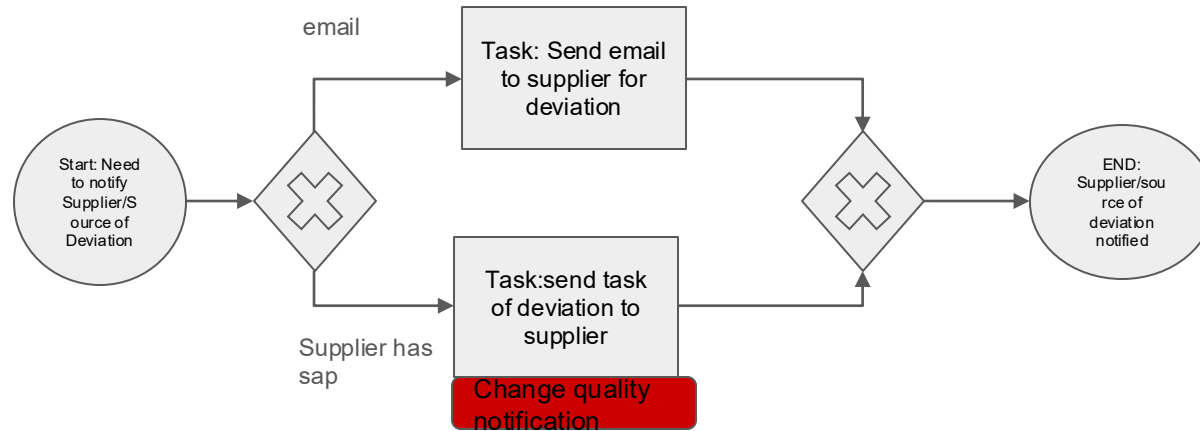

M-140-150-Determine Best Alternative for Use of Off-spec Material

Role = Quality Planner

To be Deleted

M-140-160: Notify Supplier/Source of Deviation

Role = Quality Planner

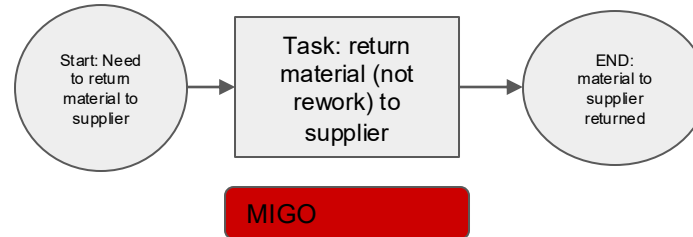

M-140-170: Notify different functions of Deviation/Non conformity

Role = Quality Planner

Note: To be deleted because same as M-140-160: notify supplier/source of deviation

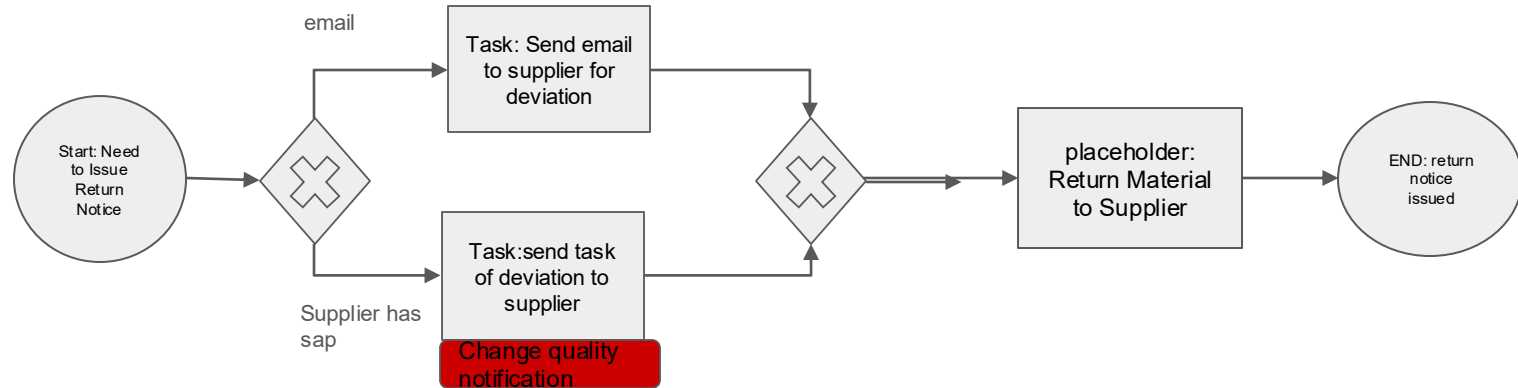

M-140-200: Return Material to Supplier

Role = Quality Planner

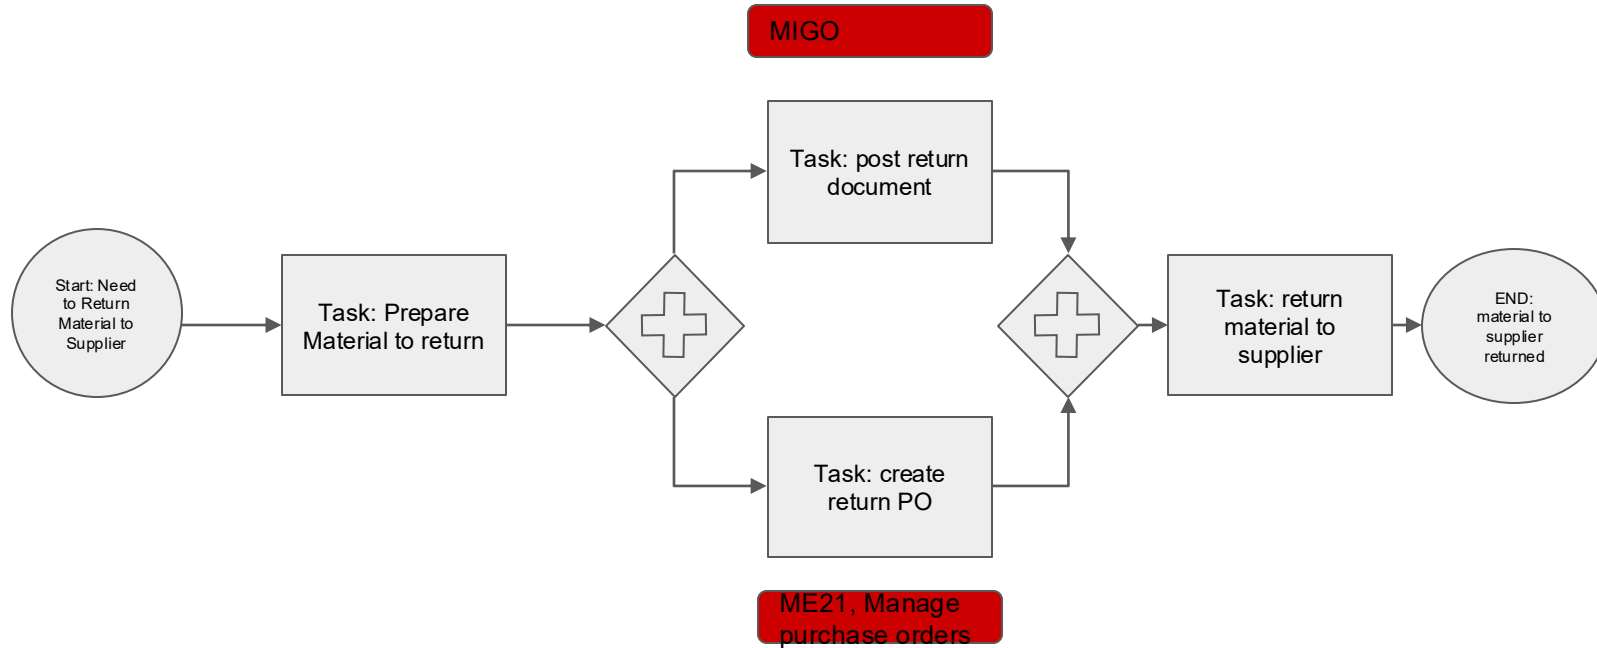

P-140-020: Issue Return Notice (for Rework)

Role = Quality Planner

P-140-030: Return Material to Supplier (for rework)

Role = Quality Planner

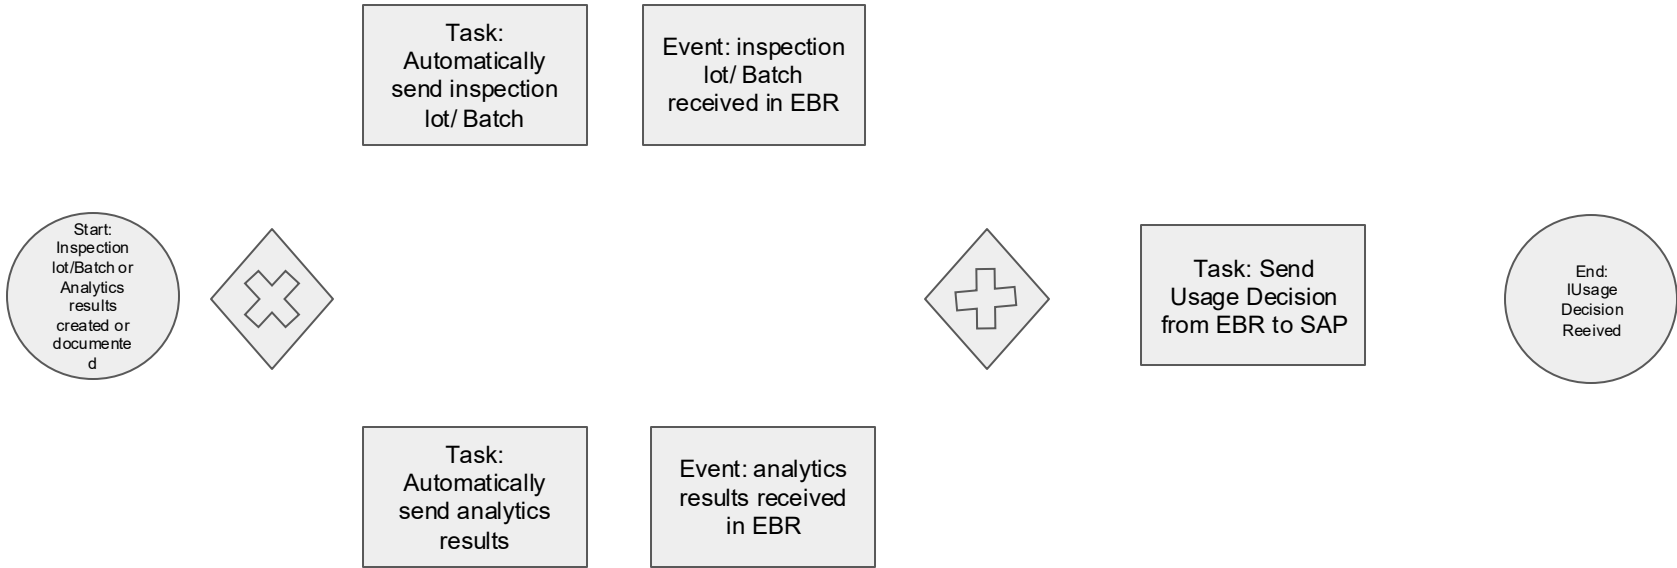

7.4 Monitor quality of finished products, raw materials and intermediate products

7.4.10 Release Products

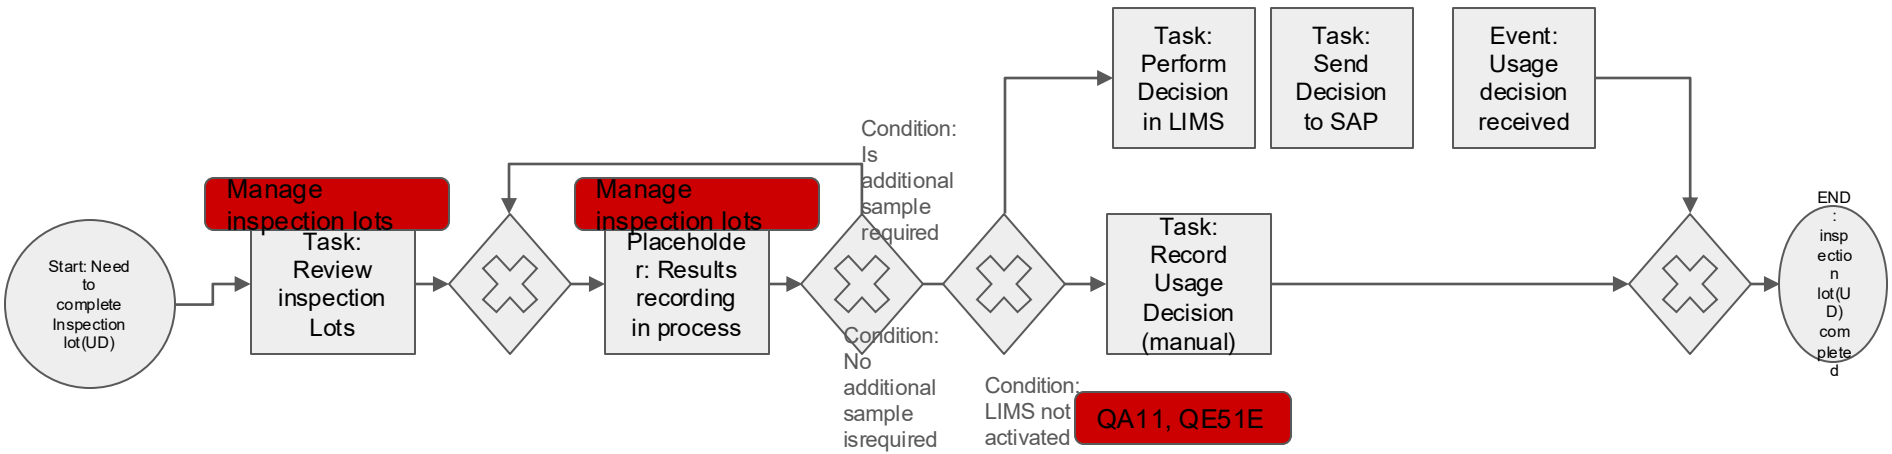

Electronic Batch Record Release

Done

M-130-020: Complete Inspection Lot(UD) in Process

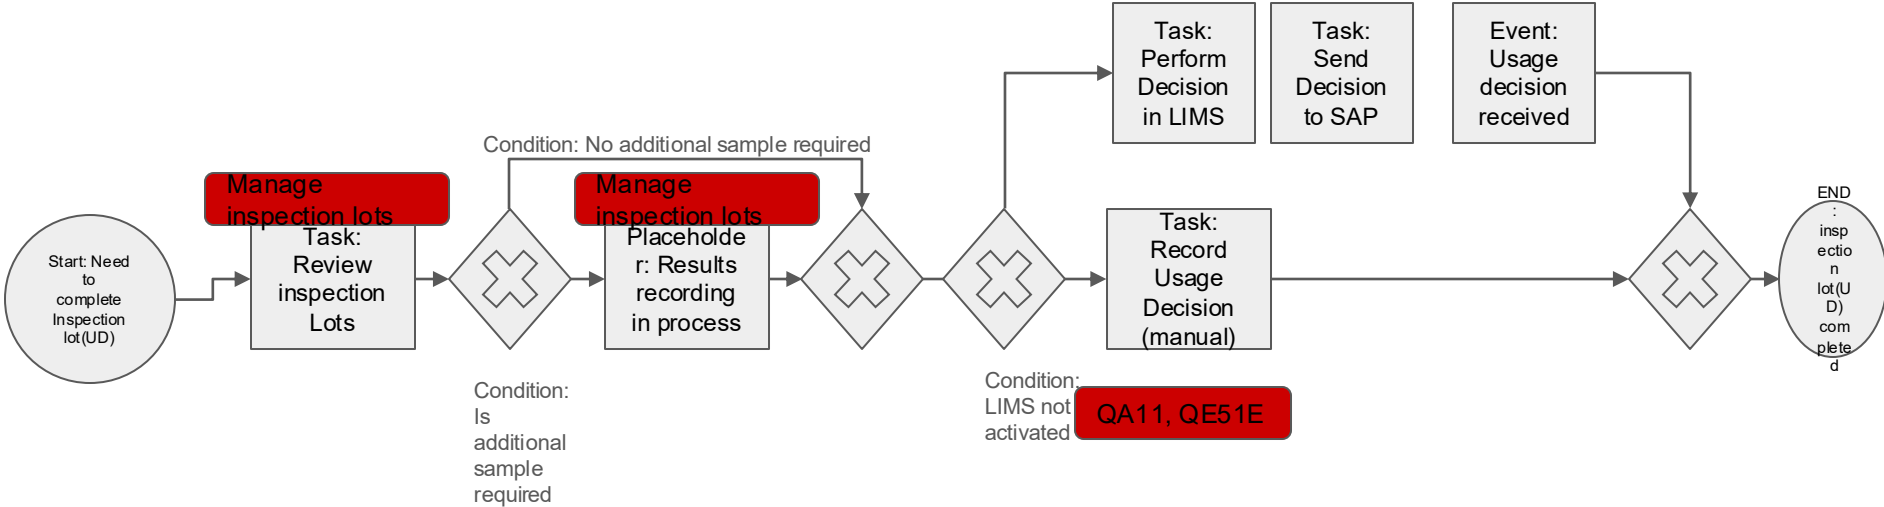

Role = Quality Planner

Done

M-130-020: Complete Inspection Lot(UD) after production

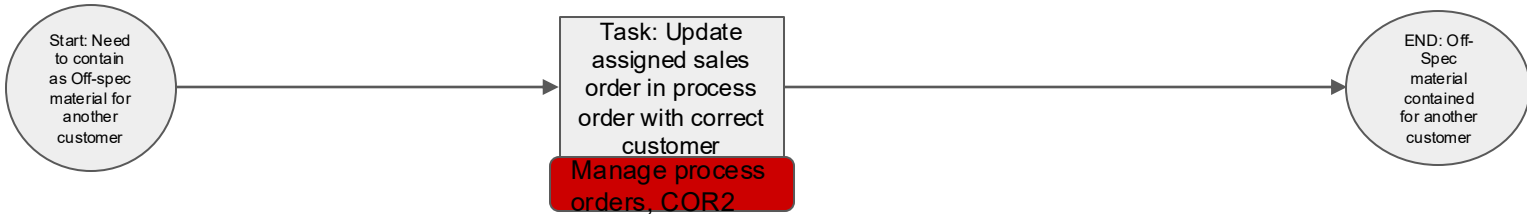

Role =

App name

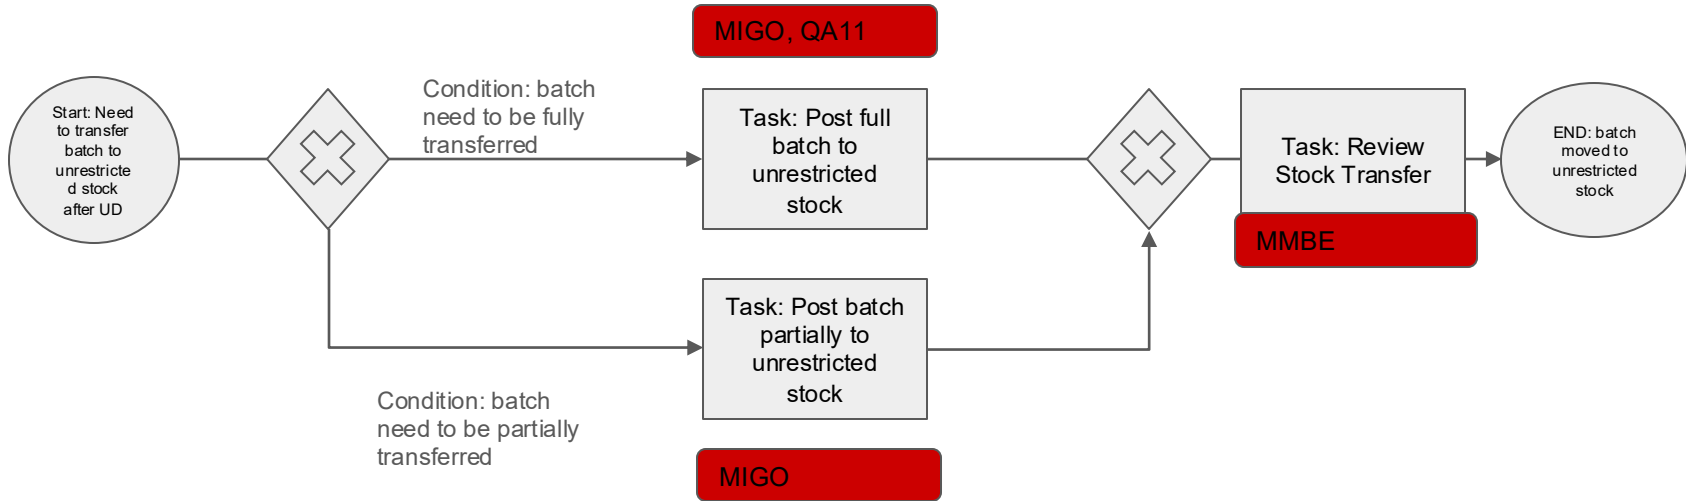

M-140-020: Contain as Off-Spec Material for Another Customer

Role = Quality Engineer

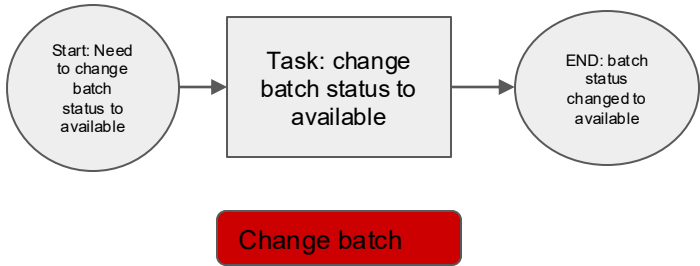

M-140-040: Post batch to unrestricted stock

Role = Quality Engineer

M-140-140: Change batch status to available

Role = Quality Engineer

To be double checked.

7.4 Monitor quality of finished products, raw materials and intermediate products

7.4.3 Maintain production /batch records and manage lot traceability

Done

L-110-010: Establish batch level

Role = Master Data Specialist - Product Data

Note: Deleted

App Name

Done

L-110-020: Establish batch status management

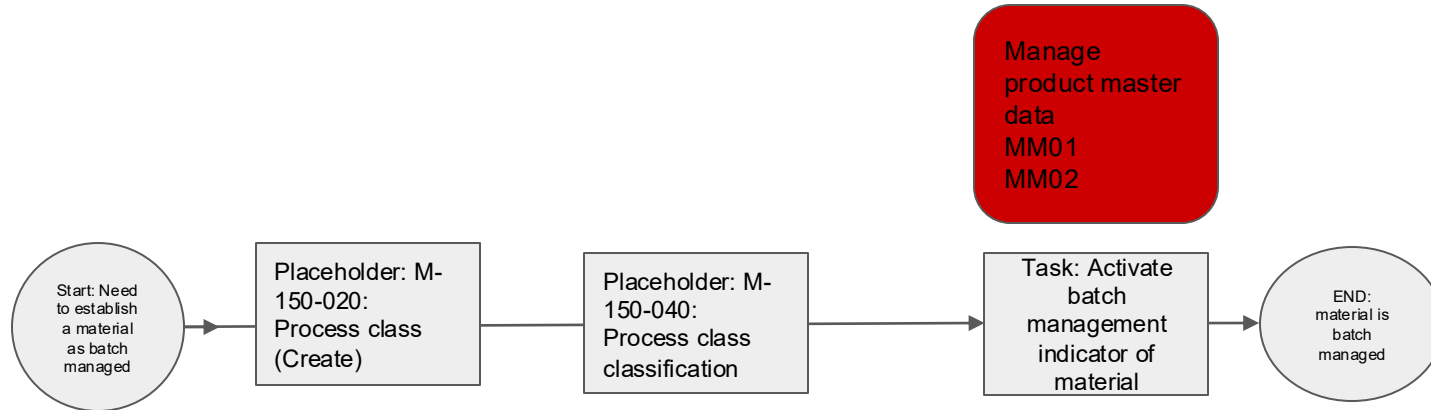

Role = Master Data Specialist - Product Data

Note: Deleted, part of establish material as batch management

App name

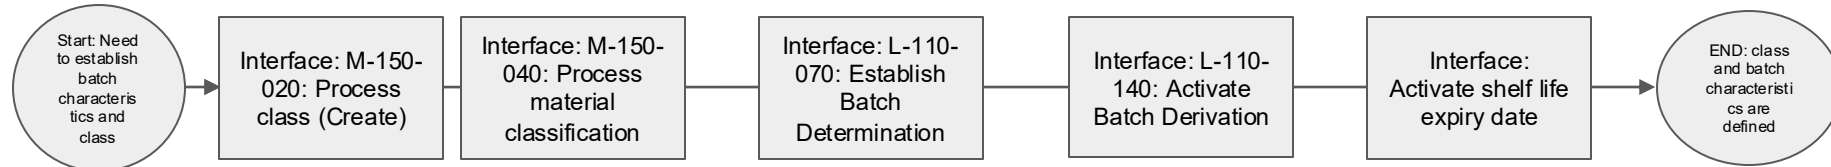

L-110-030: Establish material as batch managed

Role = Master Data Specialist - Product Data

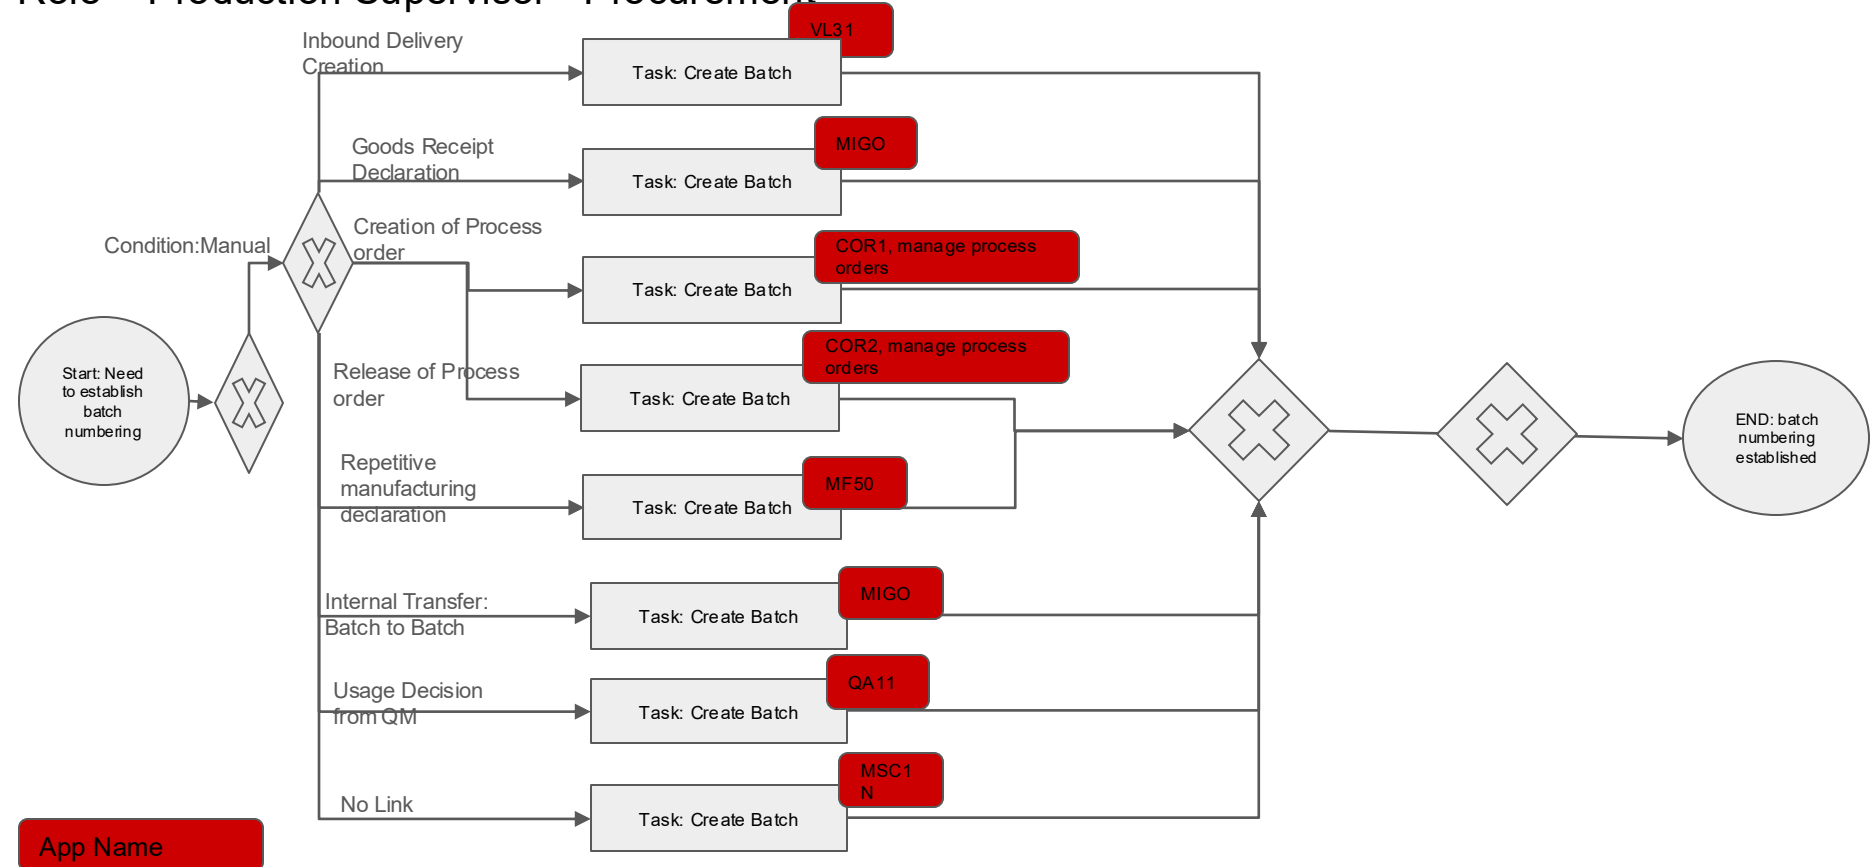

L-110-040: Define batch Management Data

Role = Master Data Specialist - Product Data

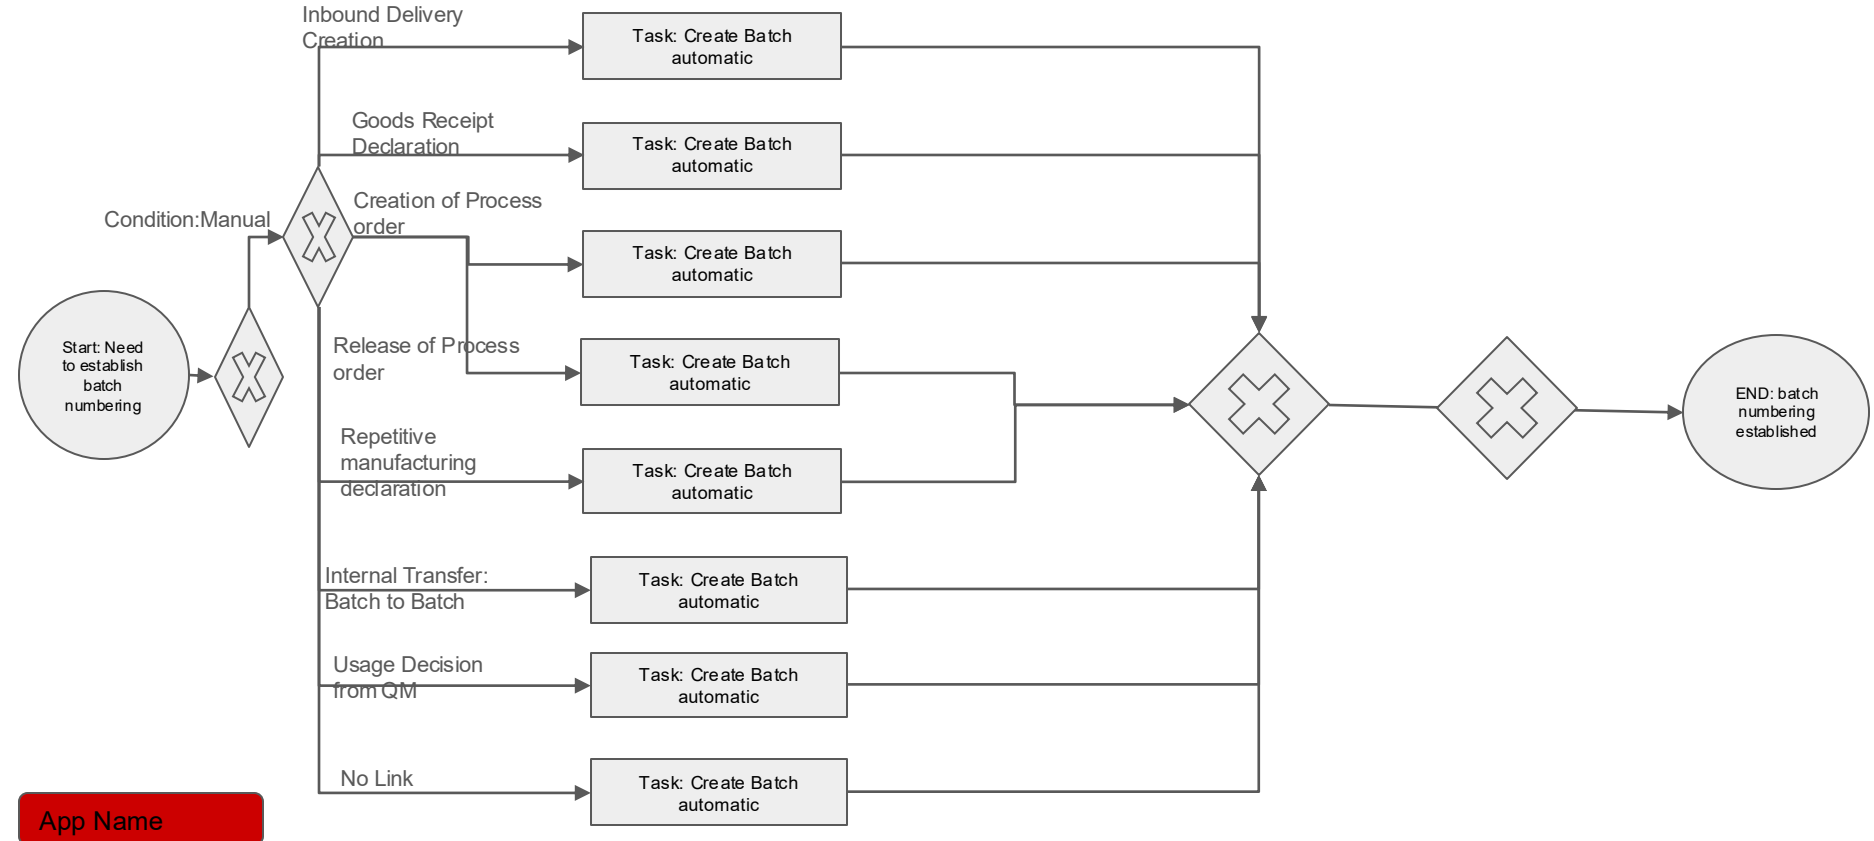

L-110-050: Establish batch numbering (1/2)

Role = Production Supervisor - Procurement

L-110-050: Establish batch numbering (2/2)

Role = Production Supervisor - Procurement

Done

L-110-060: Establish produced batch

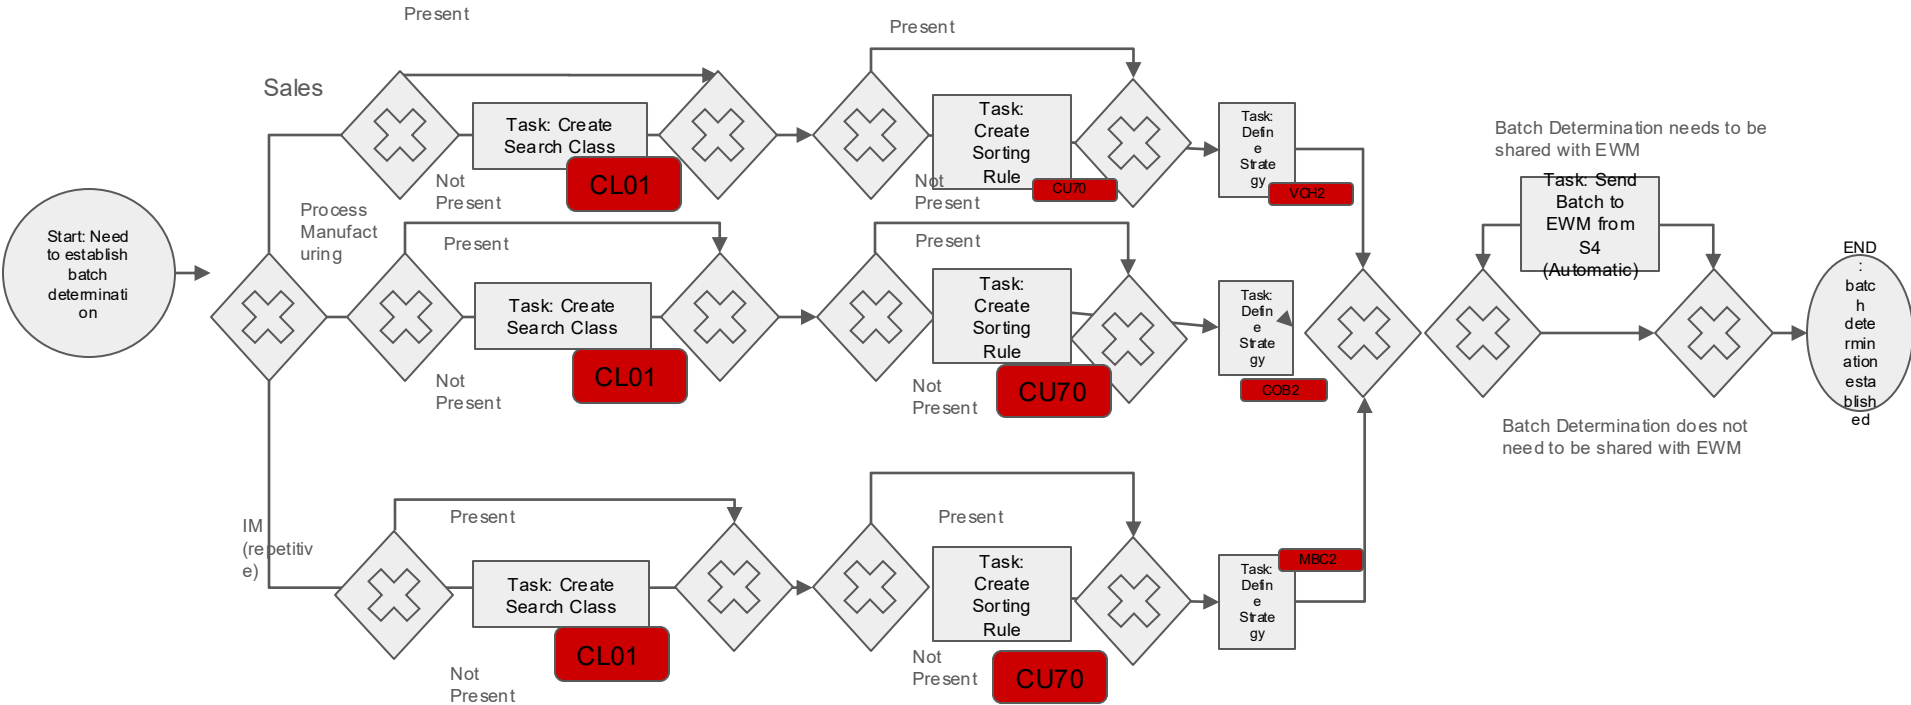

Role = Production Engineering - Process Manufacturing

Note: To be deleted because part of establish batch numbering

App Name

L-110-070: Establish batch determination

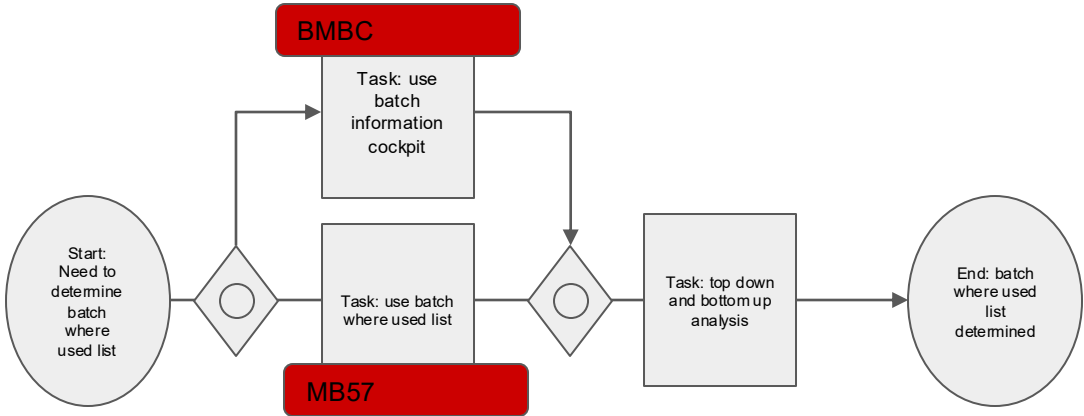

Role = Production Engineering - Process Manufacturing

L-110-080-Determine Batch Where Used List

Role = Master Data Specialist - Product Data

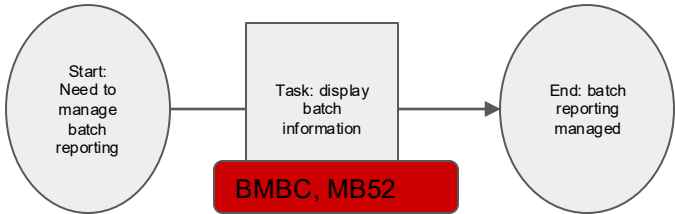

Done

L-110-110-Manage Batch Reporting

Role = Master Data Specialist - Product Data

Done

App Name

Done

L-110-120: Establish Procured batch

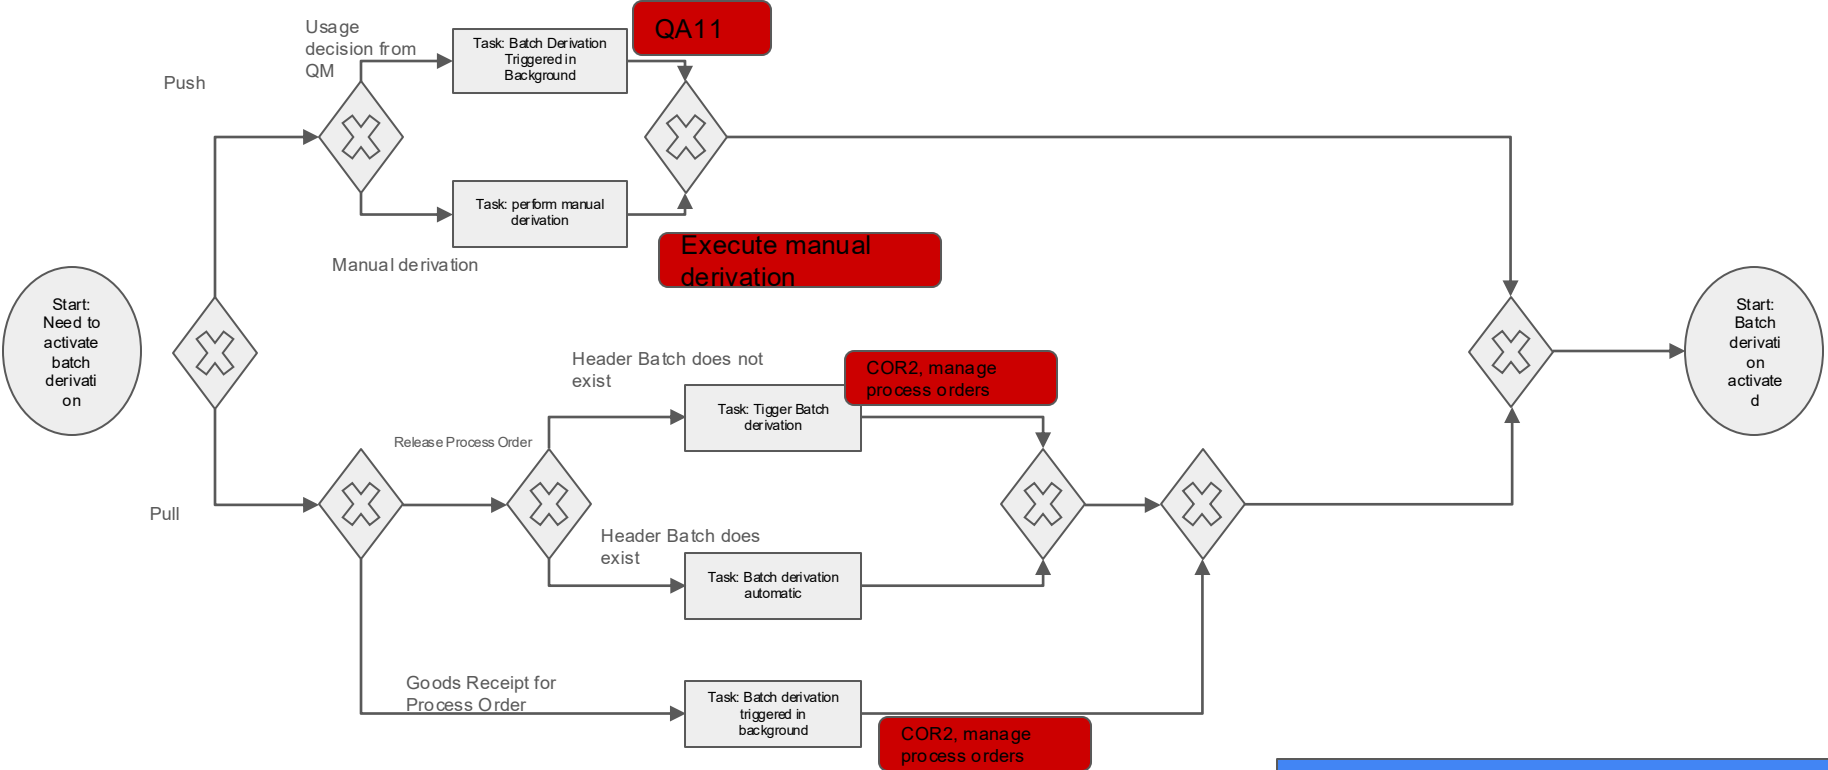

Role = Production Engineering - Process Manufacturing

Note: To be deleted because part of establish batch numbering

App Name

L-110-140: Activate Batch Derivation

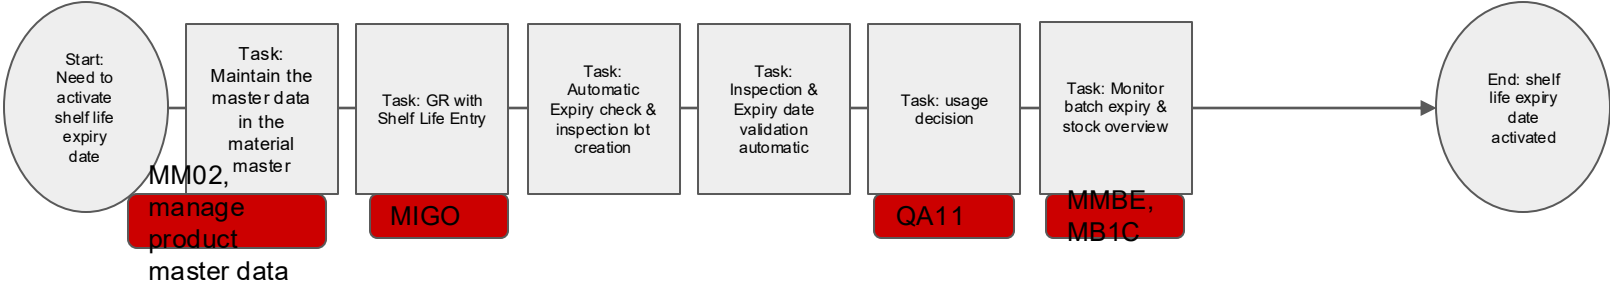

Role = Production Engineering - Process Manufacturing

7.4 Monitor quality of finished products, raw materials and intermediate products

7.4.5 Recurring Inspections

Note: where to put the recurring inspection flow?

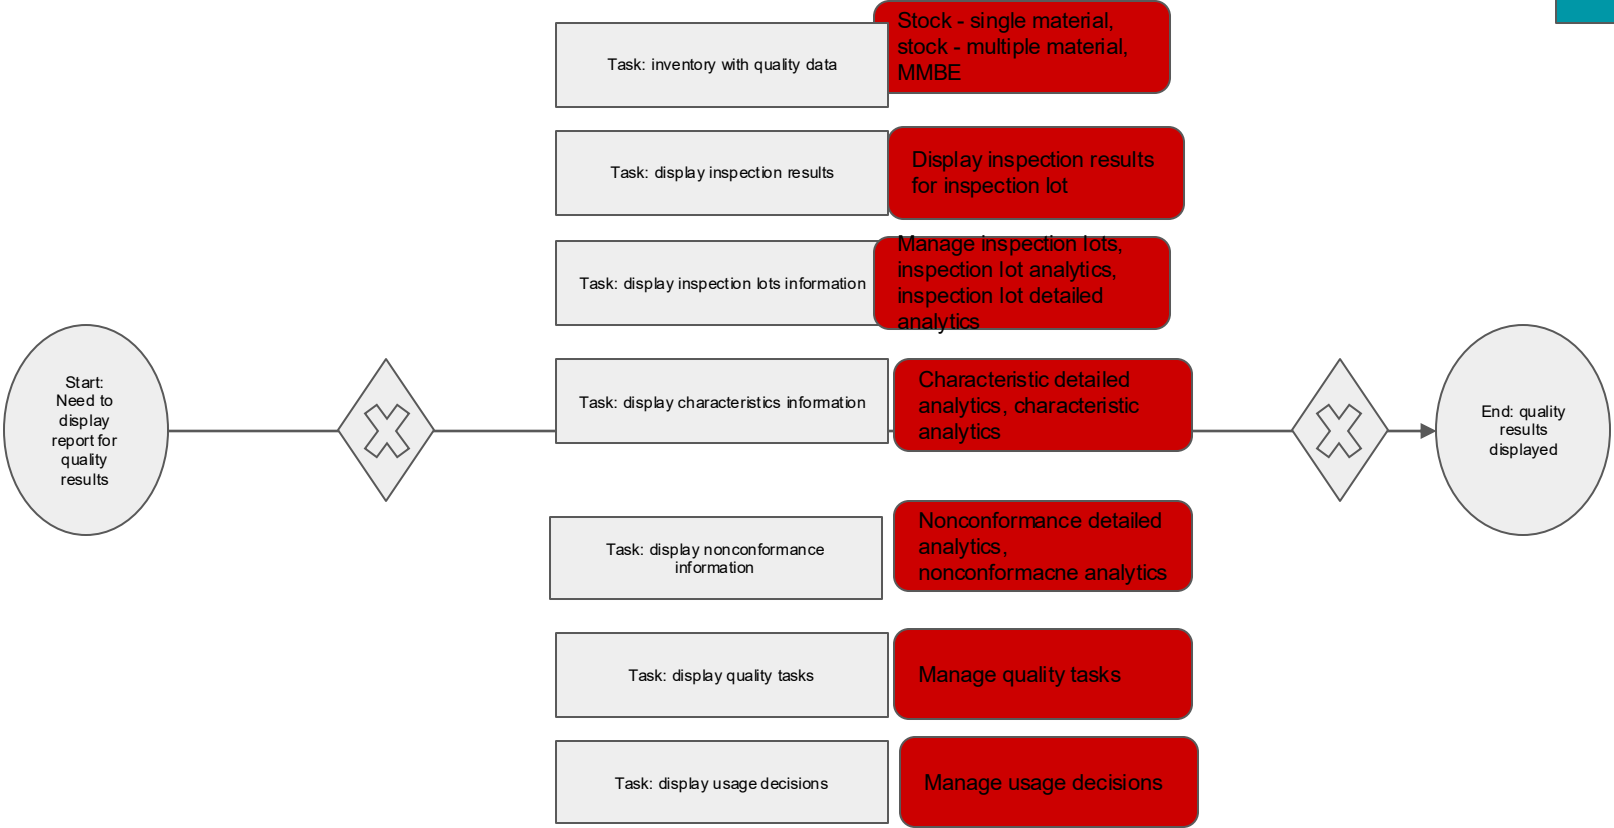

7.4 Monitor quality of finished products, raw materials and intermediate products

7.4.6 Reports

M-170-020-Report for Quality results

Done

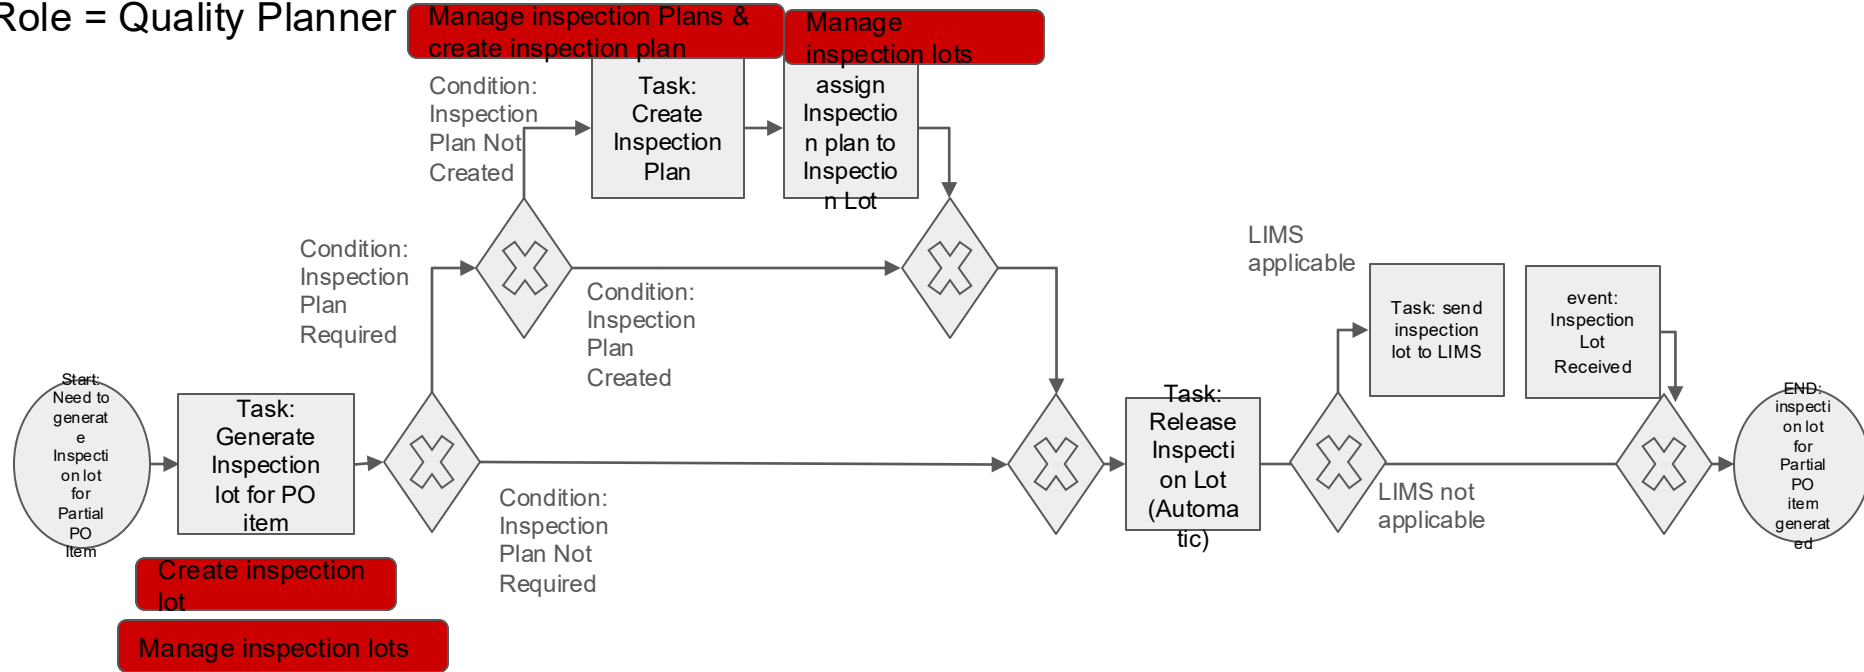

7.4 Monitor quality of finished products, raw materials and intermediate products

7.4.7 Quality Control of Raw Materials

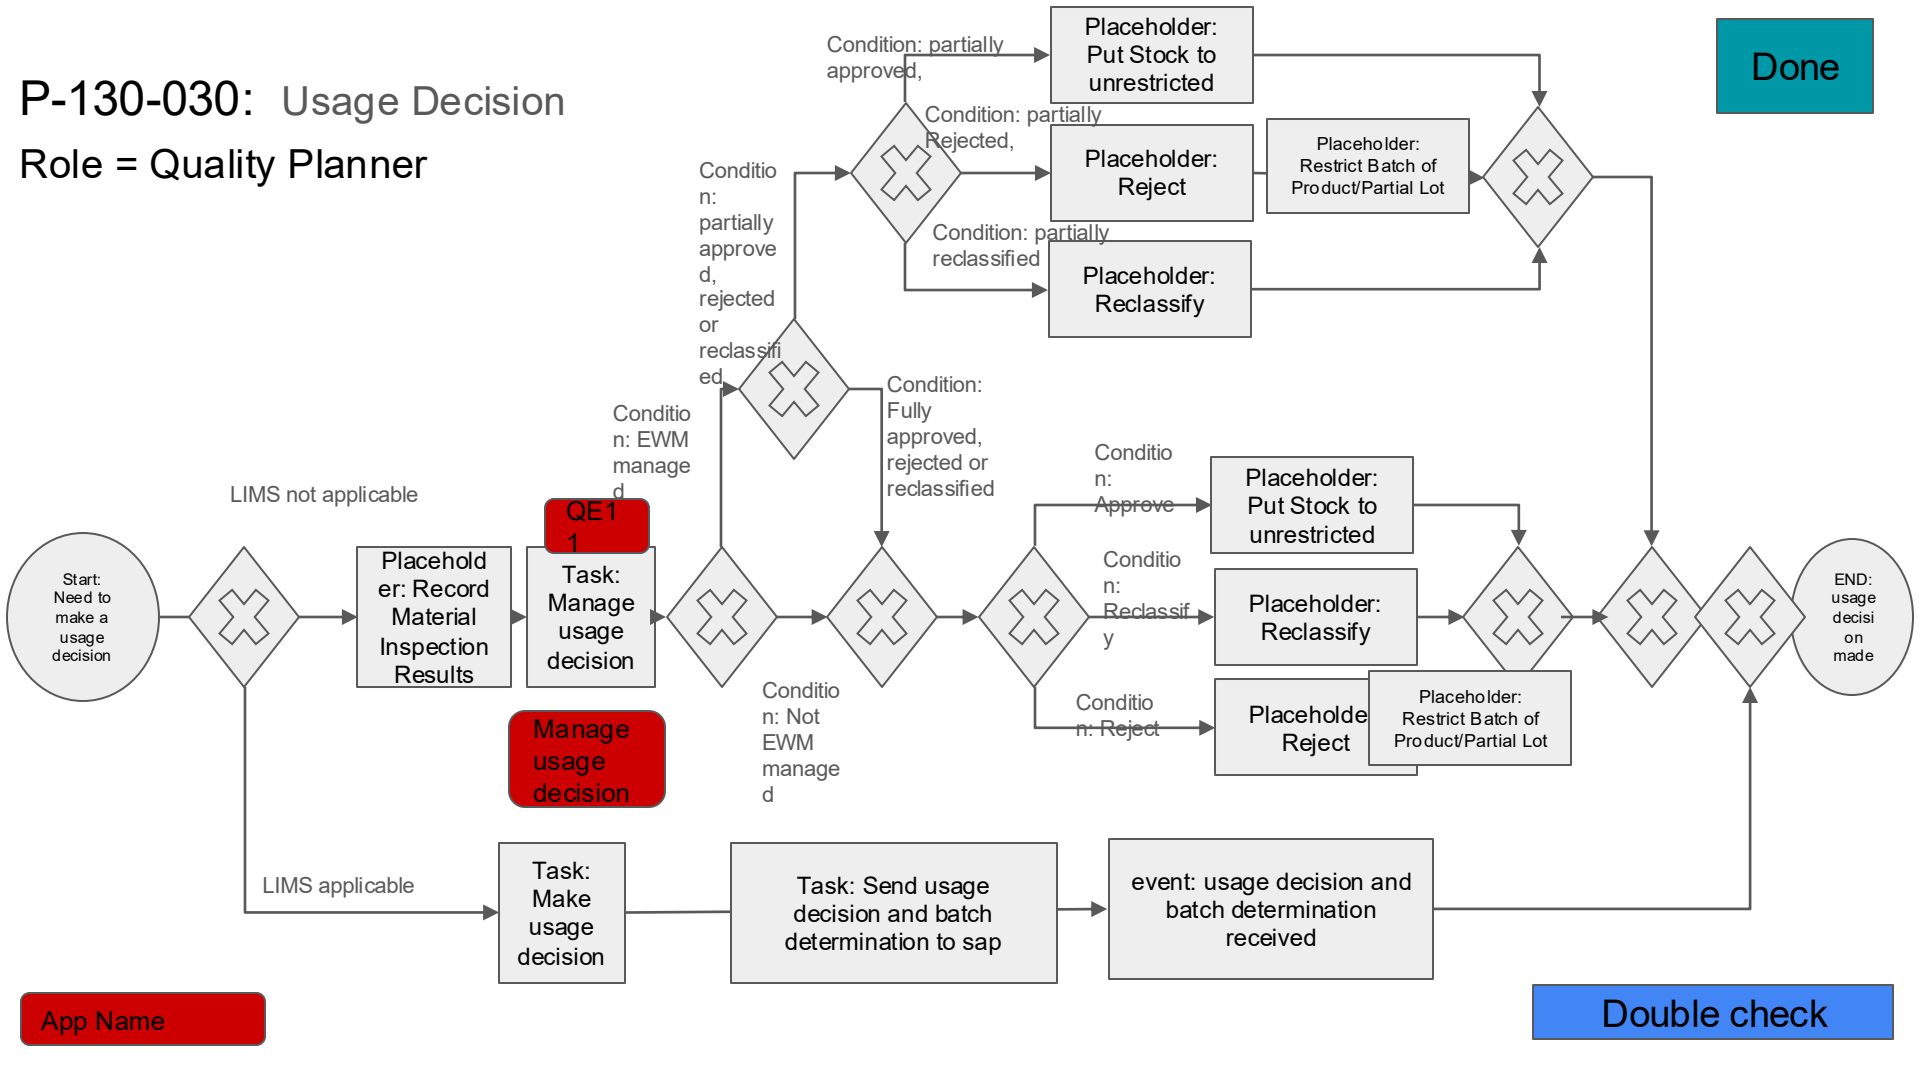

P-130-010: Generate Inspection lot for Partial PO Item

Role = Quality Planner

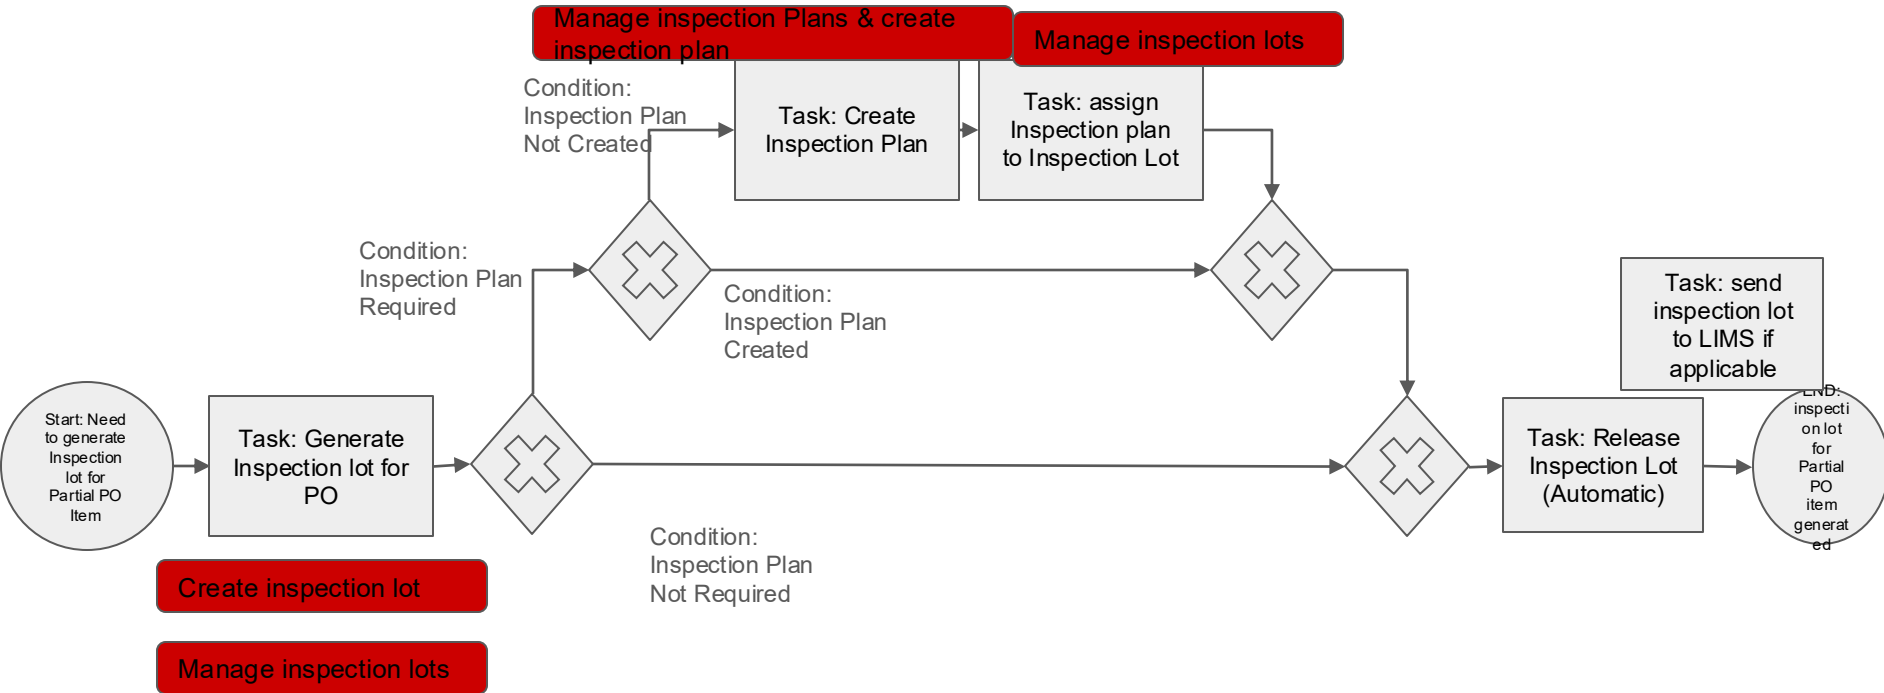

P-130-030: Usage Decision

Role = Quality Planner

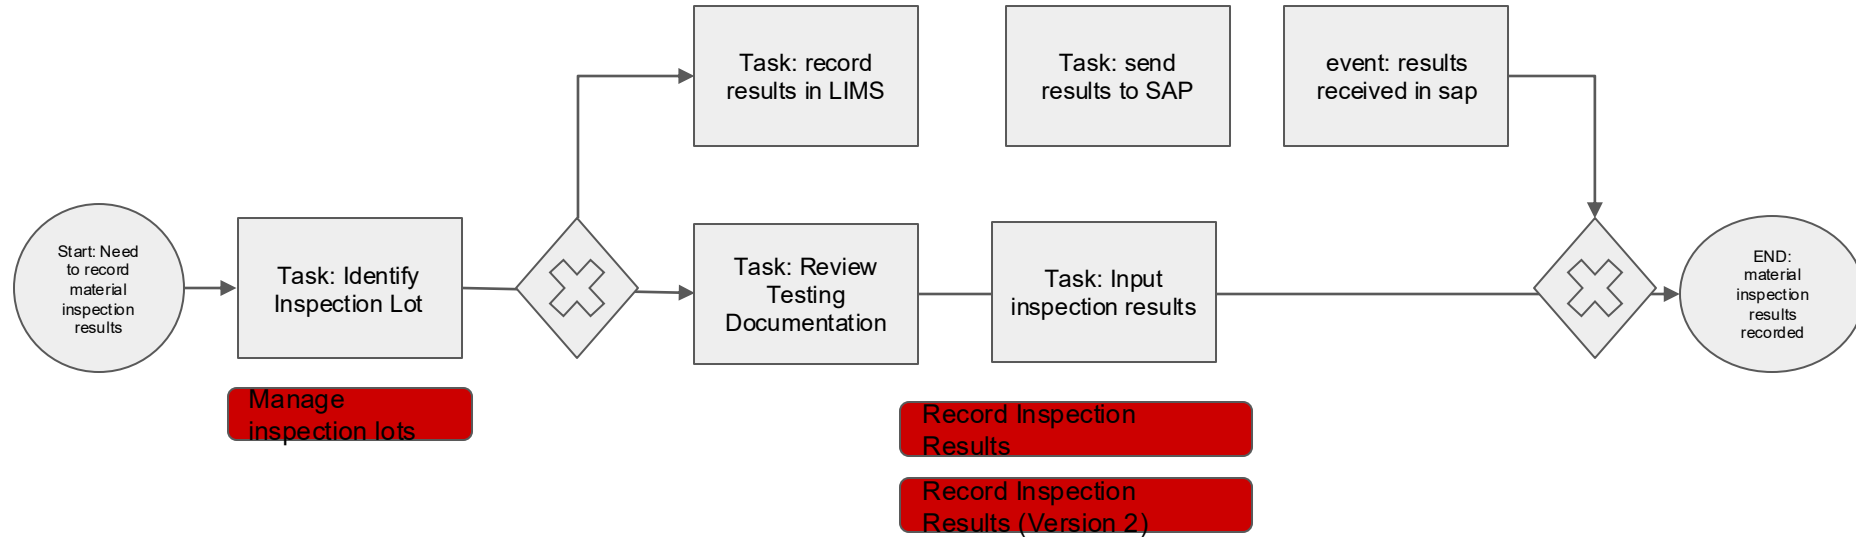

P-130-050: Create Inspection Lot

Role = Quality Planner

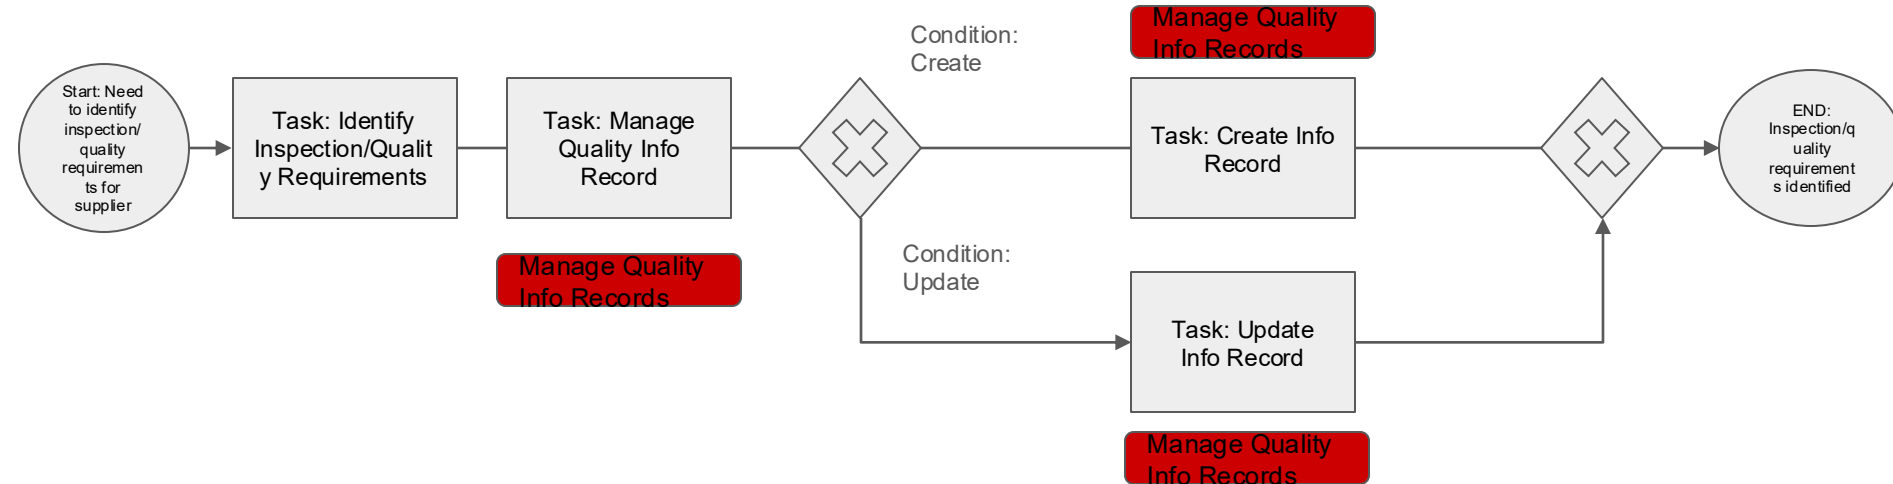

P-130-070: Record Material Inspection Results

Role = Quality Planner

P-130-090: Identify Inspection/Quality Requirements for Supplier

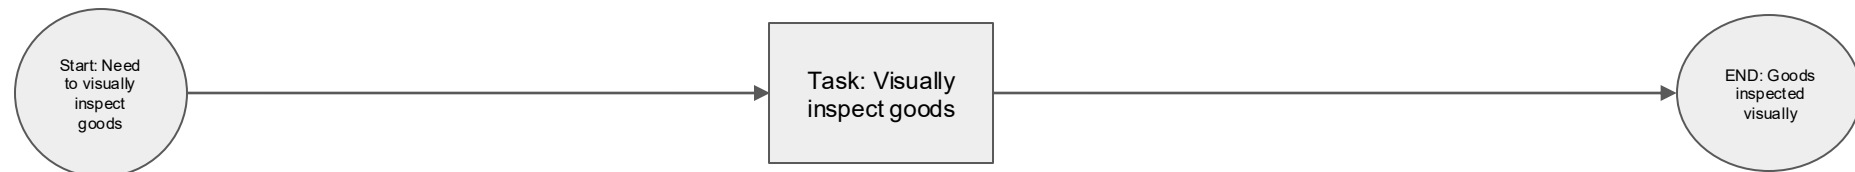

Role = Quality Planner

Done

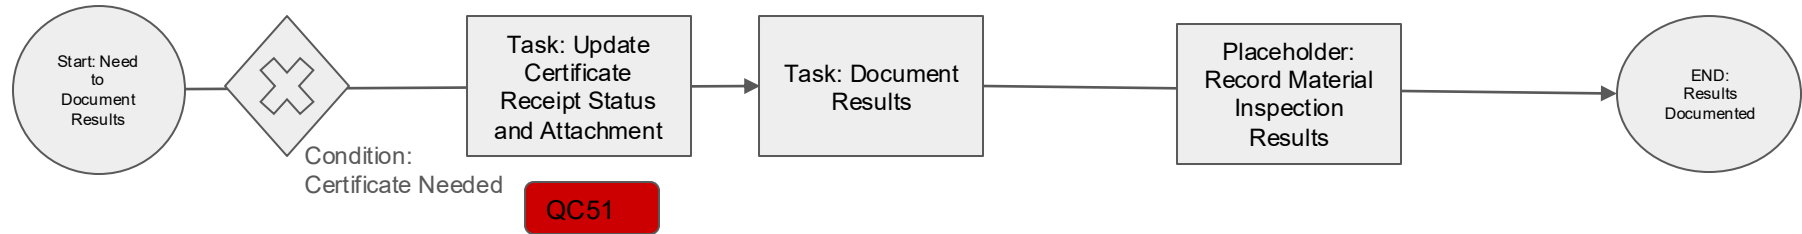

P-130-100: Visually Inspect Goods

Role = Quality Planner

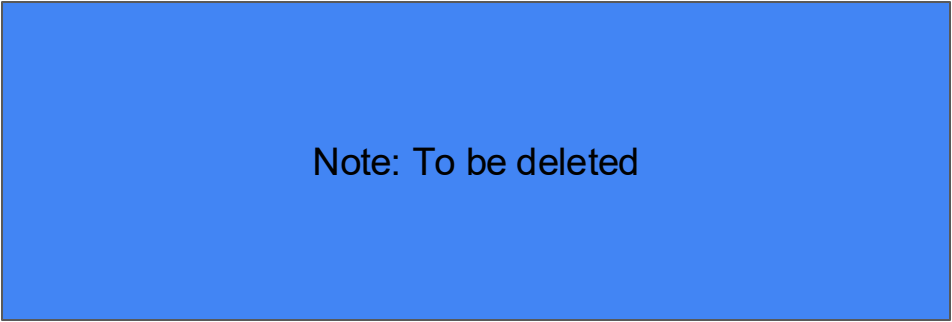

P-130-110: Document Results Inbound Certificate Check

Role = Quality Planner

P-130-130: Assign Priority Testing

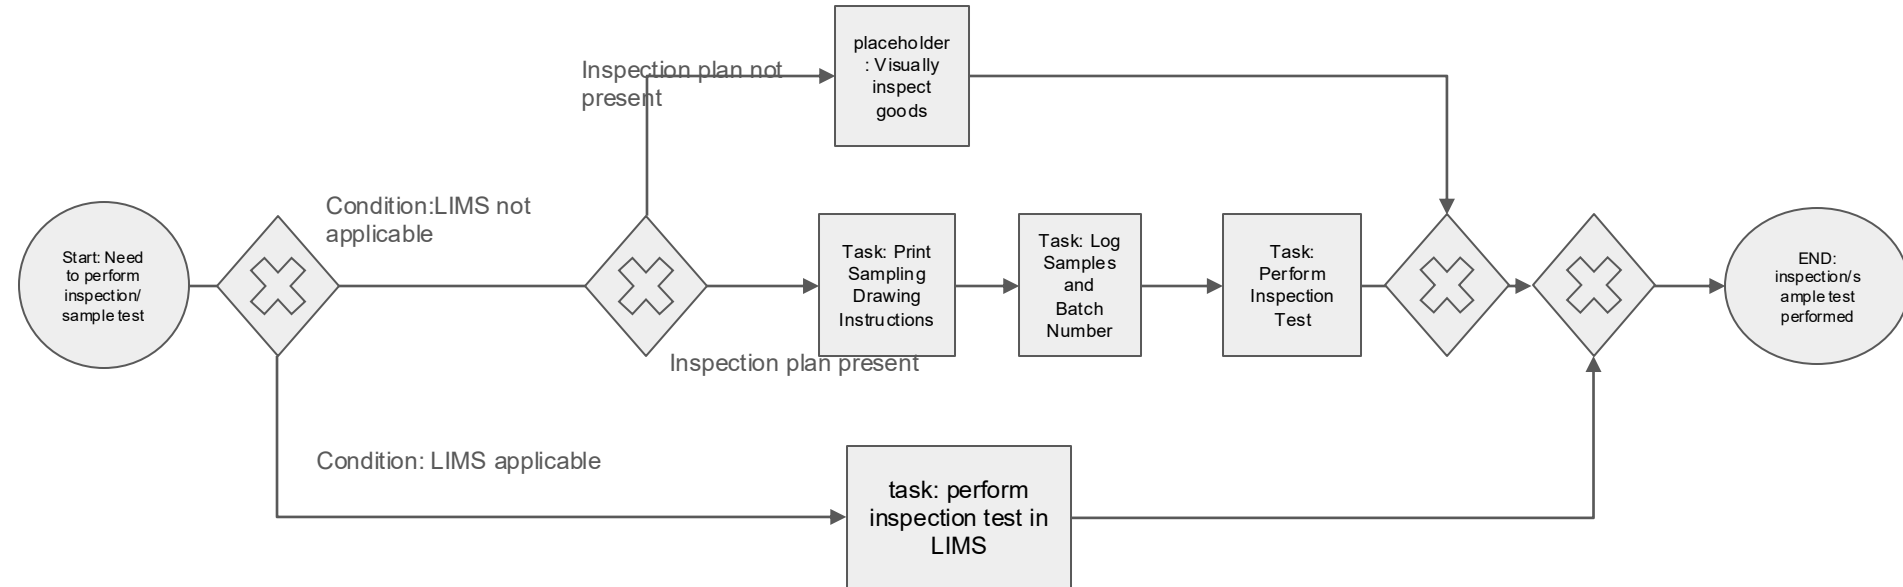

Role = Quality Planner

Note: To be deleted

P-130-140: Perform inspection/sample test

Role = Quality Planner

Done

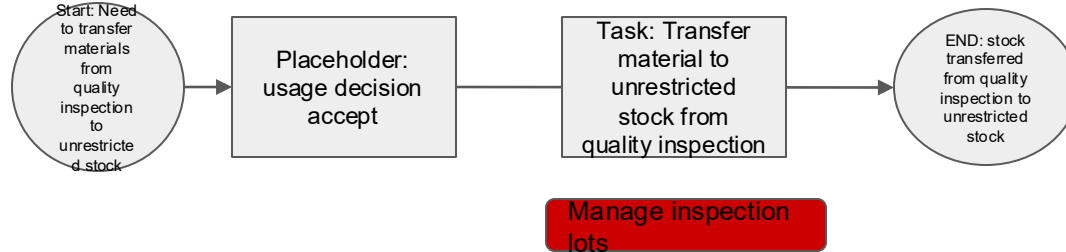

P-130-160: Review Testing Documentation

Role = Quality Planner

Note: To be deleted

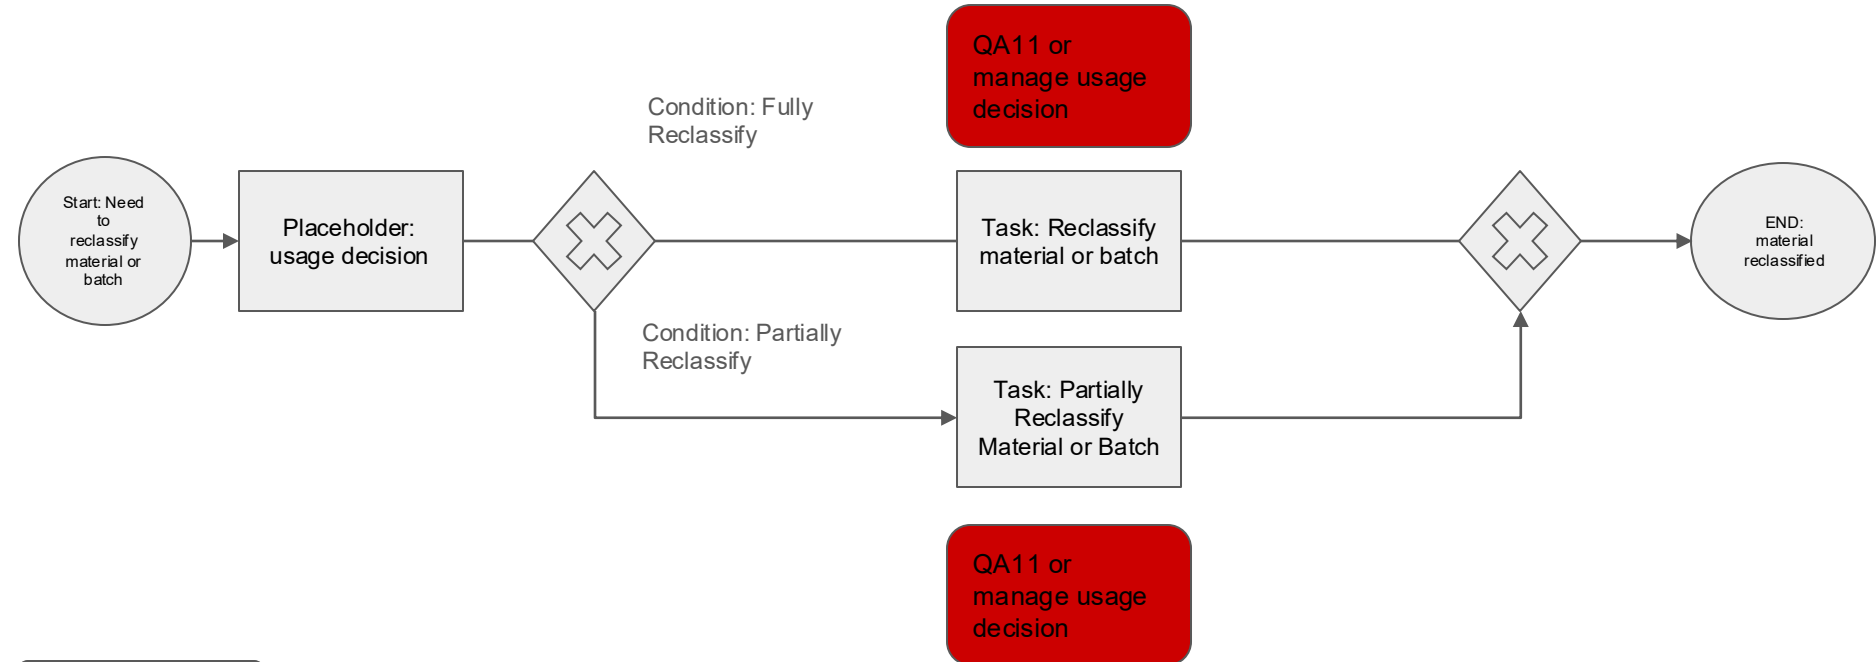

P-130-170: Transfer Materials from Quality Inspection to Stock

Role = Quality Planner

P-130-180: Reclassify Materials

Role = Quality Planner

Done

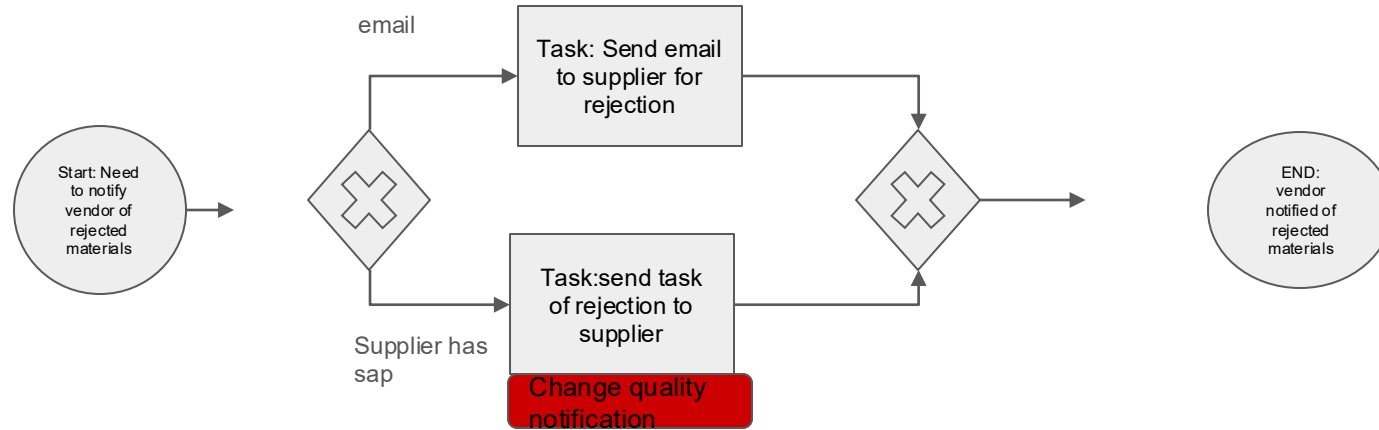

P-130-200: Notify Vendor of Material Acceptance

Role = Quality Planner

Note: they do not do this step

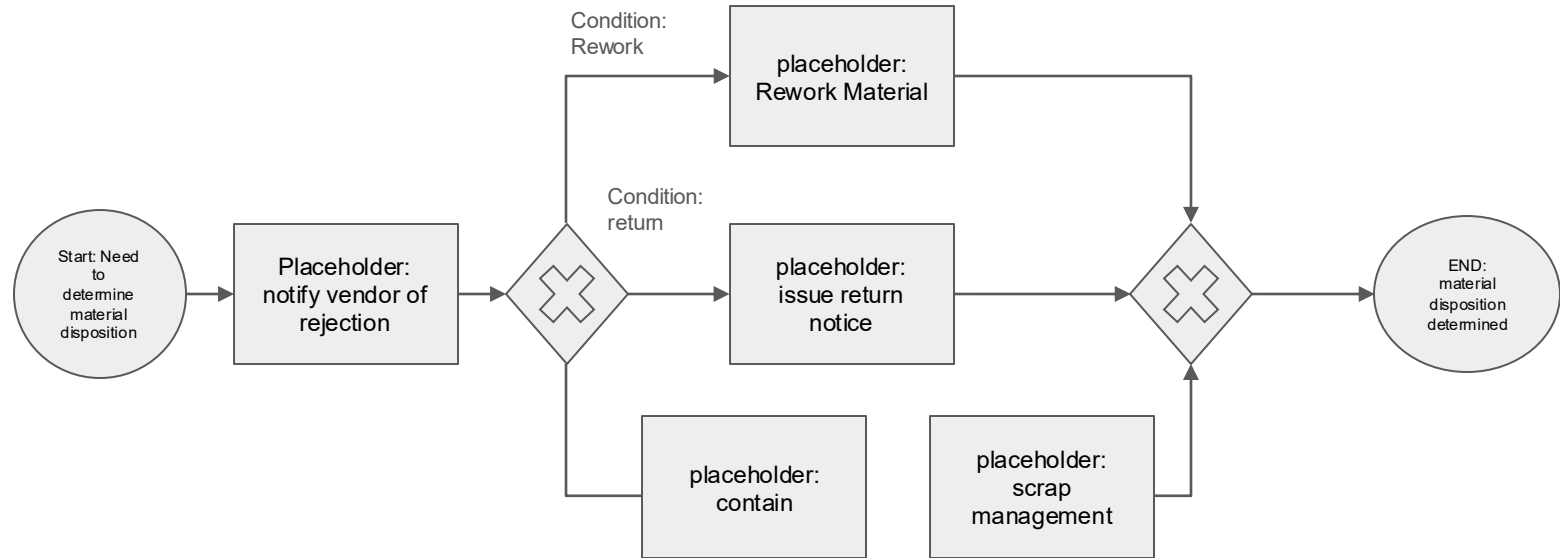

P-130-210: Notify Vendor of Material Rejection

Role = Quality Planner

P-140-010: Determine Material Disposition

Role = Quality Planner

Done

P-140-040: Rework Material

Role = Quality Planner

Note: Deleted because exact same as
M-140-200

App Name

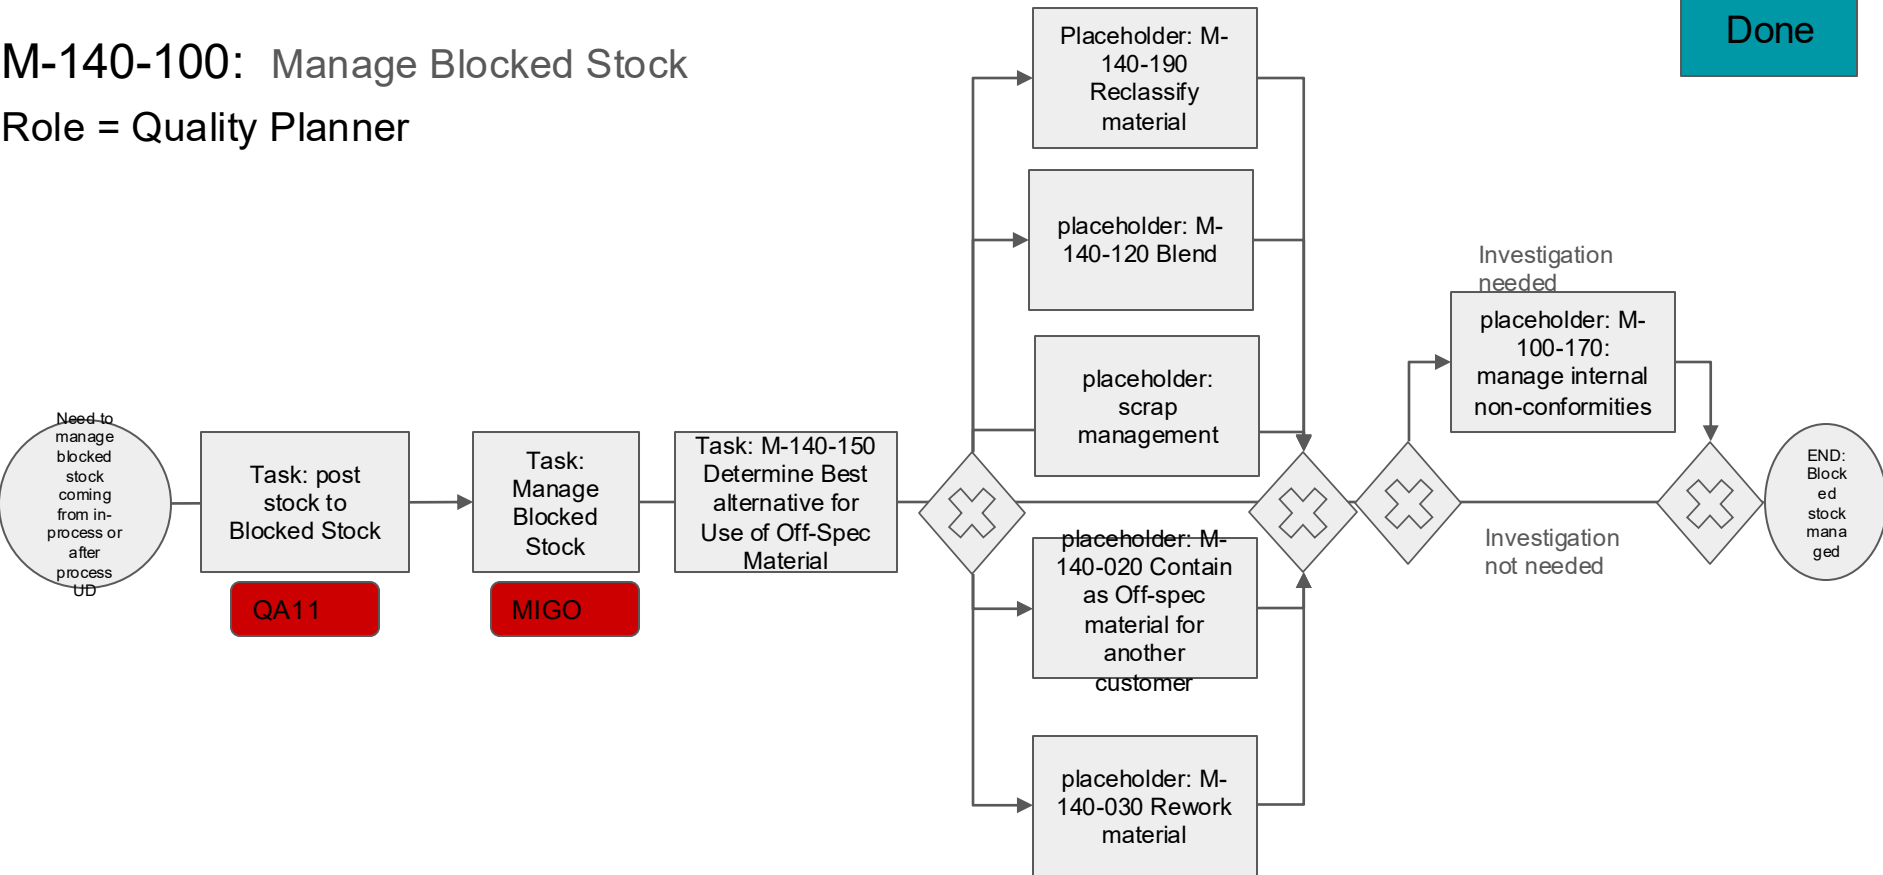

7.4 Monitor quality of finished products, raw materials and intermediate products

7.4.8 Quality Control of intermediates, finished products (bulk, packaged)

M-140-100: Manage Blocked Stock

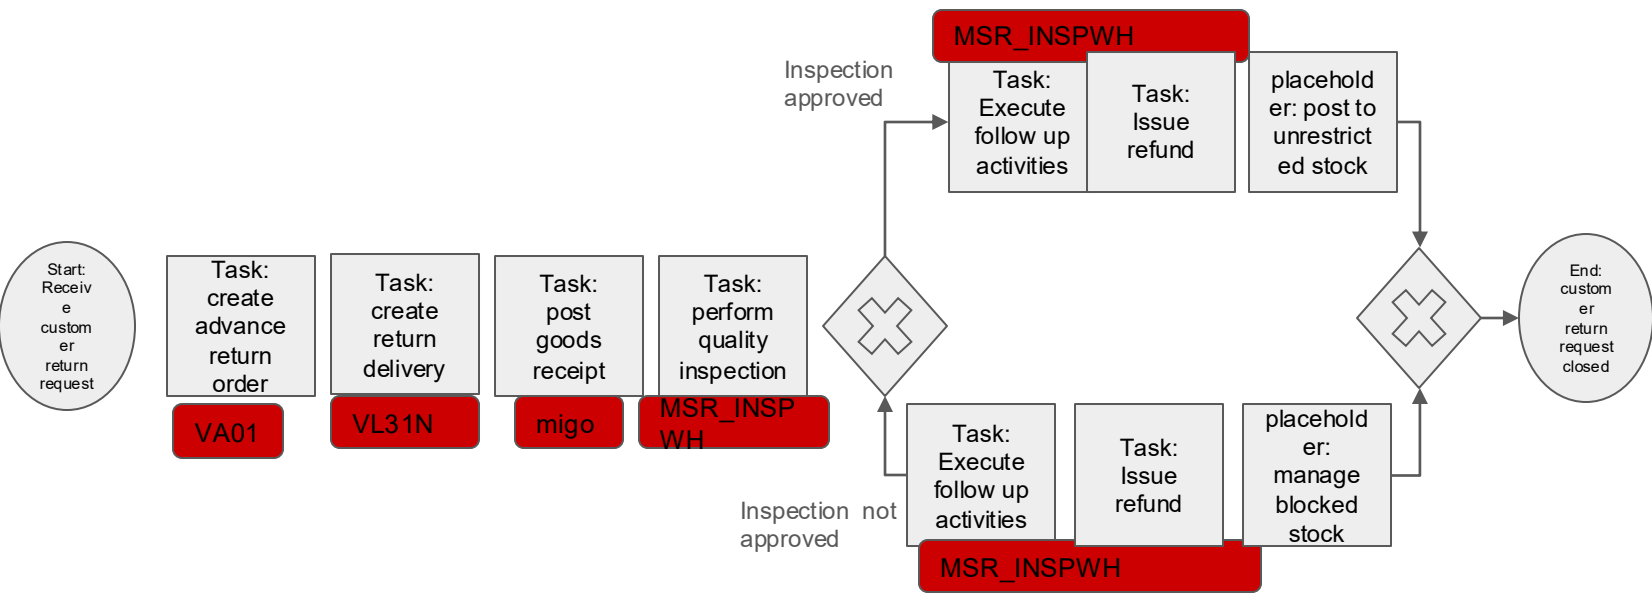

Role = Quality Planner

Done

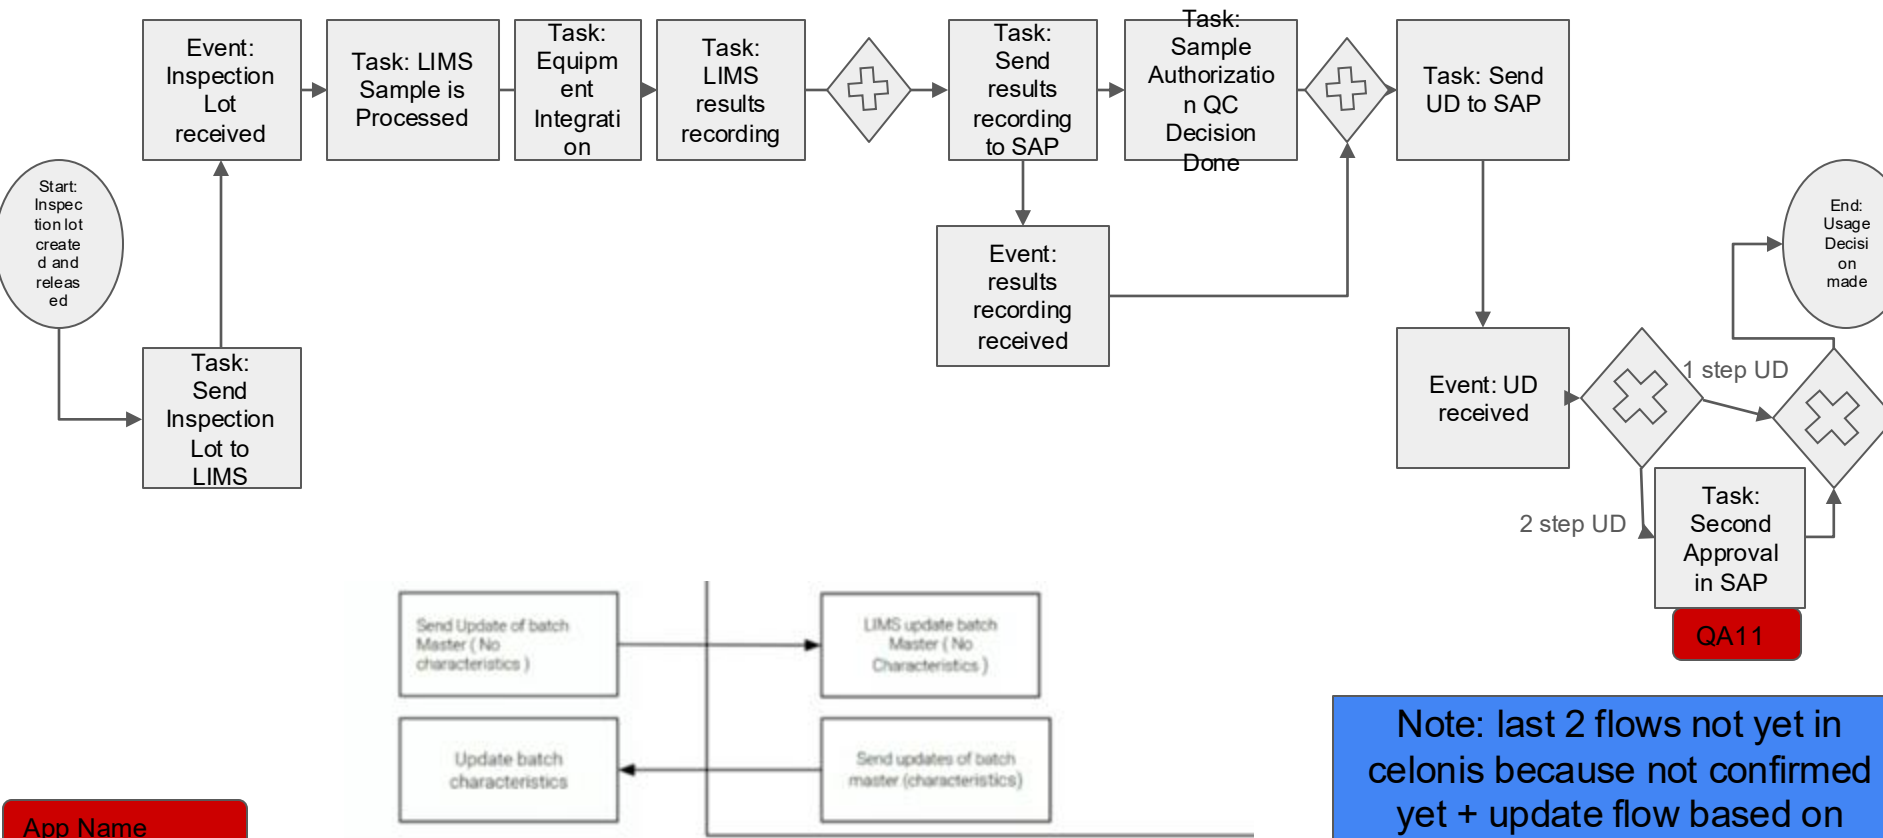

Quality Returns for Pack Products

Done

LIMS Integration

Done

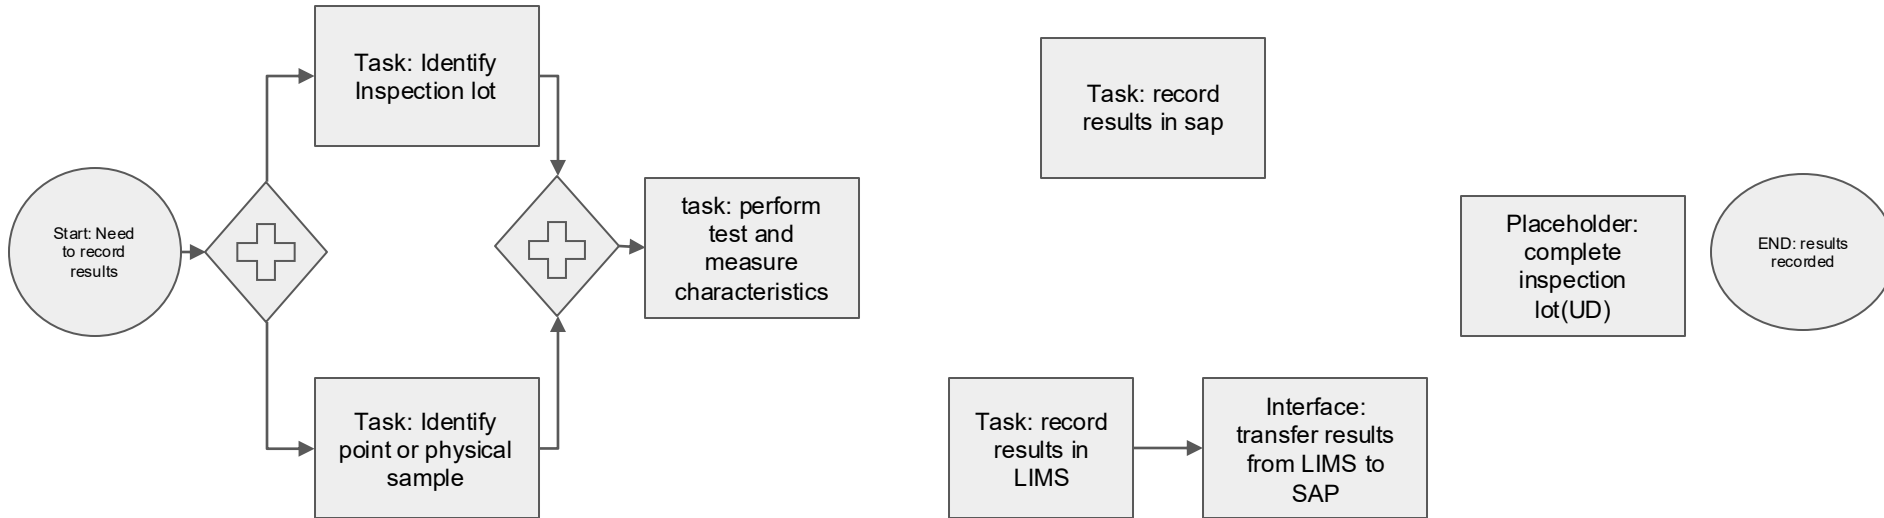

Note: last 2 flows not yet in celonis because not confirmed yet + update flow based on celonis

App Name

M-130-040: Results Recording After Production

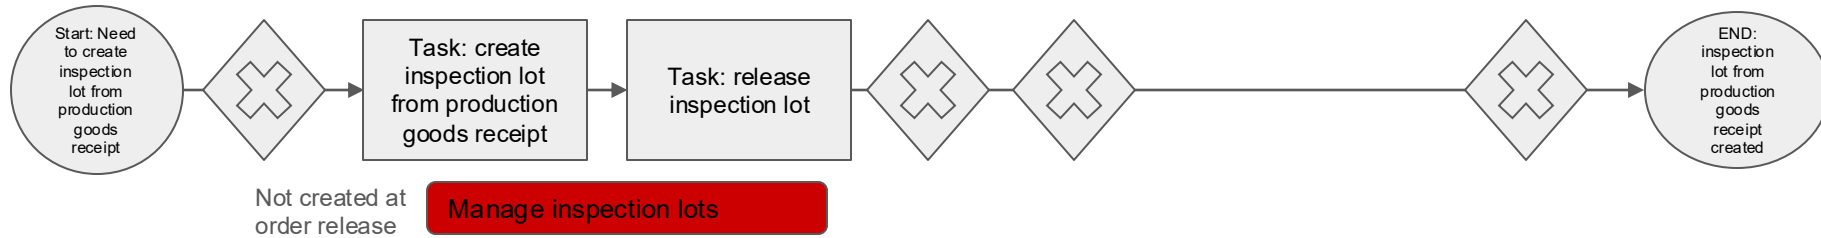

Role = Quality Planner

Manage inspection lots

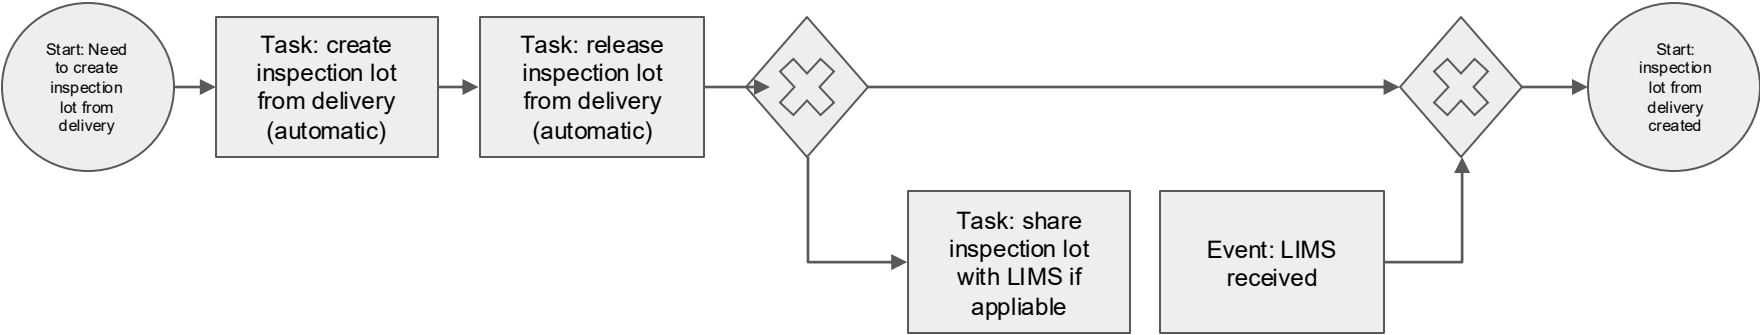

M-130-050: Create Inspection Lot from Production Goods Receipt

Role = Quality Planner

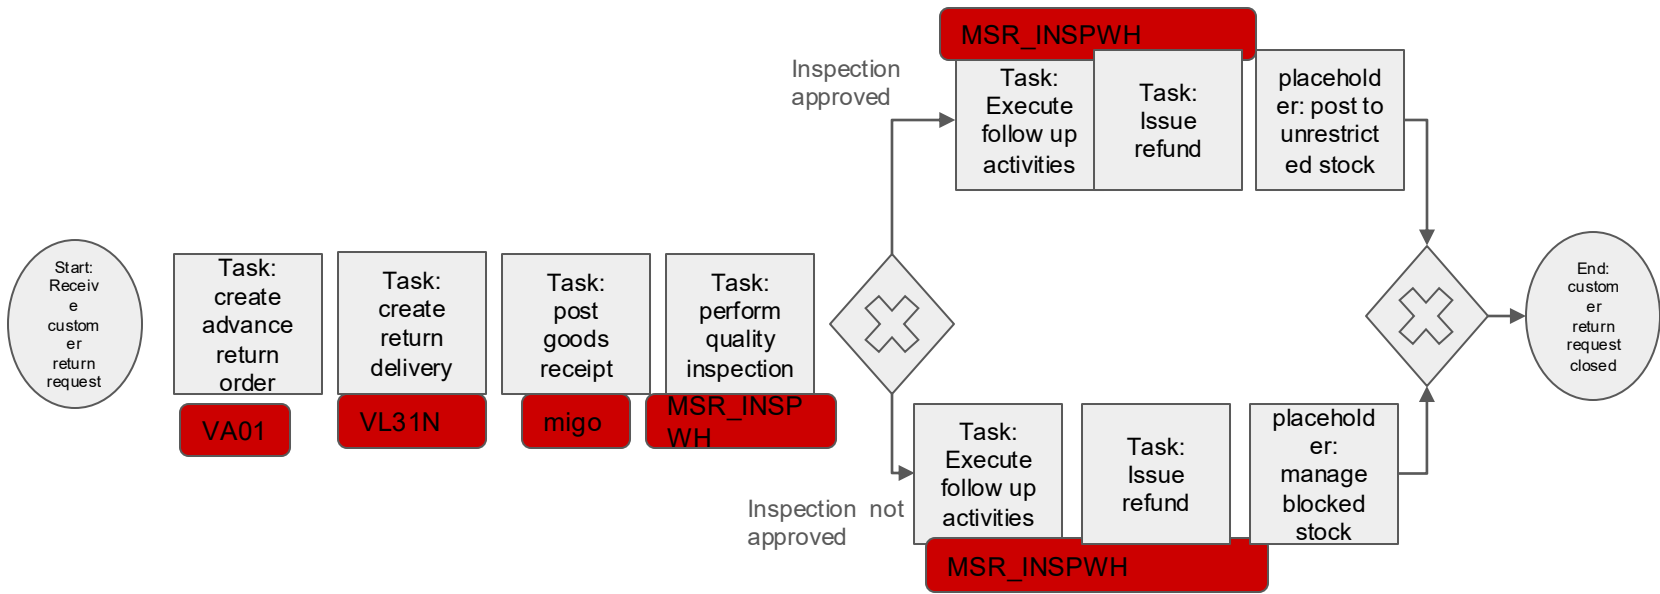

7.4 Monitor quality of finished products, raw materials and intermediate products

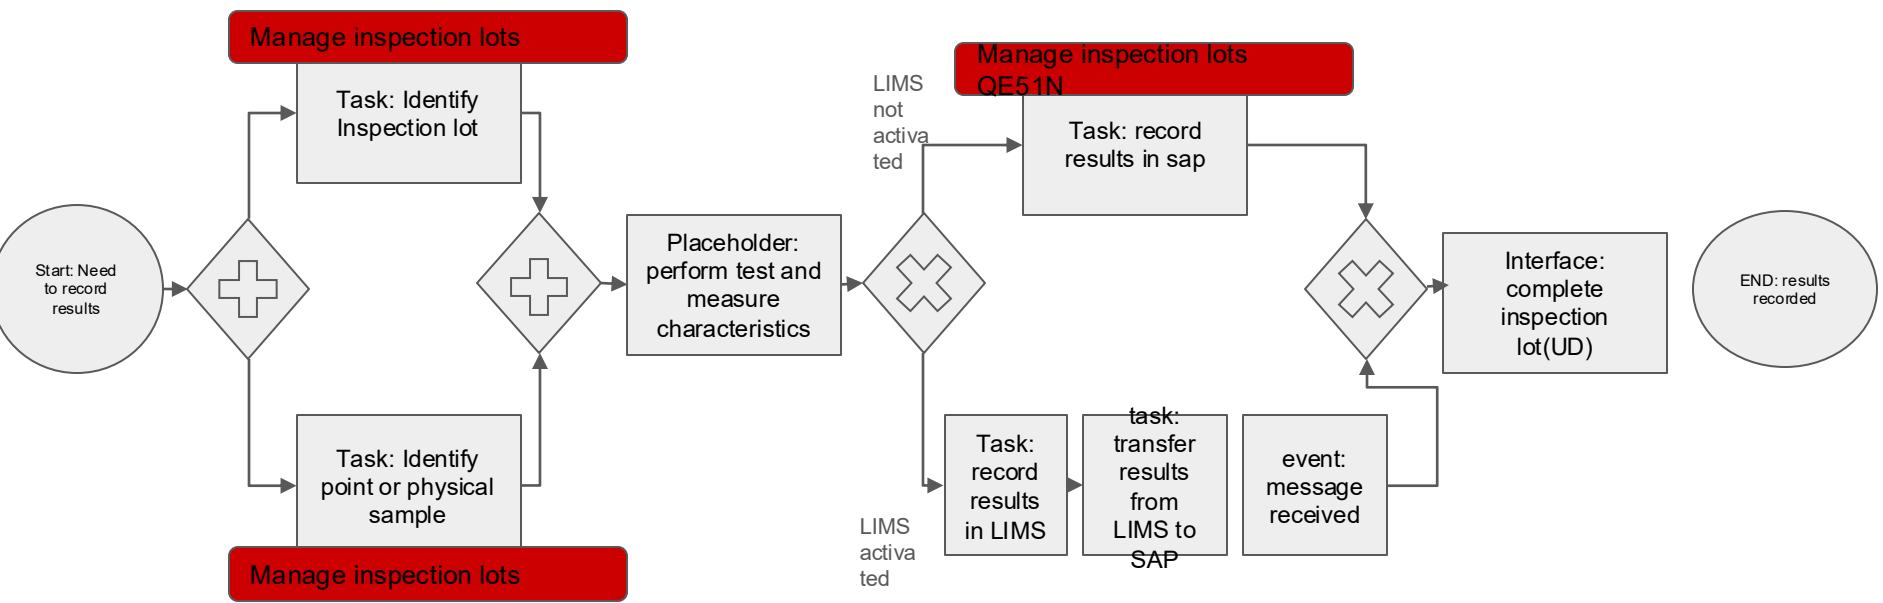

7.4.9 Quality Control during product bulk loading

Quality Returns for Bulk Products

Done

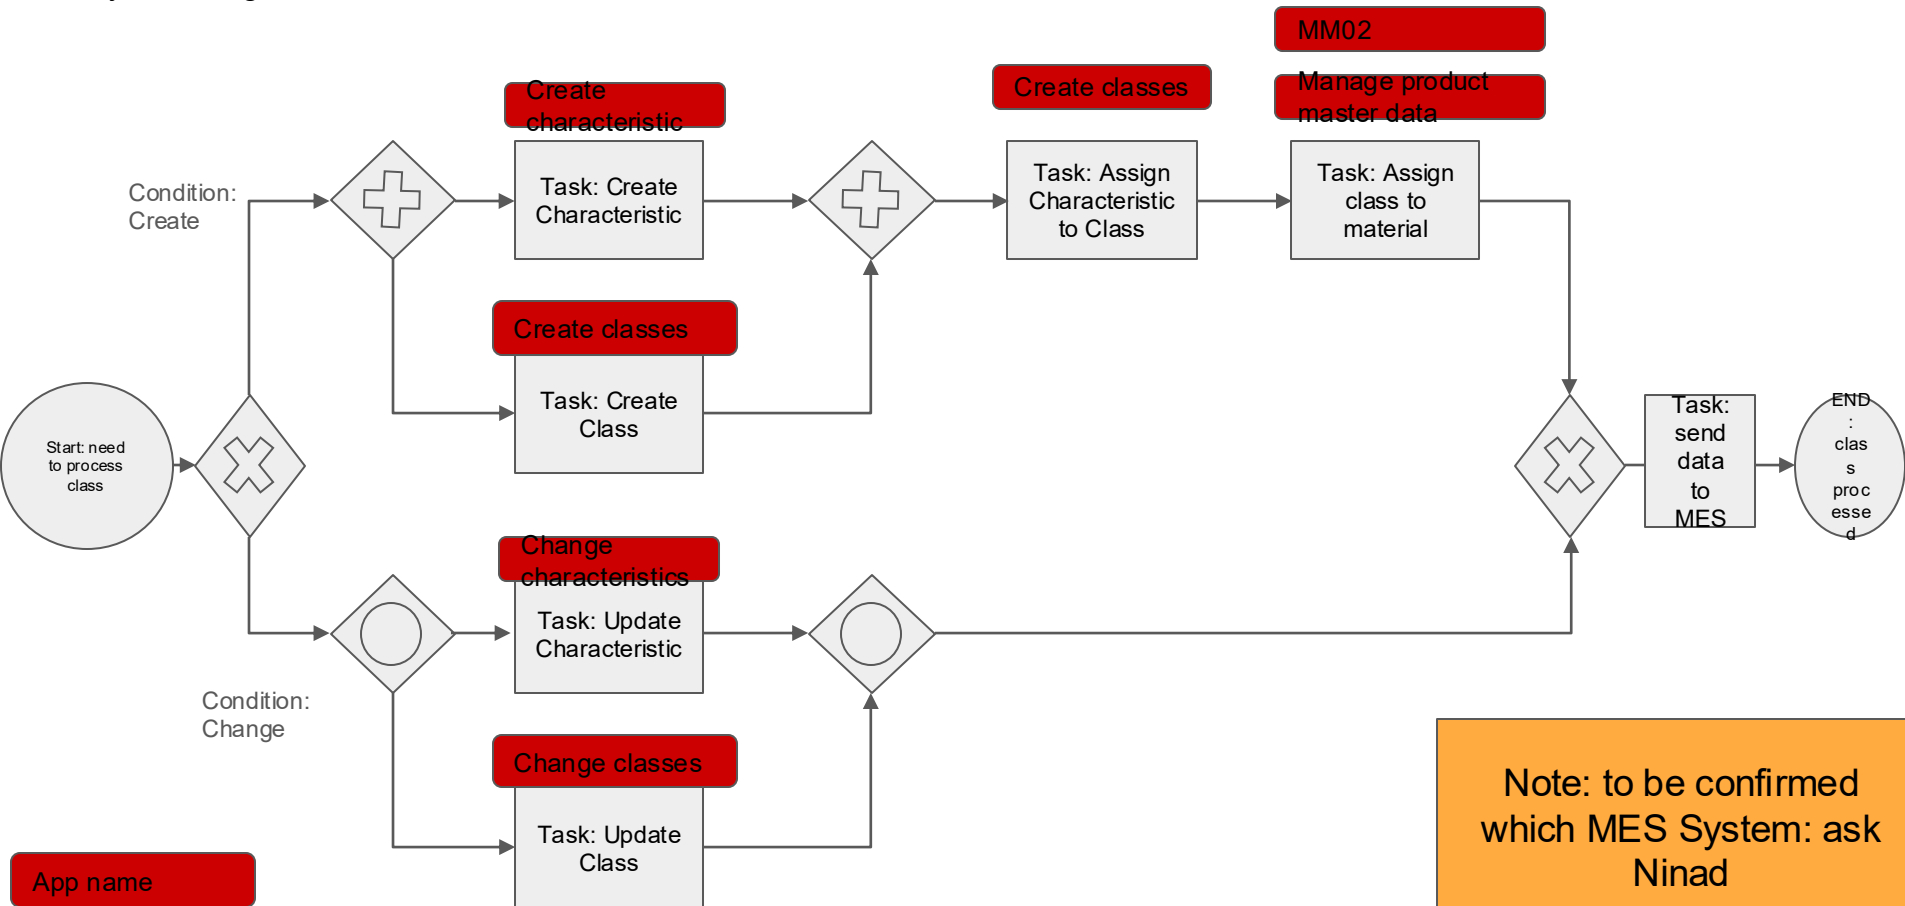

7.5 Manage Plan to Produce Data

7.5.1 Manage Production Master Data

M-150-020: Process Class

Role = BOM Engineer for everything except the end (last task) which is for the material data specialist - product data.
Solvay role: Regional Data Steward

Done

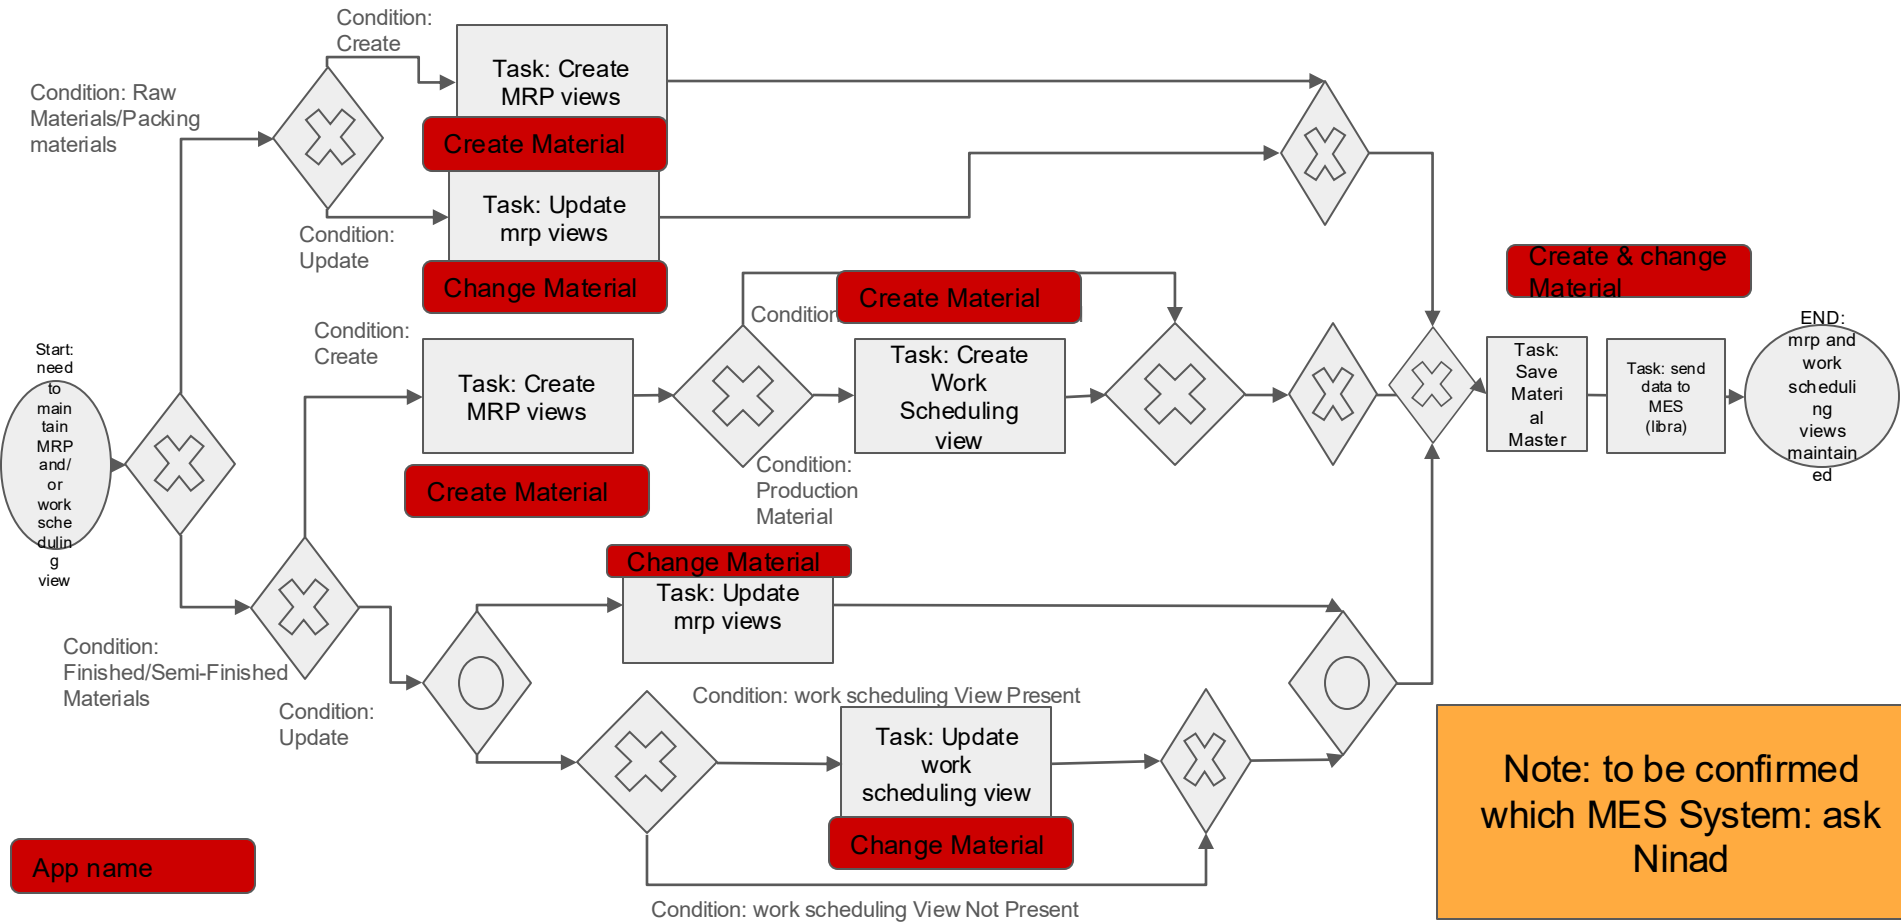

M-150-030: Maintain MRP and work scheduling views

Role = material data specialist - product data.

Solvay role: enterprise data steward

Done

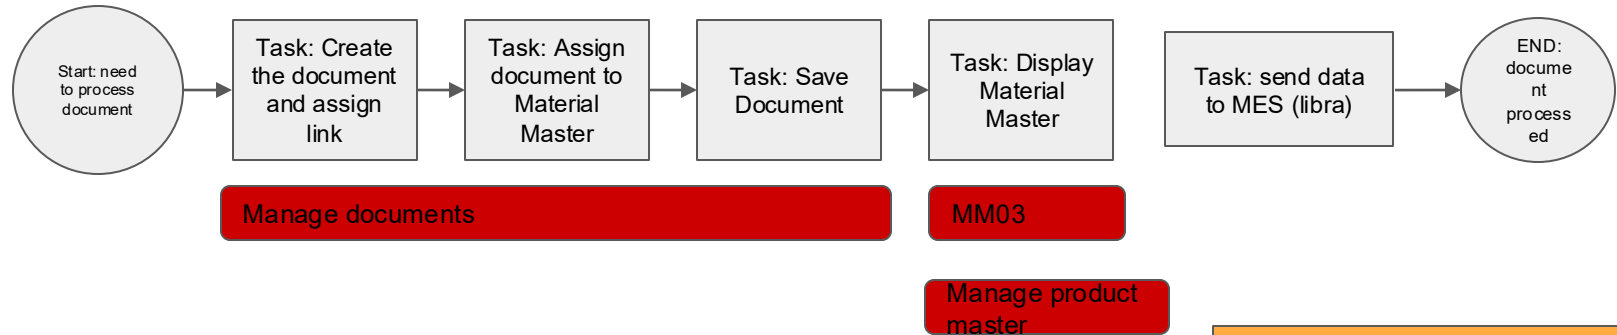

M-150-100: Process Document

Role = material data specialist - product data.

App: Update Material

Solvay role: DATA DOMAIN LEAD/ enterprise data steward

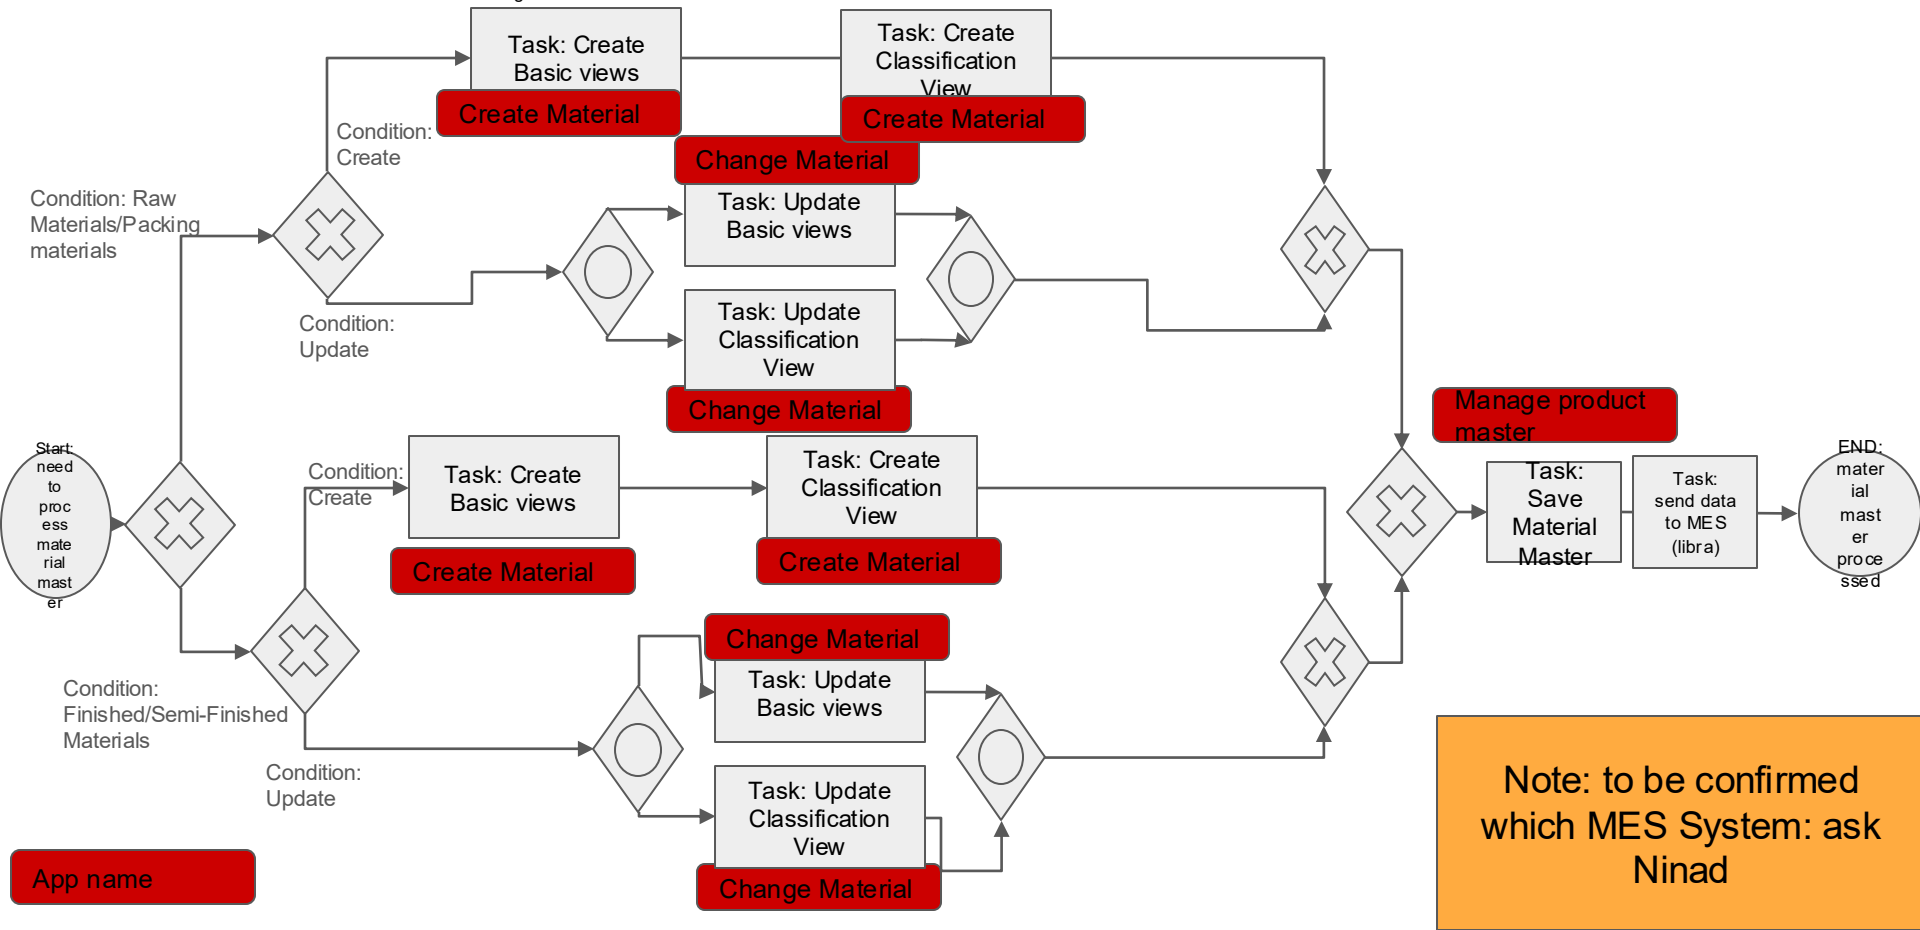

Role = material data specialist - product data.

Solvay role:

raw material/packaging = enterprise data steward

finished/semi-finished = data domain lead/ data governance lead

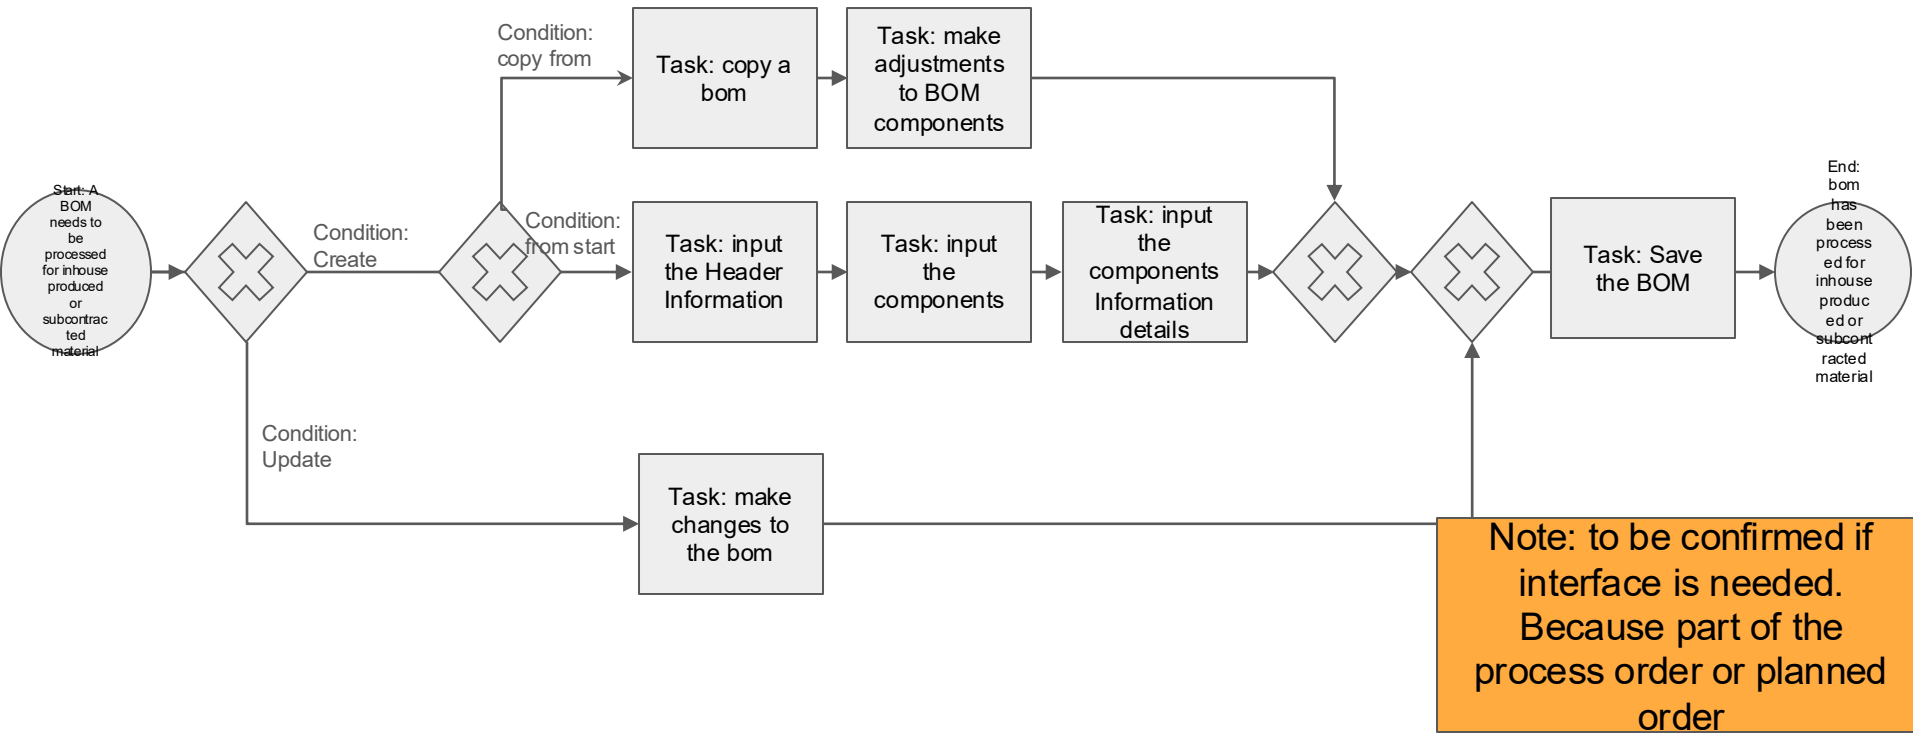

M-160-010: Process BOM

Role = BOM Engineer

App: Maintain bill of material or create/change bill of material

Solvay Role = enterprise data steward, data domain lead/ data governance lead

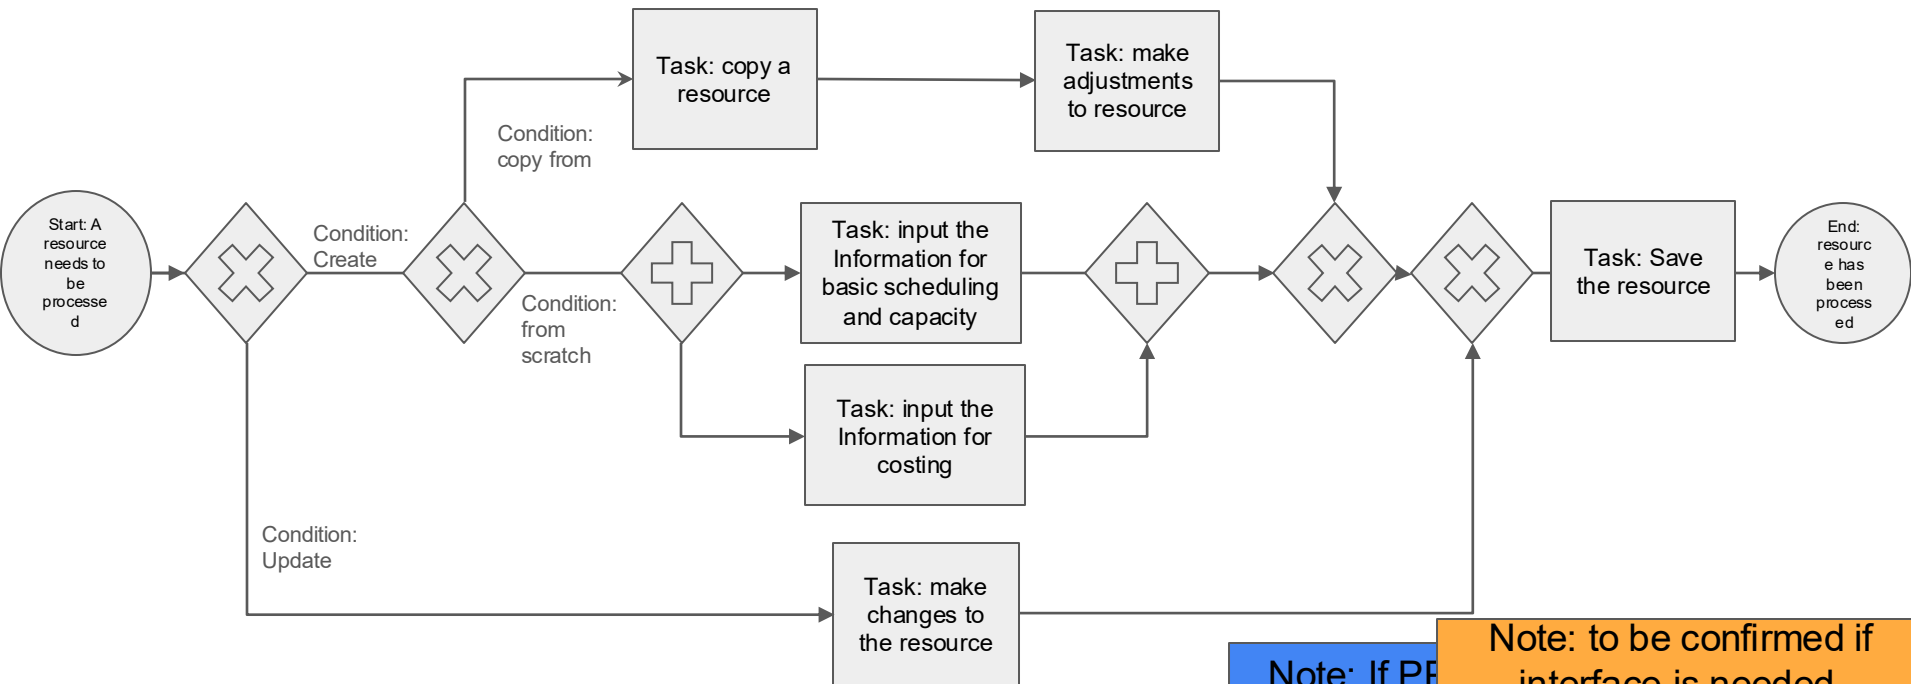

Done

Role = Production Engineering - Process Manufacturing

App: manage resources or create/change resource

Solvay Role = enterprise data steward, data domain lead

Note: If PP
Is the
information

Note: to be confirmed if
interface is needed.
Because part of the
process order or planned
order

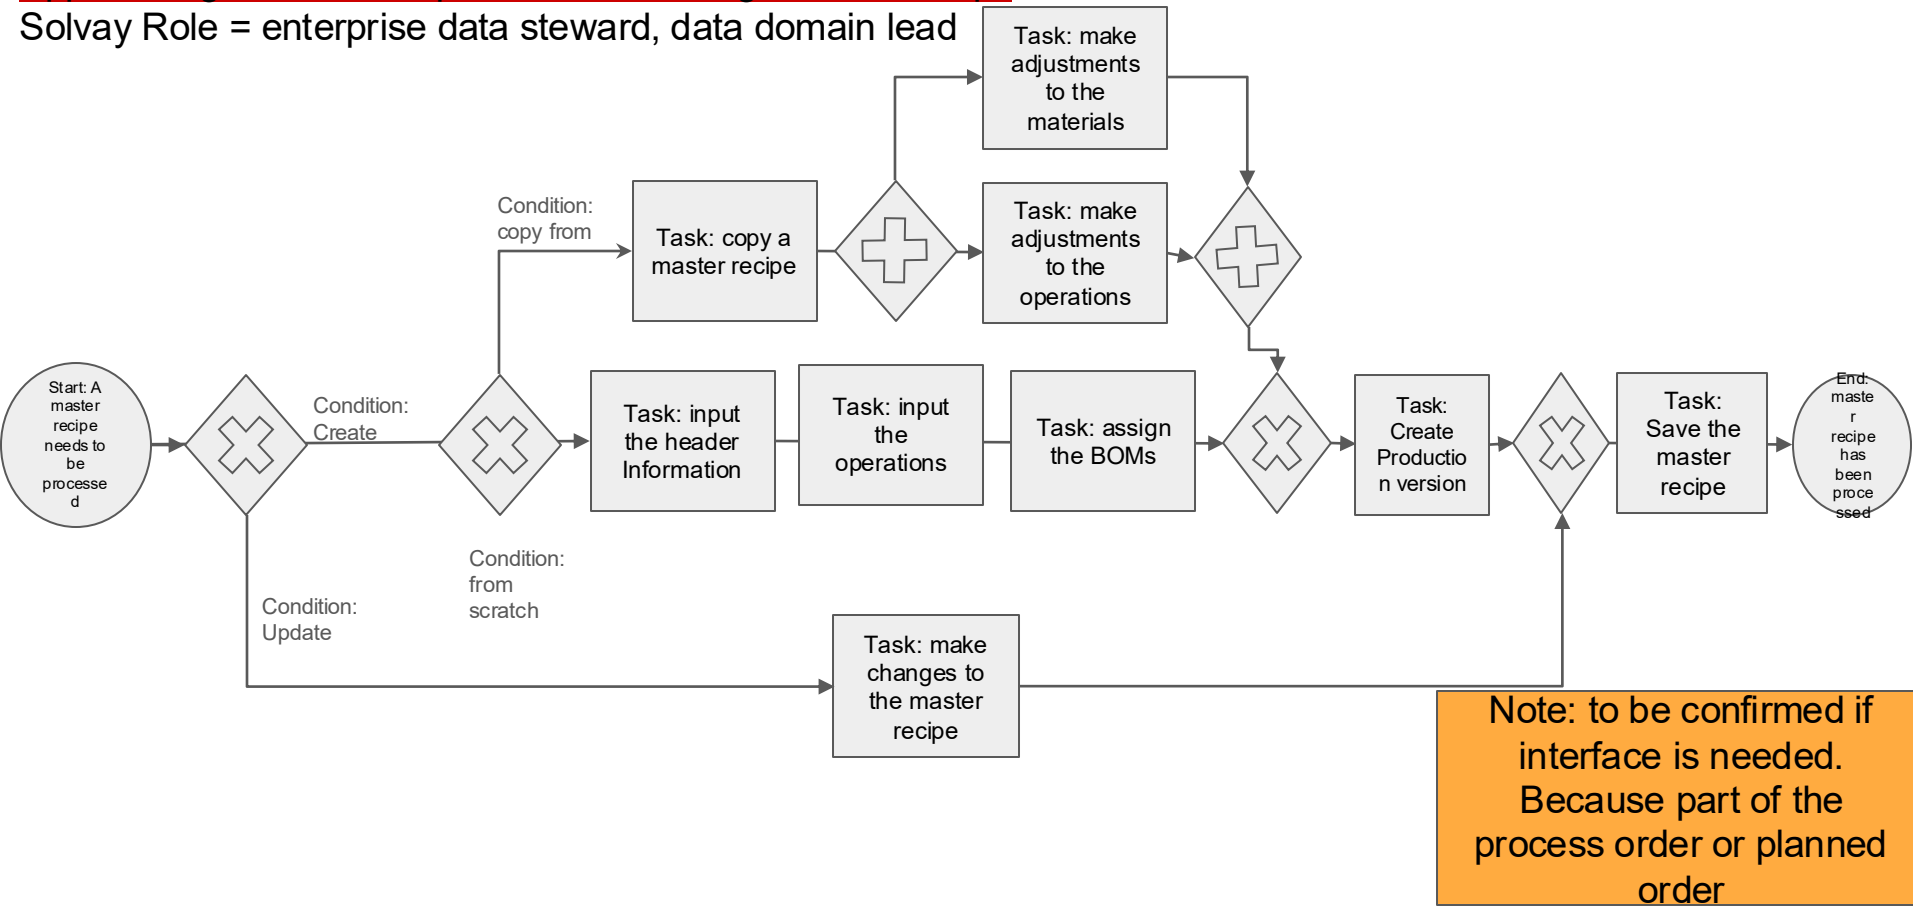

M-160-030: Process Master Recipe

Done

Role = Production Engineering - Process Manufacturing

App: manage master recipes & create/change master recipe

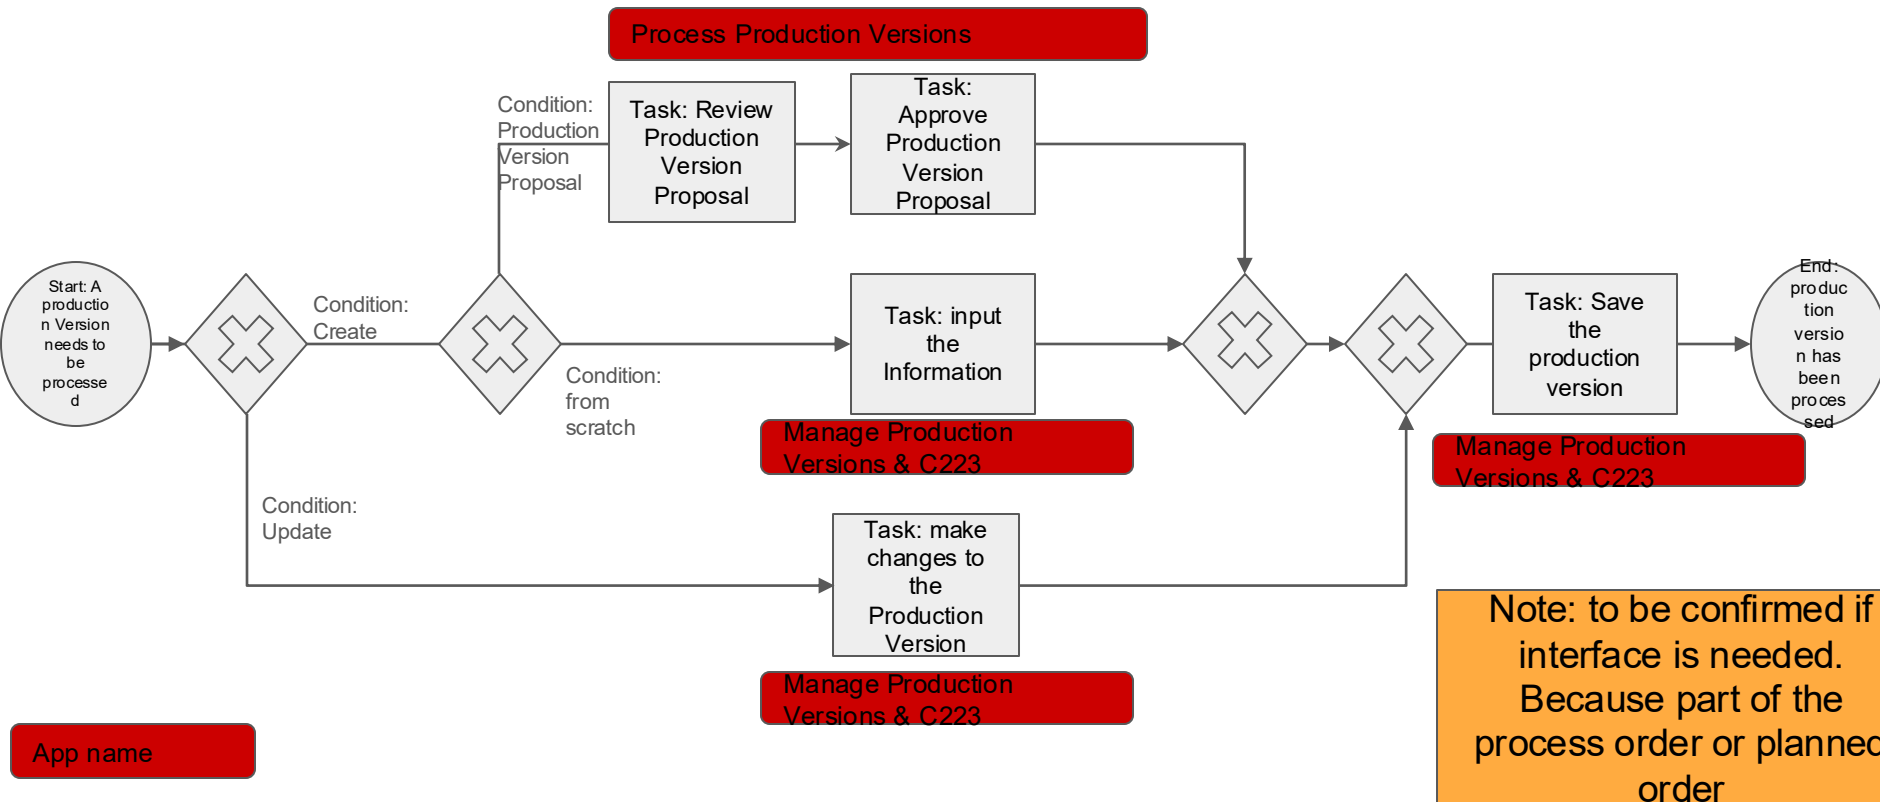

Solvay Role = enterprise data steward, data domain lead

M-160-040: Process Production Version

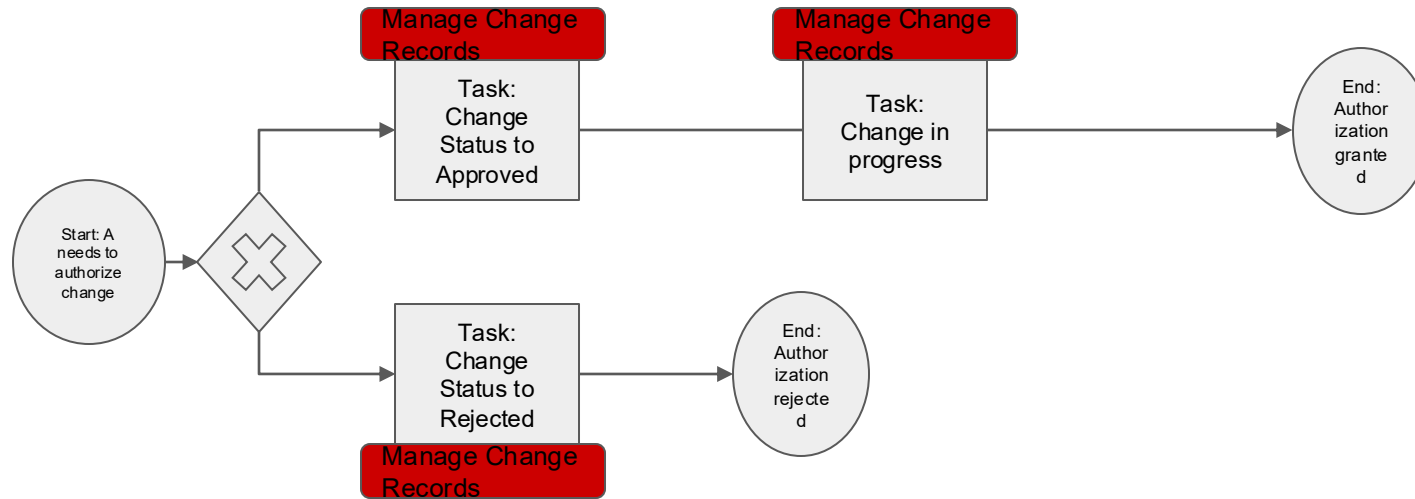

Role = Production Engineering - Process Manufacturing

Solvay Role = enterprise data steward, data domain lead

M-160-060: Authorize Change

Role = /

Done

M-160-070: Identify change in Production Data

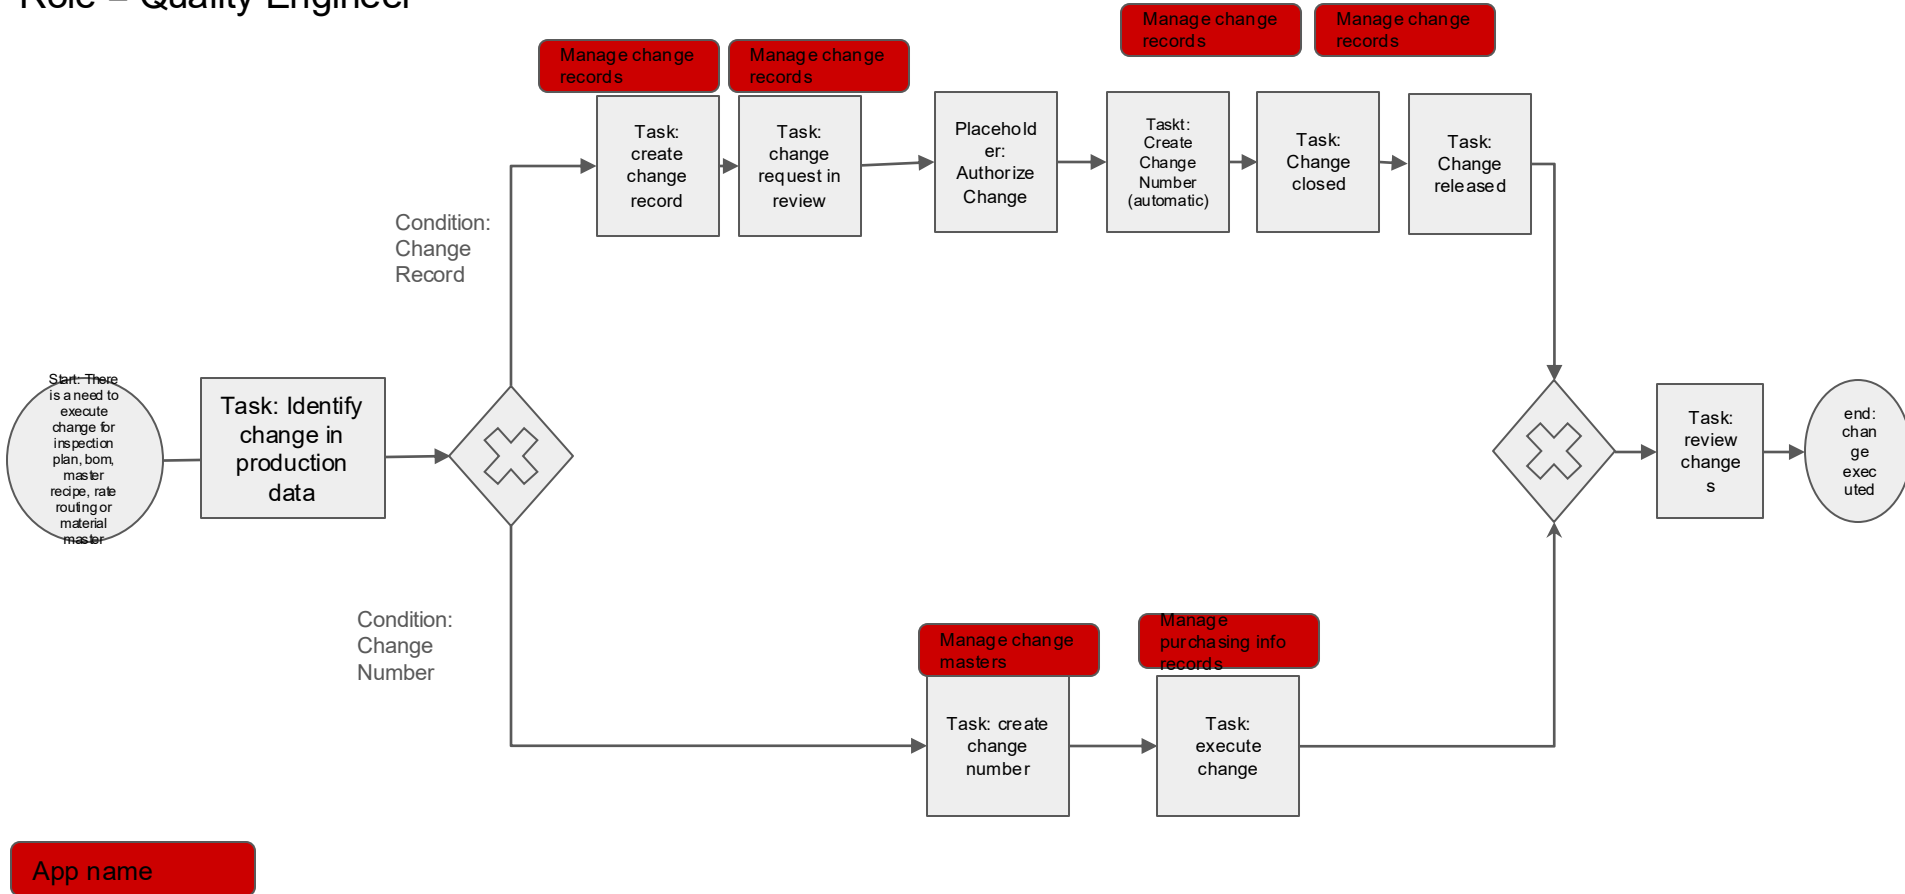

Role = Production Engineering - Process Manufacturing & Bom Engineer

Note: To be Deleted

App name

M-160-100: Execute Change (in the scenario of a quality)

Role = Quality Engineer

M-160-130: Maintain master data for bulk finished goods

Role = material data specialist - product data

App: Manage product master data

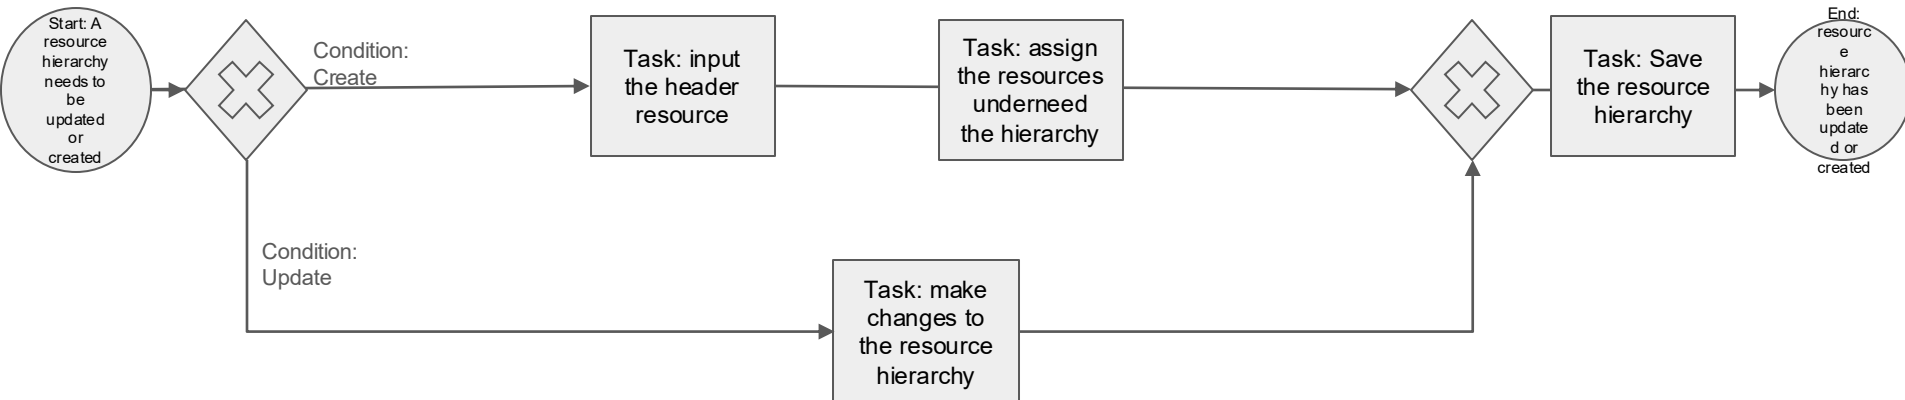

Note: To be deleted: Also for subcontracting,
packaged finished goods, consignment stock

M-160-220: Process Resources Hierarchy

Role = Production Engineering - Process Manufacturing

App: create/change hierarchy

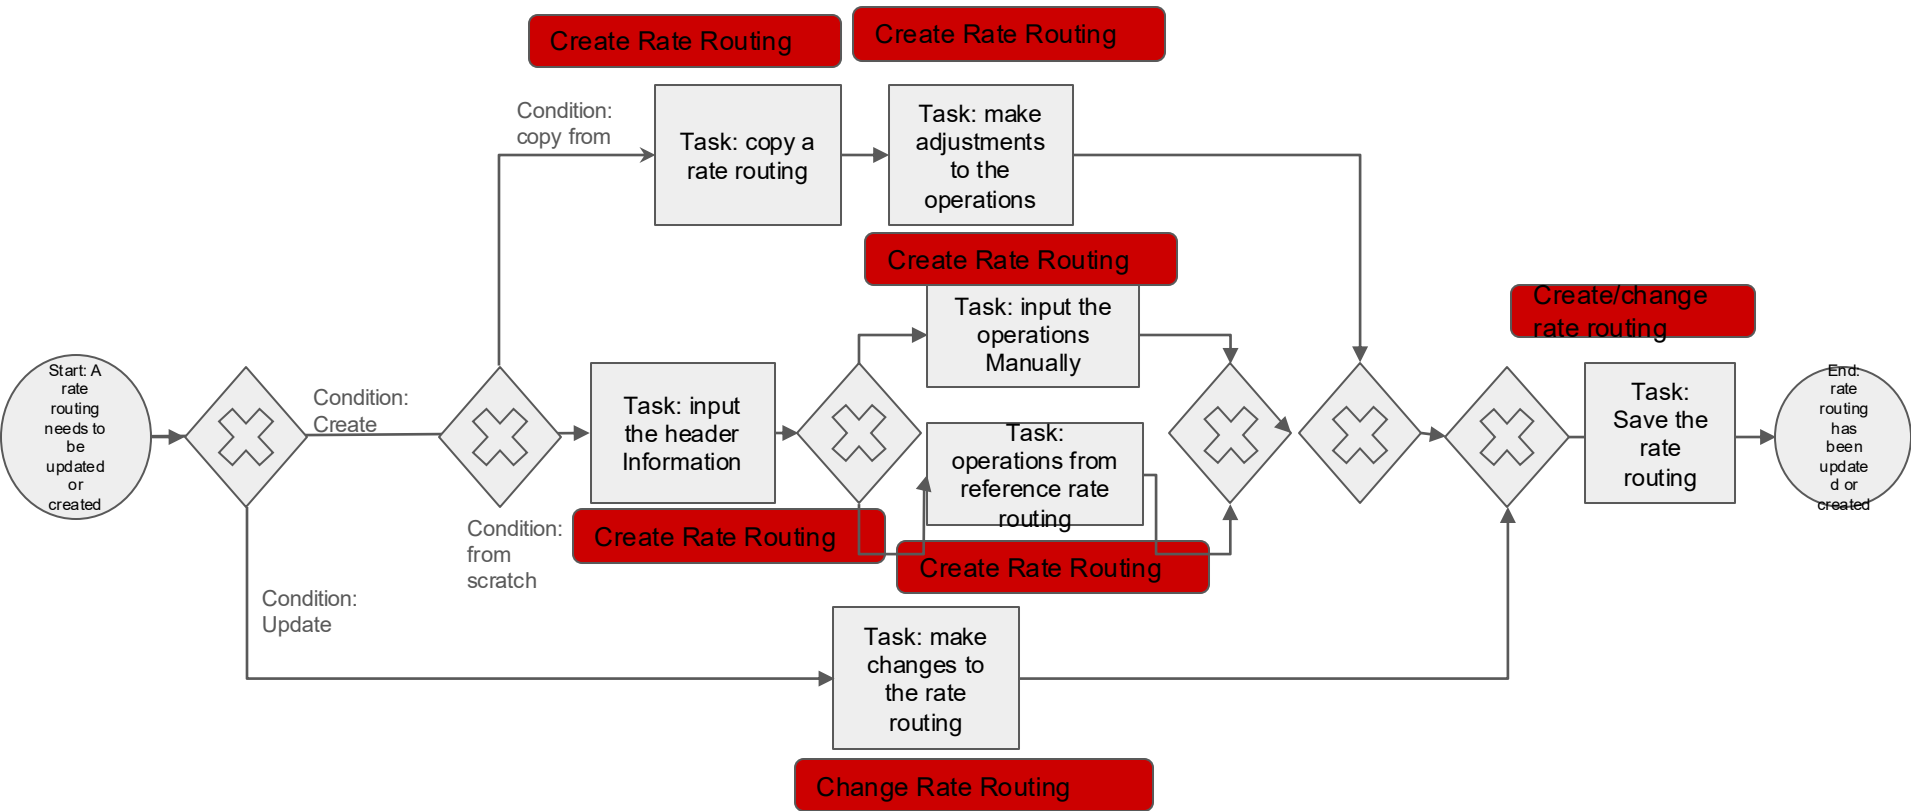

Solvay Role = enterprise data steward, data domain lead

M-160-260: Process Rate Routing

Done

Role = Production Engineering - Process Manufacturing
Solvay Role = enterprise data steward, data domain lead

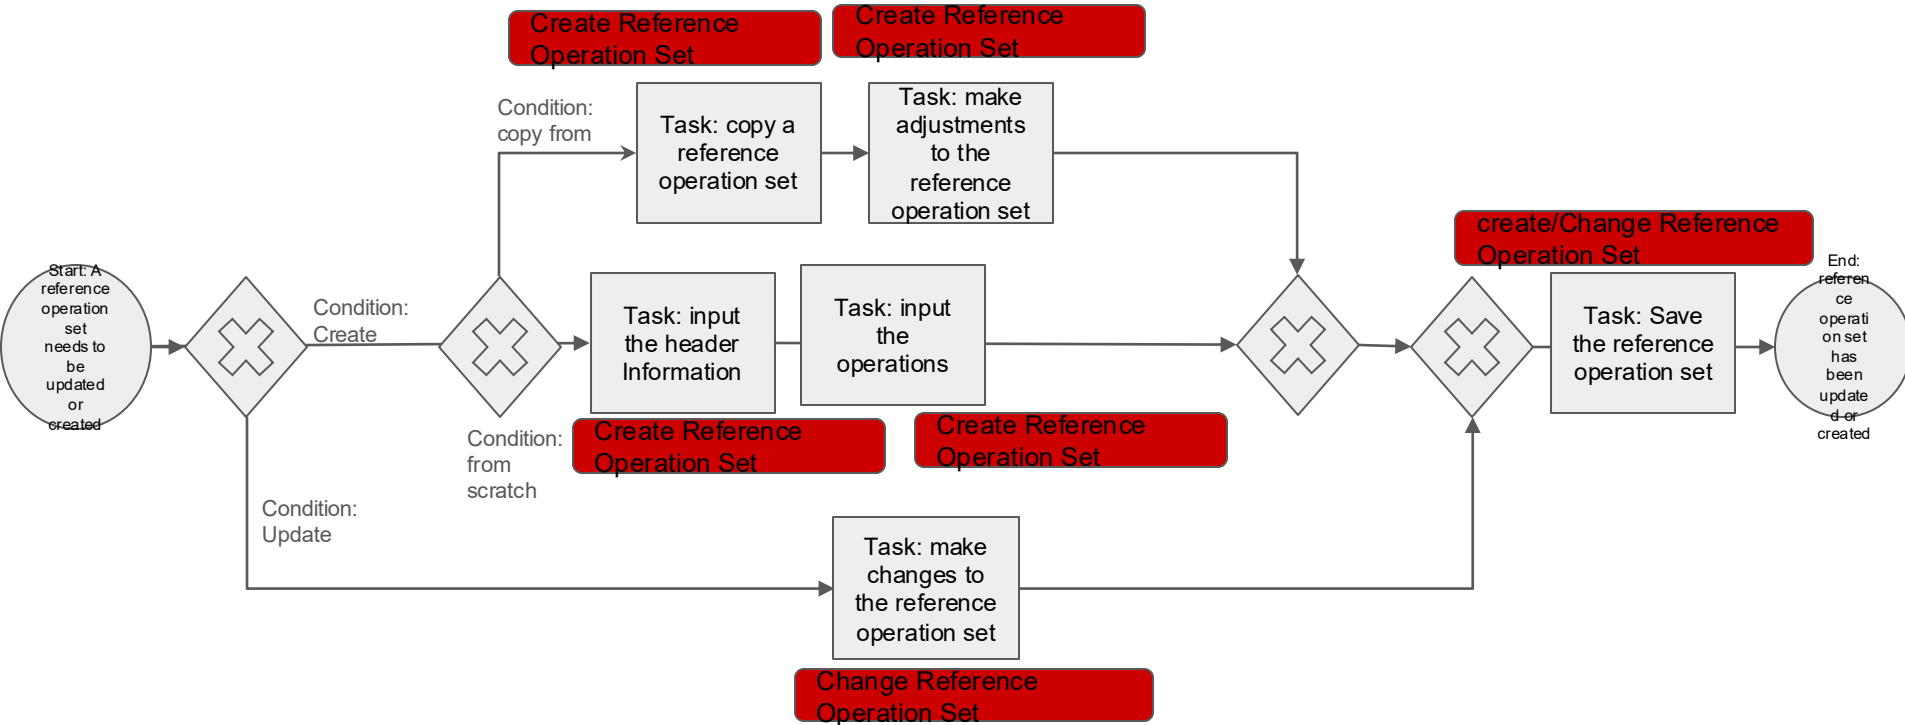

App name

M-160-270: Process Reference Operation Set

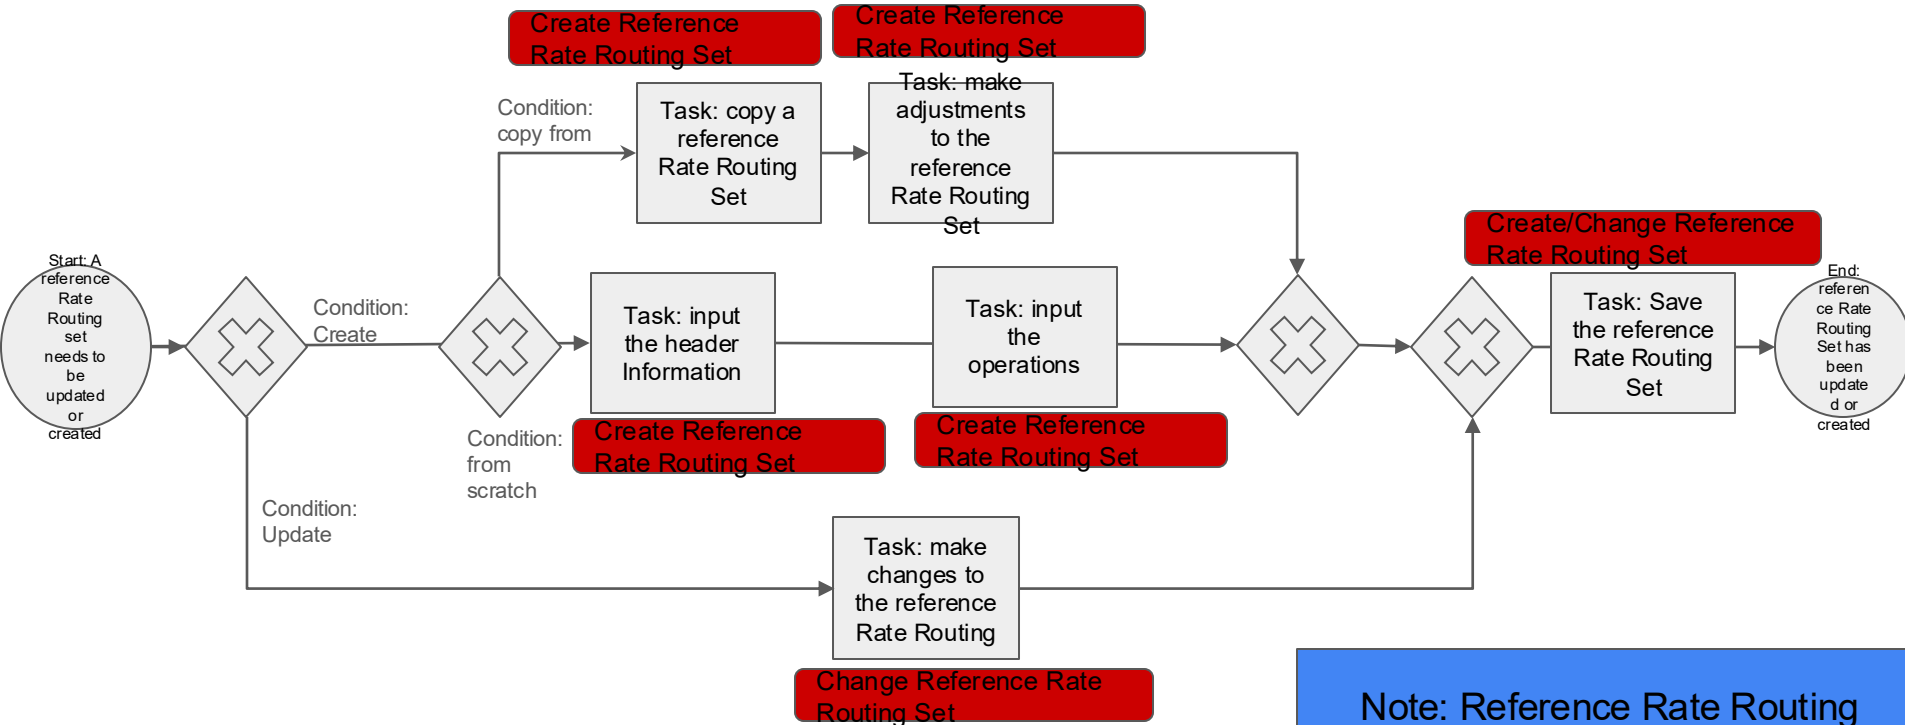

Role = Production Engineering - Process Manufacturing

Solvay Role = enterprise data steward, data domain lead

M-160-280: Process Reference Rate Routing

Role = Production Engineering - Process Manufacturing

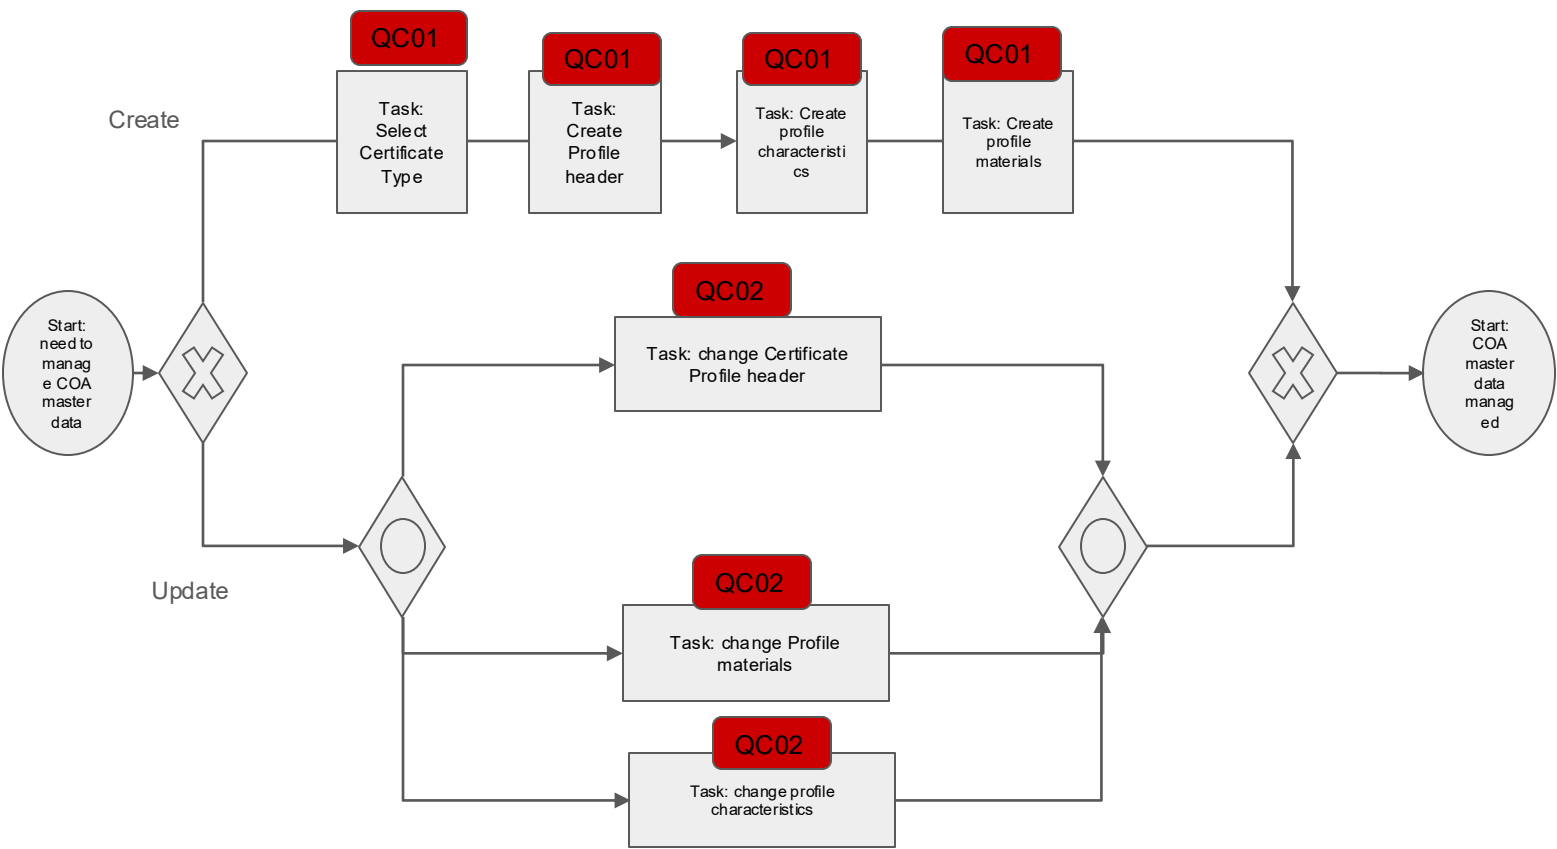

7.5 Manage Plan to Produce Data

7.5.2 Manage Delivery Master Data

Manage Certificate of Analysis master data

Done

7.5 Manage Plan to Produce Data

7.5.3 Manage Quality master data

Part one
